Development J. Craig Peery, Irene Weiss Peery, Thomas W. Draper, 2012-12-06 I acknowledge a deep debt of gratitude to my coeditors my wife Irene and my friend and colleague Tom Draper They have worked with diligence and insight to bring this work to completion They have delegated the task of writing the Preface to me As the scientific study of human development matures it is not only natural but it is necessary to reach beyond understanding the ways humans develop capacities to study the ways emerging capacities fit into the larger sphere of human undertakings Music is one of the most significant of those endeavors As I attend the several piano competitions that are on my agenda each year and see children seated at the keyboard drawing forth the magnificent sounds of Bach Chopin and Ravel I am always a little awed Surely it seems to me the piano is among the best of man s creations the creative energies of great composers are among mankind s greatest expressions and encouraging children to associate themselves seriously with both instrument and composer can be one of the great blessings to their young lives and by association to the larger society Music touches the entire range of our lifespan on a daily basis Involving children with music and music training has high market and common sense validity Parents understand intuitively that children will benefit and their lives will be enriched if they are influenced by music and music training
