Gender History in Practice Kathleen Canning, 2006 The eight essays collected in this volume examine the practice of gender history and its impact on our understanding of European history Each essay takes up a major methodological or theoretical issue in feminist history and illustrates the necessity of critiquing and redefining the concepts of body citizenship class and experience through historical case studies Kathleen Canning opens the book with a new overview of the state of the art in European gender history She considers how gender history has revised the master narratives in some fields within modern European history such as the French Revolution but has had a lesser impact in others Weimar and Nazi Germany Gender History in Practice includes two essays now regarded as classics Feminist History after the Linguistic Turn and The Body as Method as well as new chapters on experience citizenship and subjectivity Other essays in the book draw on Canning's work at the intersection of labor history the history of the welfare state and the history of the body showing how the gendered social body was shaped in Imperial Germany The book concludes with a pair of essays on the concepts of class and citizenship in German history offering critical perspectives on feminist understandings of citizenship Featuring an extensive thematic bibliography of influential works in gender history and theory that will prove invaluable to students and scholars Gender History in Practice offers new insights into the history of Germany and Central Europe as well as a timely assessment of gender history's accomplishments and challenges

Printing Religion after the Enlightenment Timothy Stanley, 2022-07-26 Over the course of the seventeenth to eighteenth centuries an interior private notion of religion gained wide public recognition It then spread through settler colonial contexts around the world It has since been criticized for its abstract immaterial nature as well as its irrelevance to traditions beyond the European context However such critiques

obscure the contradiction between religion's definition as a matter of interior privacy and its public visibility in various printed publications Timothy Stanley responds by re-evaluating the cultural impact of the exterior forms in which religious texts were printed such as pamphlets broadsheets books and journals He also applies that evidence to critical studies of religion shaped by the crisis of representation in the human sciences While Jacques Derrida is oft cited as a progenitor of that crisis the opposite case is made Additionally Stanley draws on Derrida's thought to reframe the relation between a religious text's internal hermeneutic interests and its external forms In sum this book provides a new model of how people printed religion in ways that can be compared to other material cultures around the world Historiography: Culture Robert M. Burns, 2006 This collection aims to enable the reader to disentangle some of the ambiguities and confusions which have characterized the use of the term historiography *Historical Theory* Mary Fulbrook, 2003-10-04 A highly original argument about the fact or fiction debate which takes a fresh look at major debates on the nature of history and the dilemmas facing historians today **Cultural History and Education** Thomas S. Pereyra, 2001 First Published in 2001 Routledge is an imprint of Taylor Francis an informa company **Cultural History** Alessandro Arcangeli, 2013-03 The expression cultural history is generally used today to signal a particular approach to history one which could be applied to any object and is mainly concerned with the sense men and women from the past gave to the world they lived in In this introduction to cultural history as a subdiscipline the reader will find the key steps in the historical development of the field from 1850 to the present It surveys different ways in which cultural history has been practised exploring intellectual history the history of ideas and concepts of mentalities of symbols and representations and of languages and discourses Cultural History also maps the territory cultural history most effectively enlightens gender the family and sexuality the body senses and emotions and images material culture and consumption the media and communication Lastly it includes an appendix of biographies of a number of influential cultural historians This concise and accessible introduction will be an essential volume for any university student studying cultural history **Deconstructing History** Alun Munslow, 1997 In *Deconstructing History* Alan Munslow examines history in the postmodern age providing an introduction to the topics and debates inherent in a postmodern approach to history Detailing both empiricist and deconstruction issues and considering the arguments of both schools Munslow debates the position that not only is history defined as the textual product of historians but also that narrative may provide the textual model for the past itself An examination of the character of historical evidence and an exploration of the role of historians as well as a discussion of the failure of traditional historical models is included Munslow maps the controversies involved in and assesses the merits of the deconstructionist position arguing that instead of beginning with past events themselves history begins with representations of the past **The Oxford Handbook of the New Cultural History of Music** Jane F. Fulcher, 2013-11-01 As the field of Cultural History grows in prominence in the academic world an understanding of the history of culture has become vital to

