Hypotheses. Solar system and atoms Аркадий Серков, Антон Серков, Мечислав Радишевский, 2020-07-10 The planetary systems of the micro and macrocosm considered as two nodal points in the structure of matter the author proposes hypotheses in which the laws of one system are transferred to another The quantization of orbits in the solar and satellite systems is proved An explanation is given of the reasons for the deceleration of artificial satellites secular changes in orbital elements and rotational speeds of bodies The analysis of various theories of the origin of the solar system is given The transfer of the laws of the macrocosm to the micro world allows us to interpret the entropy term in the equation of thermodynamic potential as the orbital kinetic energy of molecules gravitating relative to each other A chemical bond is considered as a result of micro gravitation between the masses of nuclei A gravitational equation is proposed for the micro world the calculations of the binding energy on which coincide with the experimental data Additional chapters discuss the energy of the hydrogen cycle the reasons for the multiplicity of masses and the periodicity of the properties of chemical elements as well as the orbital mechanism of aggregate transitions the new concept of Earth's magnetism and the strong interaction in matter Author AT Serkov chapters 22-27 together with AA Serkov and MB Radishevsky **Shelley's Process** Jerrold E. Hogle, 1989-01-12 In this set of thorough and revisionary readings of Percy Bysshe Shelley's best known writings in verse and prose Hogle argues that the logic and style in all these works are governed by a movement in every thought memory image or word pattern whereby each is seen and sees itself in terms of a radically different form For any specified entity or figure to be known for what it is it must be reconfigured by and in terms of another one at another level which must then be dislocated itself In so delineating Shelley's process Hogle reveals the revisionary procedure in the poet's various texts and demonstrates the powerful effects of radical transference in Shelley's visions of human possibility
