Marc Bloch Sociology And Geography Encountering Changing Disciplines:

Marc Bloch, Sociology and Geography Susan W. Friedman, 2004-11-11 The French historian Marc Bloch has often been praised for his interdisciplinary approach This book demonstrates the importance of both Vidalian geography and Durkheimian sociology for Bloch and the significant but often overlooked differences between his approach and theirs In contrast to much other work on Bloch Professor Friedman highlights the intellectual and institutional contexts of Bloch's works arguing that only by a careful examination of the debates in which he was involved can one begin to come to terms with the nature of his contribution

Handbook of Historical Sociology Gerard Delanty, Engin F Isin, 2003-06-03 The overall conception of the volume is absolutely splendid and the editors skilfully place the material in the context of disciplinary and post disciplinary developments in sociology This is a major contribution to the field as well as a comprehensive and reliable guide to its main components William Outhwaite Professor of Sociology School of European Studies University of Sussex It is hard to think of anything that has been left out in this masterly survey of contemporary historical sociology The editors have done a superb job in the selection of both themes and contributors We now at last have an up to date book to assign in our graduate courses on comparative historical sociology There's really nothing else like it out there The editors introduction is one of the best things I have read on how the field developed and the problems it has encountered Krishan Kumar William R Kenan Jr Professor of Sociology University of Virginia The range of topics covered and the number of distinguished scholars who have contributed to the handbook is impressive with leading figures such as Bryan S Turner John R Hall Gianfranco Poggi and Craig Calhoun among the contributors to a book that covers areas as diverse as post colonial historiography and the historical sociology of the city the handbook fills a void within the sizable literature on historical sociology and undoubtedly will be a useful addition to graduate reading lists The British Journal of Sociology What is important in historical sociology What are the main routes of development in the subject This Handbook consists of 26 chapters on historical sociology It is divided into three parts Part One is devoted to Foundations and covers Marx Weber evolutionary and functionalist approaches the Annales School Elias Nelson and Eisenstadt Part Two moves on to consider major approaches such as modernization approaches late Marxist approaches historical geography institutional approaches cultural history intellectual history postcolonial and genealogical approaches The third part is devoted to the major substantive themes in historical sociology ranging from state formation nationalism social movements classes patriarchy architecture religion and moral regulation to problems of periodization and East West divisions Each part includes an introduction that summarizes and contextualizes chapters A general introduction to the volume outlines the current situation of historical sociology after the cultural turn in the social sciences It argues that historical sociology is deeply divided between explanatory sociological approaches and more empirical and interpretative historical approaches Systematic and informative the book offers readers the most complete and authoritative guide to historical sociology L'École des

Annales André Burguière, 2006-09-01 De Marc Bloch Emmanuel Leroy Ladurie et Jacques Le Goff de Lucien Febvre Philippe Ariès et Michel Foucault de Fernand Braudel Ernest Labrousse l'école des Annales a profondément renouvelé l'historiographie française et internationale Au lieu de décrire une période historique un événement les faits d'armes d'un roi ou d'un empereur les heurs et les malheurs d'une nation l'école des Annales a entrepris d'étudier des problèmes Peut-on être incroyant l'époque de Rabelais Pourquoi la France n'a-t-elle jamais été la première puissance économique Dans ce livre André Burguière montre comment cette école s'est constituée autour de l'étude des mentalités Structures mentales et cognitives représentations et images inconscientes les mentalités restituent les sociétés disparues dans les catégories à l'aide desquelles elles se pensaient elles-mêmes L'Histoire ou la pensée des autres André Burguière directeur d'études à l'école des hautes études en sciences sociales est membre de la rédaction des Annales

The Selected Writings of Marc Bloch Iona Singh, 2025-02-20 This book brings a selection of the influential writings of Marc Bloch into the English language largely for the very first time Chronologically arranged to trace the developmental arc of Bloch's historical philosophy the translations in *The Selected Writings of Marc Bloch* offer an illuminating insight into the theories of a pioneer historian and original founder of the renowned Annales school of French social history The carefully curated translations in this volume reveal Bloch's thoughts on questions that historical studies has grappled with since the birth of the discipline Why should history exist at all What value does it have What exactly is a science of history What is the actual role of the historian in historical studies This collection presents Bloch's precise understanding of the contours of the discipline of history defined by the abutment and transgression of its borders by other subjects Consequently it provides a theoretical underpinning for multidisciplinary and interdisciplinary concepts via historical studies pulling into its fold diverse themes such as customs agriculture economics nutrition technology manners art fashion and countless other topics explored by Bloch himself in the process

The Relations of History and Geography Henry Clifford Darby, 2002 This set of twelve previously unpublished essays on historical geography written by Darby in the 1960s explains the basis of his ideas The essays are divided into three quartets of studies relating to England France and the United States

