Greenberg,Mica Endsley,2012-03-16 This book constitutes the refereed proceedings of the 5th International Conference on Social Computing Behavioral Cultural Modeling and Prediction held in College Park MD USA in April 2012 The 43 revised papers presented in this volume were carefully reviewed and selected from 76 submissions The papers cover a wide range of topics including economics public health and terrorist activities as well as utilize a broad variety of methodologies e g machine learning cultural modeling and cognitive modeling *Embarrassing Predictions* Nakoa Rainfall,AI,2025-03-29 Embarrassing Predictions explores the fascinating history of forecasts gone wrong providing valuable business lessons from confidently stated certainties that missed the mark The book delves into why some once promising ideas ended up as predictive failures examining how cognitive biases technological limitations and market misunderstandings contributed to these misjudgments For instance the initial underestimation of the personal computer s potential highlights the fallibility of even expert predictions By dissecting these errors the book underscores the importance of adaptability and robust risk assessment in business and innovation management The book systematically progresses through various case studies analyzing the factors behind failed predictions and their consequences Examples include the overly optimistic projections for nuclear power and the downfall of Blockbuster a once dominant business model Each case study provides insights into decision making pitfalls and strategies for more realistic assessments Embarrassing Predictions offers a framework for evaluating future trends helping readers develop critical thinking skills and make more informed decisions in an uncertain world *Sociable Robots and the Future of Social Relations* J. Seibt,M. Nørskov,R. Hakli,2014-12-18 The robotics industry is growing rapidly and to a large extent the development of this market sector is due to the area of social robotics the production of robots that are designed to enter the

space of human social interaction both physically and semantically Since social robots present a new type of social agent they have been aptly classified as a disruptive technology i e the sort of technology which affects the core of our current social practices and might lead to profound cultural and social change Due to its disruptive and innovative potential social robotics raises not only questions about utility ethics and legal aspects but calls for robo philosophy the comprehensive philosophical reflection from the perspectives of all philosophical disciplines This book presents the proceedings of the first conference in this new area Robo Philosophy 2014 Sociable Robots and the Future of Social Relations held in Aarhus Denmark in August 2014 The short papers and abstracts collected here address questions of social robotics from the perspectives of philosophy of mind social ontology ethics meta ethics political philosophy aesthetics intercultural philosophy and metaphilosophy Social robotics is still in its early stages but it is precisely now that we need to reflect its possible cultural repercussions This book is accessible to a wide readership and will be of interest to everyone involved in the development and use of social robotics applications from social roboticists to policy makers **The SAGE Handbook of the Philosophy of Social Sciences** Ian C Jarvie,Jesus Zamora-Bonilla,2011-03-14 In this exciting Handbook Ian Jarvie and Jes s Zamora Bonilla have put together a wide ranging and authoritative overview of the main philosophical currents and traditions at work in the social sciences today Starting with the history of social scientific thought this Handbook sets out to explore that core fundamentals of social science practice from issues of ontology and epistemology to issues of practical method Along the way it investigates such notions as paradigm empiricism postmodernism naturalism language agency power culture and causality **Encyclopedia of Philosophy and the Social Sciences** Byron Kaldis,2013-03-07 This encyclopedia magnificently edited by Byron Kaldis will become a valuable source both of reference and inspiration for all those who are interested in the interrelation between philosophy and the many facets of the social sciences A must read for every student of the humanities Wulf Gaertner University of Osnabrueck Germany Byron Kaldis Encyclopedia of Philosophy and the Social Sciences is a triumph The entries are consistently good the coverage is amazing and he has managed to involve the whole scholarly community in this field It shows off the field very well and will be a magnificent resource for students and others Stephen Turner USF USA Like all good works of reference this Encyclopedia of Philosophy and the Social Sciences is not to be treated passively it provides clear and sometimes controversial material for constructive confrontation It is a rich resource for critical engagement The Encyclopedia conceived and edited by Byron Kaldis is a work of impressive scope and I am delighted to have it on my bookshelf David Bloor Edinburgh UK This splendid and possibly unique work steers a skilful course between narrower conceptions of philosophy and the social sciences It will be an invaluable resource for students and researchers in either or both fields and to anyone working on the interrelations between them William Outhwaite Newcastle UK A work of vast scope and widely gathered expertise the Encyclopedia of Philosophy and the Social Sciences is a splendid resource for anyone interested in the interface between philosophy and the social sciences Nicholas Rescher Pittsburgh This encyclopedia is the