scholars across disciplines The Oxford Handbook of the New Cultural History of Music cultivates a return to the fundamental premises of cultural history in the cutting edge work of musicologists concerned with cultural history and historians who deal with music In this volume noted academics from both of these disciplines illustrate the continuing endeavor of cultural history to grasp the realms of human experience understanding and communication as they are manifest or expressed symbolically through various layers of culture and in many forms of art The Oxford Handbook of the New Cultural History of Music fosters and reflects a sustained dialogue about their shared goals and techniques rejuvenating their work with new insights into the field itself

Integrity, Honesty, and Truth Seeking Christian B. Miller, Ryan West, 2020 We tend to admire people who stay true to their convictions in the face of opposition who are not tempted to twist or withhold the truth for selfish reasons and who seek the truth even when it means giving up their cherished views Indeed integrity honesty and truth seeking are crucial virtues on both intimate and global scales significant in everything from our relationships to our politicians accountability The past forty years have witnessed a dramatic resurgence of philosophical interest in the virtues And yet there has been surprisingly little work among philosophers aimed at helping us better understand these three truth related virtues Edited by philosophers Christian B Miller and Ryan West this interdisciplinary volume significantly advances the discussion of integrity honesty and truth seeking by incorporating the insights and perspectives of experts in philosophy law communication and rhetorical studies theology psychology history and education Each of the volume s three sections is devoted to one virtue and comprises a conceptual chapter about the nature of the virtue in question an application chapter that explores the virtue s central role in an area of human life and a developmental chapter covering some of the ways people can foster the virtue Additionally the volume addresses experimental work on honest and dishonest behavior one of the fastest growing and most important research areas in the field of moral psychology today Every reader will come away from this volume with a deepened knowledge of and appreciation for the essential roles of these three virtues in our world and rich resources for developing and sustaining them in life

The Author's Hand and the Printer's Mind Roger Chartier, 2013-12-06 In Early Modern Europe the first readers of a book were not those who bought it They were the scribes who copied the author s or translator s manuscript the censors who licensed it the publisher who decided to put this title in his catalogue the copy editor who prepared the text for the press divided it and added punctuation the typesetters who composed the pages of the book and the proof reader who corrected them The author s hand cannot be separated from the printers mind This book is devoted to the process of publication of the works that framed their readers representations of the past or of the world Linking cultural history textual criticism and bibliographical studies dealing with canonical works like Cervantes Don Quixote

or Shakespeare's plays as well as lesser known texts Roger Chartier identifies the fundamental discontinuities that transformed the circulation of the written word between the invention of printing and the definition three centuries later of what we call literature

Music, Masculinity and the Claims of History Ian Biddle, 2016-04-29 What does it mean to think of Western Art music and the Austro German contribution to that repertory as a tradition How are men and masculinities implicated in the shaping of that tradition And how is the writing of the history or histories of that tradition shaped by men and masculinities This book seeks to answer these and other questions by drawing both on a wide range of German language writings on music sound and listening from the so called long nineteenth century circa 1800 1918 and a range of critical theoretical texts from the post war continental philosophical and psychoanalytic traditions including Lacan Žižek Serres Derrida and Kittler The book is focussed in particular on bringing the object of historical writing itself into scrutiny by engaging in what Žižek has called a historicity or a way of writing about the past that not merely acknowledges the ahistorical kernel of historical writing but brings that kernel into the light of day takes account of it and puts it into play The book is thus committed to a kind of historical writing that is open ended though not ideologically naïve and that does not fix or stabilize the nature of the relationship between so called primary and secondary texts The book consists of an introduction which places the study of classical music and the Austro German tradition within broader debates about the value of that tradition and four extensive case studies an analysis of the cultural historical category of listening around 1800 a close reading of A B Marx's Beethoven monograph of 1859 a consideration of Heinrich Schenker's attitudes to the mob and the vernacular more broadly and an examination through Franz Kafka of the figure of Mahler's body
