One-Dimensional Man Herbert Marcuse, 2013-10-11 One of the most important texts of modern times Herbert Marcuse's analysis and image of a one dimensional man in a one dimensional society has shaped many young radicals way of seeing and experiencing life Published in 1964 it fast became an ideological bible for the emergent New Left As Douglas Kellner notes in his introduction Marcuse's greatest work was a damning indictment of contemporary Western societies capitalist and communist Yet it also expressed the hopes of a radical philosopher that human freedom and happiness could be greatly expanded beyond the regimented thought and behaviour prevalent in established society For those who held the reigns of power Marcuse's call to arms threatened civilization to its very core For many others however it represented a freedom hitherto unimaginable

Nietzschean Narratives Gary Shapiro, 1989-06-22 Shapiro's book is bursting with thoughts and if one is willing to mine them one is sure to find items of interest or provocation The Journal of Aesthetics and Art Criticism Taking issue with a widely held view that Nietzsche's writings are essentially fragmentary or

aphoristic Gary Shapiro focuses on the narrative mode that Nietzsche adopted in many of his works. Such themes as eternal recurrence, the question of origins and the problematics of self knowledge are reinterpreted in the context of the narratives in which Nietzsche develops or employs them. **Methodology for the Human Sciences** Donald E.

Polkinghorne, 1984-06-30 *Methodology for the Human Sciences* addresses the growing need for a comprehensive textbook that surveys the emerging body of literature on human science research and clearly describes procedures and methods for carrying out new research strategies. It provides an overview of developing methods, describes their commonalities and variations, and contains practical information on how to implement strategies in the field. In it, Donald Polkinghorne calls for a renewal of debate over which methods are appropriate for the study of human beings, proposing that the results of the extensive changes in the philosophy of science since 1960 call for a reexamination of the original issues of this debate. The book traces the history of the deliberations from Mill and Dilthey to Hempel and logical positivism, examines recently developed systems of inquiry and their importance for the human sciences, and relates these systems to the practical problems of doing research on topics related to human experience. It discusses historical realism, systems and structures, phenomenology and hermeneutics, action theory, and the implications recent systems have for a revised human science methodology. **Erosion of Reality by Spatialisation and Digitalisation** Pieter Brabers, 2022-08

This book offers an innovative view of everyday reality. It clarifies how the spatial dimension of reality, as well as our personal and interpersonal perception and interaction with reality, aggravates human separateness at the expense of human connectedness. It shows how many urgent societal challenges are affected by an imbalance between spatial and the non-spatial aspects and offers an analysis of the impoverishment of society both in spatial terms (spatialisation) and in informational terms (digitalisation). Drawing on insights from quantum physics and depth psychology, it proposes an unorthodox view of the potential of humans and of reality in itself that was lost in this impoverishment. I found this book hugely interesting, highly original, and very well written. I haven't come across these ideas presented in quite this way, and so the book could be considered a groundbreaking contribution. Dr Stephan Harding, Resident Ecologist, Schumacher College, Author of *Animate Earth*. It rarely happens that we are invited by a scholarly text to look at reality in a basically different way than the one we are used to, at least in a way that is seductive and compelling at the same time. But this is precisely what the text of Pieter Brabers has done with me. Dr John Rijsman, Emeritus Professor of Social Psychology, Tilburg University. *The Dialectic of Herbert Marcuse* Patrick

Gamsby, 2024-09-05 Herbert Marcuse (1898-1979) was one of the most recognizable and controversial public intellectuals throughout the 1960s until his death in the late 1970s, but today Marcuse's work largely stands in the shadows of other Frankfurt School members and critical thinkers. Despite having once held a prominent and influential position amongst scholars, activists, and readers in the twentieth century, it is argued that Marcuse's work nevertheless remains largely misunderstood. *The Dialectic of Herbert Marcuse* offers a new interpretation of Marcuse, one that attempts to show how

Marcuse's work has so often been turned into something else into its opposite. In shining a light on parts of the unknown Marcuse through the use of archival material and published works this book reveals Marcuse's Critical Theory to be one of hope not one of pessimism as it is so often portrayed to be. Ultimately it is argued that Marcuse's Critical Theory remains a vital and important body of work for present day society and ought to be revisited.
