Bin Tyeer, 2025-12-09 A free ebook version of this title is available through Luminos University of California Press's Open Access publishing program Visit www.luminosoa.org to learn more The Well-Tempered Reader provides a new understanding of the term *adab* a ubiquitous concept in Arabic literature with many meanings In Sarah R Bin Tyeer's analysis *adab* is more than just a way of writing or the cultivation of moral excellence as it is often understood It is rather an ethical way of perceiving understanding and living that results from ceaseless critical interaction between the individual and all aspects of his or her social cultural natural and metaphysical environment Through a close reading of texts from eighth century Baghdad to nineteenth century Lebanon in which *adab* emerges as a force across historical periods and geographies Bin Tyeer posits the term as a generative literary and cultural framework and a discursive force for analyzing literary acts This is the first book length study of *adab* as an intellectual institution examining its role and historical influence in the moral and intellectual formation of the *adabized* subject Bin Tyeer reveals the import of *adab* not only for Arabic literary studies but for comparative literary inquiry *The Future of Hope* Miroslav Volf, William Henry Katerberg, 2004 Over the last three decades

a major cultural shift has taken place in the attitudes of Western societies toward the future. Modernity's eclipse by postmodernity is characterized in large part by the loss of hope for a future substantially better than the present. Old optimism about human progress has given way to uncertainty and fear. In this book, scholars from various disciplines—theology, the social sciences, and the humanities—explore the move from a culture of optimism to a culture of ambiguity, and they seek to infuse today's jaded language of hope with a new vitality. *The Future of Hope* offers a powerful critique of today's stifling cultural climate and shows why the vision of hope central to Christian faith must be a basic component of any flourishing society. The first section of the book sets the context with telling cultural criticism of modernity. The second section focuses on affinities between premodern Christian visions of hope and twentieth-century thought. The final section of the book examines the relationship between postmodern thought, Christian tradition, and biblical hope, addressing how Christians in a postmodern world can best articulate their faith. Written by truly profound thinkers, these chapters are diverse in their content, methodologies, and temperament, yet they are united by a deep engagement with both the Christian tradition and the larger cultural and intellectual climate in which we live and work. *The Future of Hope* can thus be read not just as an attempt at retrieval of hope for today, but as itself one small act of hope in an age when people too seldom take time to think critically and hopefully.

Nietzsche on Memory and History, Anthony K. Jensen, Carlotta Santini, 2020-12-07. History and memory rank as central themes in the philosophy of Friedrich Nietzsche. As one of the last philosophers of the 19th century, Nietzsche naturally belongs to the so-called historical century. The contentious exchange with the past and with antiquity, as much as the mechanisms, the dangers, and the lessons of memory and tradition, are continually examined and stand in close relationship with Nietzsche's vision of life and his project of human development. As Jacob Burckhardt once wrote of the cultural critique to his Basel colleague: "Fundamentally you are always teaching history." (9/13/1882). Following Burckhardt's judgment, the contributors focus on the analysis of core questions in the philosophies of history and memory and their respective convergence in the thought of Nietzsche. The epistemological relevance of these central concepts will be thematized alongside those concerning tradition and education. The discussion of these rich themes unifies a broad spectrum of questions ranging from cultural memory to contemporary philosophy of mind. The contributions are revised versions of selected papers presented at the 2018 conference of the annual meeting of the Nietzsche Society in Naumburg.

On the Use and Abuse of History for Life, Friedrich Wilhelm Nietzsche, 2012-07-18. "Incidentally I despise everything which merely instructs me without increasing or immediately enlivening my activity. These are Goethe's words. With them, as with a heartfelt expression of *Ceterum censeo*, I judge otherwise our consideration of the worth and the worthlessness of history may begin. For this work is to set down why, in the spirit of Goethe's saying, we must seriously despise instruction without vitality, knowledge which enervates activity, and

history as an expensive surplus of knowledge and a luxury because we lack what is still most essential to us and because what is superfluous is hostile to what is essential To be sure we need history But we need it in a manner different from the way in which the spoilt idler in the garden of knowledge uses it no matter how elegantly he may look down on our coarse and graceless needs and distresses That is we need it for life and action not for a comfortable turning away from life and action or merely for glossing over the egotistical life and the cowardly bad act We wish to use history only insofar as it serves living But there is a degree of doing history and a valuing of it through which life atrophies and degenerates To bring this phenomenon to light as a remarkable symptom of our time is every bit as necessary as it may be painful **Friedrich**