first of its kind in bringing together philosophy and the social sciences It is not only about the philosophy of the social sciences but going beyond that it is also about the relationship between philosophy and the social sciences The subject of this encyclopedia is purposefully multi and inter disciplinary Knowledge boundaries are both delineated and crossed over The goal is to convey a clear sense of how philosophy looks at the social sciences and to mark out a detailed picture of how the two are interrelated interwoven at certain times but also differentiated and contrasted at others The Entries cover topics of central significance but also those that are both controversial and on the cutting edge underlining the unique mark of this Encyclopedia the interrelationship between philosophy and the social sciences especially as it is found in fresh ideas and unprecedented hybrid disciplinary areas The Encyclopedia serves a further dual purpose it contributes to the renewal of the philosophy of the social sciences and helps to promote novel modes of thinking about some of its classic problems The Encyclopedia of Philosophy and the Social Sciences edited by Byron Kaldis provides a unique needed and invaluable resource for researchers at every level Unique because nothing else offers the breadth of coverage found in this work needed because it permits researchers to find longer but also relatively brief clear but nonetheless expert articles introducing important topics and invaluable because of the guidance offered to both related topics and further study It should be the place that any interested person looks first when seeking to learn about philosophy and the social sciences Paul Roth UC Santa Cruz USA The Encyclopedia of Philosophy and the Social Sciences edited by Byron Kaldis covers an enormous range of topics in philosophy and the social sciences and the entries are compact overviews of the essential issues Harold Kincaid University of Alabama at Birmingham USA   The Psychology of Thinking about the Future Gabriele Oettingen,A. Timur Sevincer,Peter M. Gollwitzer,2018-03-08 Why do people spend so much time thinking about the future imagining scenarios that may never occur and making often unrealistic predictions This volume brings together leading researchers from multiple psychological subdisciplines to explore the central role of future thinking in human behavior across the lifespan It presents cutting edge work on the mechanisms involved in visualizing predicting and planning for the future Implications are explored for such important domains as well being and mental health academic and job performance ethical decision making and financial behavior Throughout chapters highlight effective self regulation strategies that help people pursue and realize their short and long term goals   HOW TO USE ANN FOR LINK PREDICTION IN SOCIAL NETWORK sneha soni,2022-07-25 Social Networks SNs have attracted many users and have become an integrated part of the individual s daily practices The rapid climb of SNs like Twitter and Facebook has generated a great deal of knowledge that sets direction for research in social relationships The knowledge network represented by Facebook is predicated on information transmission sharing and exchange The prediction process from prior information of the event helps to know the evolution of social networks and assists the companies in effective decision making during a typical recommendation system Social network connection prediction is an efficient technique for the analysis of the evolution of social organizations and formation of the social

network relations Link prediction is a crucial research direction within the field of complex networks and data processing Some complex physical processes like local stochastic processes also are wont to measure the similarity between network nodes and improve the accuracy of the link prediction In other words two linked nodes during a network may have a possible relationship Analyzing whether there s a possible relationship can help to seek out potential links and tightness measures the intensity of the connection Currently with the rapid development online social networks have been a neighborhood of people s life

Factors mediating performance monitoring in humans – from context to personality Patrizia Thoma,Christian Bellebaum, In our everyday life we constantly monitor our behaviour and adapt our responses following performance errors and feedback information from our environment Receiving positive or negative feedback which can be social monetary or some other type of feedback classifiable as good or bad can encourage us to continue with a specific action or may lead us to discontinue the same behaviour respectively Additionally we daily observe errors being committed by other people or other people receiving feedback for their behaviour We are able to infer how they feel in response to errors or feedback and whether we feel sorry for their failures and happy about their successes may depend on our empathic concern and on the relationship to the observed person At the same time we can also learn from other people s errors by adaptively modifying our own behaviour Recently a growing number of researchers in the neuroscientific community has begun to establish links between the ability to empathize with others and error feedback processing The ACC seems to be strongly involved in both error feedback processing and in affective empathic responding and positive relationships between error and feedback related ACC activity and self rated dispositional empathy have been reported Various contextual factors like the relationship between the observer and the observed person or person related characteristics like age gender and psychopathological symptoms may potentially modify this relationship In spite of these theoretical advances there are still crucial gaps in our knowledge of the different contextual factors and personality characteristics that affect performance monitoring in humans For instance it is not well understood how different empathy components might relate to different stages and different forms of error feedback processing Also the ability to engage in empathic perspective taking might be more related to observational than to active learning and empathy should become more relevant when the behaviour observed in someone else is also relevant for one s own actions One promising account in studying the relationship between person characteristics performance context and action monitoring is the investigation of these concepts across the lifespan While performance monitoring might be increasingly compromised in older individuals due to structural and functional changes in the relevant brain areas it might be partly compensated for by a heightened tendency and experience to engage in affective perspective taking Furthermore studying clinical populations may help us to disentangle the complex interdependence between performance monitoring and psychopathological symptoms Overall for the current Research Topic issue we would like to solicit original research articles reviews as well as opinion and method papers which investigate the

neurocognitive mechanisms supporting performance monitoring providing a link to contextual factors or personality traits Studies using a range of different methods behavioural imaging electrophysiological etc investigating healthy populations with or without a lifespan perspective or clinical populations are welcome and authors with different academic backgrounds and working in different disciplines are encouraged to participate in order to promote a lively and integrative debate *The Handbook of Social Psychology, 6th Edition* Daniel T.
