Memory and the Dissolution of the Monasteries in Early Modern England Harriet Lyon, 2021-10-21 The dissolution of the monasteries was recalled by individuals and communities alike as a seismic rupture in the religious cultural and socio economic fabric of early modern England It was also profoundly important in shaping contemporary historical consciousness the topographical imagination and local tradition *Memory and the Dissolution* is a book about the dissolution of the monasteries after the dissolution Harriet Lyon argues that our understanding of this historical moment is enriched by taking a long chronological view of the suppression by exploring how it was remembered to those who witnessed it and how this memory evolved in subsequent generations Exposing and repudiating the assumptions of a conventional historiography that has long been coloured by Henrician narratives and sources this book reveals that the fall of the religious houses was remembered as one of the most profound and controversial transformations of the entire English Reformation

Reading Memory in Early Modern Literature Andrew Hiscock, 2011-10-13 He who remembers or recollects thinks declared Francis Bacon drawing attention to the absolute centrality of the question of memory in early modern Britain s cultural life The vigorous debate surrounding the faculty had dated back to Plato at least However responding to the powerful influences of an ever expanding print culture humanist scholarship the veneration for the cultural achievements of antiquity and sweeping political upheaval and religious schism in Europe succeeding generations of authors from the reign of Henry VIII to that of James I engaged energetically with the spiritual political and erotic implications of remembering Treating the works of a host of different writers from the Earl of Surrey Katharine Parr and John Foxe to William Shakespeare Mary Sidney Ben Jonson and Francis Bacon this study explores how the question of memory was intimately linked to the politics of faith identity and intellectual renewal in Tudor and early Stuart Britain

Memory, Print, and Gender in England, 1653-1759 H. Weber, 2016-04-30 This book surveys the genesis of the modern conception of memory where gender becomes crucial to the processes of memorialization and suggests ways in which technology opens a new chapter in the history of memory

Smith,2016-04-01 Working from a cultural studies perspective author D K Smith here examines a broad range of medieval and Renaissance maps and literary texts to explore the effects of geography on Tudor Stuart cultural perceptions He argues that the literary representation of cartographically related material from the late fifteenth to the early seventeenth century demonstrates a new strain not just of geographical understanding but of cartographic manipulation which he terms the cartographic imagination Rather than considering the effects of maps themselves on early modern epistemologies Smith considers the effects of the activity of mapping the new techniques the new expectations of accuracy and precision which developed in the sixteenth century on the ways people thought and wrote Looking at works by Spenser Marlowe Raleigh and Marvell among other authors he analyzes how the growing ability to represent physical space accurately brought with it not just a wealth of new maps but a new array of rhetorical techniques metaphors and associations which allowed the manipulation of texts and ideas in ways never before possible **Geographies of Embodiment in Early Modern England** Mary Floyd-Wilson, Garrett A. Women and Geography on the Early Modern English Stage Katja Pilhuj,2025-10-01 In a late 1590s atlas proof from cartographer John Speed Queen Elizabeth appears crowned and brandishing a ruler as the map's scale of miles Not just a

map key the queen's depiction here presents her as a powerful arbiter of measurement in her kingdom. For Speed the queen was a formidable female presence authoritative ready to measure any place or person. The atlas finished during James's reign later omitted her picture. But this disappearance did not mean Elizabeth vanished entirely; her image and her connection to geography appear in multiple plays and maps. Elizabeth becomes like the ruler she holds an instrument applied and adapted. *Women and Geography on the Early Modern English Stage* explores the ways in which mapmakers, playwrights and audiences in early modern England could, following their queen's example, use the ideas of geography or world writing to reshape the symbolic import of the female body and territory to create new identities. The book demonstrates how early modern mapmakers and dramatists, men and women, conceived of and constructed identities within a discourse of fluid ideas about space and gender. *Mind-Travelling and Voyage Drama in Early Modern England* D. McInnis, 2012-12-15. Drawing on a wide range of drama from across the seventeenth century including works by Marlowe, Heywood, Jonson, Brome, Davenant, Dryden and Behn, this book situates voyage drama in its historical and intellectual context between the individual act of reading in early modern England and the communal act of modern sightseeing.