Nietzsche and Alexis De Tocqueville on the Possibility of History Paul Petrequin,1997 [The Stakes of History](#) David N. Myers,2018-01-09 A leading scholar of Jewish history's bracing and challenging case for the role of the historian today Why do we study history What is the role of the historian in the contemporary world These questions prompted David N Myers's illuminating and poignant call for the relevance of historical research and writing His inquiry identifies a number of key themes around which modern Jewish historians have wrapped their labors liberation consolation and witnessing Through these portraits Myers revisits the chasm between history and memory revealing the middle space occupied by modern Jewish historians as they work between the poles of empathic storytelling and the critical sifting of sources History properly applied can both destroy ideologically rooted myths that breed group hatred and create new memories that are sustaining of life Alive in these investigations is Myers's belief that the historian today can and should attend to questions of political and moral urgency Historical knowledge is not a luxury to society but an essential requirement for informed civic engagement as well as a vital tool in policy making conflict resolution and restorative justice **The Concept of Person in Judaism, Christianity and Islam** Georges Tamer,2023-11-06 The sixth volume of the series Key Concepts of Interreligious Discourses investigates the roots of the concept of person in Judaism Christianity and Islam and its relevance for the present time The concept of person lies at the core of central ideas in the modern world such as the value and development of personal identity the sanctity of human person and the human rights based on that In societies that are shaped by a long Christian tradition these ideas are associated often with the belief in the creation of man in the image of God But although Judaism shares with Christianity the same Biblical texts about the creation of man and also the Qur'an knows Adam as the first human being created by God and his representative on earth the focus on the concept of person is in each one of these religions a different one So the crucial question is how did the concept of person evolve in Judaism Christianity and Islam out of the concept of human being What are the special features of personhood in each one of these traditions The volume presents the concept of person in its different aspects as anchored in Judaism Christianity and Islam It unfolds commonalities and differences between the three monotheistic religions as well as the manifold discourses about the meaning of person within these three religions *Classics of Moral and Political Theory* Michael L. Morgan,2011-09-15 The fifth edition of Michael L Morgan's

Classics of Moral and Political Theory broadens the scope and increases the versatility of this landmark anthology by offering new selections from Aristotle's Politics, Aquinas' Disputed Questions on Virtue and Treatise on Law as well as the entirety of Locke's Letter Concerning Toleration, Kant's To Perpetual Peace and Nietzsche's On the Advantage and Disadvantage of History for Life.

The Use and Abuse of History Friedrich Nietzsche, 2019-11-13 In this essay the philosopher presents a complex many faceted argument that cautions against an uncritical devotion to the study of history and excessive devotion to any country's past greatness.

Knowledge, Consent, and Liberty Steve G. Sweetman, 2020-12-01 The angst of modernity is that of powerlessness, disenfranchisement and alienation. People everywhere are experiencing helplessness in a world where the few rule and leaders and legislators run roughshod over the masses with a deluge of laws and where technology encroaches upon their daily lives and privacy and an economic inequality never before seen in history. The concepts of self determination, destroying superstition, government by the people, questioning all authority and the power of knowledge, reason and the authority of the individual is on the verge of dying. However as Thomas Paine said We have it in our power to begin the world over again. Today's world cries out for a new breed of thinker: rational, brave, bold, innovative, intuitive and artistic. We all need to re-evaluate to become questioners, explorers and seekers. Knowledge, Consent and Liberty is about the power of knowledge, the supremacy of the consent of the governed, the legal and Constitutional right of the people of the globe to form their definitions of liberty, freedom and government and their obligation to create their collective destiny. Its lofty goal is to challenge, empower and enlighten the reader. In a logical progression from premises to conclusions it lays out a philosophical, historical and scientific argument that humans create their world for good or bad. It expounds on current social, political and cultural issues that deserve consideration for reform or change. And it maps out a constitutional strategy and method for the people to create America and the world in their own image rather than that of a few oligarchs.

The Care of Life Miguel de Beistegui, Giuseppe Bianco, Marjorie Gracieuse, 2014-12-22 This interdisciplinary collection of essays demonstrates how the ethical and political problems we are confronted with today have come to focus largely on life. The contributors to this volume define and assess the specific meaning of life itself. It is only by doing so that we can understand why life has become an all encompassing problem, why all questions, especially ethical and political, have become vital questions. We have reached a moment in history where every distinction and opposition is no longer in relation to life but within it and where life is at once a theoretical and practical problem. This book throws light on this nexus of problems at the heart of contemporary debates in bioethics and biopolitics. It helps us understand why and how life is understood, valued, cared for and framed today. Taking a genuinely transdisciplinary approach, these essays demonstrate how life is a multifaceted problem and how diverse the origins, foundations and also consequences of bioethics and biopolitics therefore are.