Fraternity Among the French Peasantry Alan R. H. Baker, 2004-03-18 The individualism of the French peasantry during the nineteenth century has frequently been asserted as one of its most striking characteristics In this 1999 book Alan Baker challenges this orthodox view and demonstrates the extent to which peasants continued with traditional and developed new forms of collective action He examines representations of the peasantry and discusses the discourse of fraternity in nineteenth century France in general before considering specifically the historical development geographical diffusion and changing functions of fraternal voluntary associations in Loir et Cher between 1815 and 1914 Alan Baker focuses principally upon associations aimed at reducing risk and uncertainty and upon associations intended to provide agricultural protection A wide range of new voluntary associations were established in Loir et Cher and indeed throughout rural France during the nineteenth century Their historical geography throws new light upon the sociability upon the

changing mentalities of French peasants and upon the role of fraternal associations in their struggle for survival

Visions of Kinship in Medieval Europe Hans Hummer, 2018-04-26 What meaning did human kinship possess in a world regulated by Biblical time committed to the primacy of spiritual relationships and bound by the sinews of divine love In the process of exploring this question Hans Hummer offers a searching re-examination of kinship in Europe between late Roman times and the high middle ages the period bridging Europe's primitive past and its modern future Visions of Kinship in Medieval Europe critiques the modernist and Western bio-genealogical and functionalist assumptions that have shaped kinship studies since their inception in the nineteenth century when Biblical time collapsed and kinship became a signifier of the essential secularity of history and a method for conceptualizing a deep prehistory guided by autogenous human impulses Hummer argues that this understanding of kinship is fundamentally antagonistic to medieval sentiments and is responsible for the frustrations researchers have encountered as they have tried to identify the famously elusive kin groups of medieval Europe He delineates an alternative ethnographic approach inspired by recent anthropological work that privileges indigenous expressions of kinship and the interpretive potential of native ontologies This study reveals that kinship in the middle ages was not biological primitive or a regulator of social mechanisms nor was it traceable by bio-genealogical connections In the Middle Ages kinship signified a sociality that flowed from convictions about the divine source of all things and which wove together families institutions and divinities into an expansive eschatological vision animated by the most righteous principle of love

Cultures of Technology and the Quest for Innovation Helga Nowotny, 2006 Chiefly papers presented at a conference held at the Kulturwissenschaftliches Institut in Essen Germany in April 2003

Deadly Documents Mark Ward, 2016-12-05 Scholars teachers and practitioners of organizational professional and technical communication and rhetoric are target audiences for a new book that reaches across those disciplines to explore the dynamics of the Holocaust More than a history the book uses the extreme case of the Final Solution to illumine the communicative constitution of organizations and to break new ground on destructive organizational communication and ethics Deadly Documents Technical Communication Organizational Discourse and the Holocaust Lessons from the Rhetorical Work of Everyday Texts starts with a microcosmic look at a single Nazi bureau Through close rhetorical visual and discursive analyses of organizational and technical documents produced by the SS Security Police Technical Matters Group the bureau that managed the Nazi mobile gas van program author Mark Ward shows how everyday texts functioned as boundary objects on which competing organizational interests could project their own interpretations and temporarily negotiate consensus for their parts in the Final Solution The initial chapters of Deadly Documents provide a historical ethnography of the SS technical bureau by closely describing the institutional and organizational cultures in which it operated and relating organizational stories told in postwar testimony by the desk murderers themselves Then through examination of the primary material of their documents Ward demonstrates how this Social Darwinist world of competing Nazi bureaucrats deployed rhetorical and linguistic

resources to construct a social reality that normalized genocide Ward goes beyond the usual Weberian bureaucratic paradigm and applies to the problem of the Holocaust both the interpretive view that sees organizations as socially constructed through communication and the postmodern view that denies the notion of a preexisting social object called an organization and instead situates it within larger discourses The concluding chapters trace how contemporary scholars of professional communication have wrestled with the Nazi case and developed a consensus explanation that the desk murderers were amoral technocrats Though the explanation is dismissed by most historians it nevertheless offers Ward argues a comforting distance between us and them Yet as Ward writes First we will learn more about the dynamic role of everyday texts in organizational processes Second as we see these processes perhaps inherent to all organized communities including our own at work even in the extreme case of the SS Technical Matters Group the comforting distance that we now maintain between them and us is necessarily diminished And third our newfound discomfort may open productive spaces to revisit conventional wisdoms about the ethics of technical and organizational communication

Governmentality and the Mastery of Territory in Nineteenth-Century America Matthew G. Hannah, 2000-09-14 Matthew Hannah's book focuses on late nineteenth century America the period of transformation which followed the Civil War and gave birth to the twentieth century This was a time of industrialization and urbanization Immigration was on the increase and traditional hierarchies were being challenged Using a combination of empirical and theoretical material Hannah explores the modernization of the American federal government during this period Discussions of gender race and colonial knowledge engage with Foucault's ideas on governmentality The empirical strands of the narrative surround the career and writing of Francis A Walker A hugely influential figure at that time Walker was Director of the 1870 and 1880 US censuses Commissioner of Indian affairs and a prominent political economist and educator Through an analysis of his work Hannah enriches previous interpretations of the period demonstrating that the modernization of the American national state was a thoroughly spatial and explicitly geographical project
