McFaddin, 2024-04-02 Integrative Medicine in Veterinary Practice Enables the entire veterinary team to seamlessly incorporate integrative medicine into everyday practice. Integrative Medicine in Veterinary Practice is a unique resource designed to introduce the basic concepts of ten different integrative modalities to all members of the hospital team to establish a baseline of knowledge, explaining how patients will benefit from their use, discussing return on investment, informing veterinarians of available courses and suggested reading materials, walking managers through staff training, and providing client education materials. Supplemental web-based documents and presentations increase the ease with which staff are trained and clients are educated. Integrative medicine is not an all-or-nothing concept. Therapies can be used individually or in combination as part of a multimodal approach and applied easily to every patient or used in select cases. Sample topics covered in Integrative Medicine in Veterinary Practice include Photobiomodulation covering light/laser specifics, mechanisms of action, supplies, and equipment; and techniques. Veterinary Spinal Manipulation Therapy (VSMT) covering pain in veterinary patients, mechanisms of action, adjustment vs. manipulation vs. mobilization techniques, and post-adjustment recommendations. Acupuncture covering acupuncture point selection, using traditional Chinese veterinary medicine (TCVM) and Western medicine techniques, mechanisms of action, safety, and practical applications. Chinese Herbal Medicine (CHM) covering TCVM fundamentals as it applies to herbal classification and selection, herb production, safety, and formulation, and CHM applications.
