Fifth edition, revised** Richard Whately, 1844 **Elements of Logical Reasoning** Jan von Plato, 2014-01-23 Some of our earliest experiences of the conclusive force of an argument come from school mathematics faced with a mathematical proof we cannot deny the conclusion once the premises have been accepted Behind such arguments lies a more general pattern of demonstrative arguments that is studied in the science of logic Logical reasoning is applied at all levels from everyday life to advanced sciences and a remarkable level of complexity is achieved in everyday logical reasoning even if the principles behind it remain intuitive Jan von Plato provides an accessible but rigorous introduction to an important aspect of contemporary logic its deductive machinery He shows that when the forms of logical reasoning are analysed it turns out that a limited set of first principles can represent any logical argument His book will be valuable for students of logic mathematics and computer science *Instructor's Manual for Meaning and Argument* Robert Goodwin Olson, 1969 *Argumentation, Communication, and Fallacies* Frans H. van Eemeren, Rob Grootendorst, 2016-07-22 This volume gives a theoretical account of the problem of analyzing and evaluating argumentative discourse After placing argumentation in a communicative perspective and then discussing the fallacies that occur when certain rules of communication are violated the authors offer an alternative to both the linguistically inspired descriptive and logically inspired normative approaches to argumentation The authors characterize argumentation as a complex speech act in a critical discussion aimed at resolving a difference of opinion The various stages of a critical discussion are outlined and the communicative and interactional aspects of the speech acts performed in resolving a simple or complex dispute are discussed After dealing with crucial aspects of analysis and linking the evaluation of argumentative discourse to the analysis the

authors identify the fallacies that can occur at various stages of discussion Their general aim is to elucidate their own pragma dialectical perspective on the analysis and evaluation of argumentative discourse bringing together pragmatic insight concerning speech acts and dialectical insight concerning critical discussion The Elements of Logic Stephen Francis Barker,2003 This classic concise introductory logic text is designed for courses that cover both formal and informal logic The text covers a broad traditional range of topics and includes a large number of exercises which pointedly illustrate logical principles Answers to selected exercises are included in the study guide **The Logic of the Articles in**

Traditional Philosophy E.M. Barth,2012-12-06 When the original Dutch version of this book was presented in 1971 to the University of Leiden as a thesis for the Doctorate in philosophy I was prevented by the academic mores of that university from expressing my sincere thanks to three members of the Philosophical Faculty for their support of and interest in my pursuits I take the liberty of doing so now two and a half years later First and foremost I want to thank Professor G Nuchelmans warmly for his expert guidance of my research A number of my most important sources were brought to my attention by him During the whole process of composing this book his criticism and encouragement were carried out in a truly academic spirit He thereby provided working conditions that are a sine qua non for every author who is attempting to approach controversial matters in a scientific manner conditions which however were not easily available at that time In a later phase I also came into contact with Professors L M de Rijk and J B Ubbink with both of whom I had highly stimulating discussions and exchanges of ideas The present edition contains some entirely new sections viz 1 9 IV 29 V 9 V 20 VII 14 iii iv VII 17 i VIII 22 IX 17 IX 19 X 9 and XI 8 Section X 9 was inspired by a remark made by Professor A *Ad Hominem Arguments* Douglas Walton,1998-09 Douglas Walton presents a clear account of the structure of the ad hominem argument and how that structure can be used to evaluate specific cases of this type of argumentation as fallacious or not

Argument Dialectics: The Place of Reasons in Logic Hubert Marraud,2025-06-12 This book is a systematic exposition of Argument Dialectics AD Despite its name argument dialectics is a logical approach to argumentation theory AD stands out among theories of argument because of three unusual features it is reasons based holistic and particularistic This implies that AD conceives of logic as a theory of the dialectical construction of reasons not as a theory of inferences Consequently contrary to other logical approaches AD focuses on the study of inter argumentative relations especially those of opposition and weighing The book makes an extensive use of the theory of reasons a branch of metaethics that has been a very valuable quarry of intuitions and concepts for the elaboration of a reason based theory of argument The oppositions generalism particularism and atomism holism proposed by Jonathan Dancy which play a central role in the book and in the development of AD have been adapted from the theory of reasons and the same can be said of the distinction between different statuses of reasons that AD associates with different kinds of counterarguments Conceiving of the theory of argument in terms of reasons has the effect of situating the paradigm of argumentation in practical argumentation reasoning
