approach One thing that is responsible for such liminal spaces is colonialism itself Colonialism through its multiple elements such as biopolitics racism and sexuality became a formation that looks like a home but is a site of oppression Nevertheless the author argues that liminality is not just a site of rejection By addressing a case from the formation of Indonesian nationality as well as taking a closer hermeneutical look at Indonesian literature the author contends that liminality conveys decolonial acts Integrating an interdisciplinary approach from postcolonial decolonial studies theological anthropology and pneumatology the author asserts that the Holy Spirit always dwells and moves continuously in liminal spaces It pulsates within the capillaries of every person to fight against colonial legacies With such a decolonial pulse from the presence of the Spirit one can re member and recreate what home means *Photographic subjects* Susie Protschky,2019-06-10 Photographic subjects examines photography at royal celebrations during the reign of Queens Wilhelmina 1898 1948 and Juliana 1948 80 a period spanning the zenith and fall of Dutch rule in Indonesia It is the first monograph in English on the Dutch monarchy and the Netherlands modern empire in the age of mass and amateur photography Photographs forged imperial networks negotiated relations of recognition and subjecthood between Indonesians and Dutch authorities and informed cultural modes of citizenship at a time of accelerated colonial expansion and major social change in the East Indies Indonesia This book advances methods in the uses of photographs for social and cultural history reveals the entanglement of Dutch and Indonesian histories in the twentieth century and provides a new interpretation of Queens Wilhelmina and Juliana as imperial monarchs **FM 2012: Formal Methods** Dimitra Giannakopoulou,Dominique Mery,2012-08-21 This book constitutes the refereed proceedings of the 18th International Symposium on Formal Methods FM 2012 held in Paris France in August 2012 The 28 revised full papers presented together with 7 tool papers and 3 invited talks were carefully reviewed and selected from numerous submissions The papers cover several aspects of formal methods including verification synthesis runtime monitoring testing and controller synthesis as well as novel applications of formal methods in interesting domains such as satellites autonomous vehicles and disease dynamics **Principles and Practice of Semantic Web Reasoning** Francois Bry,Nicola Henze,Jan Maluszynski,2003-11-20 The Semantic Web is a major endeavor aimed at enriching the existing Web withmetadataandprocessingmethodssoastoprovideWeb basedsystemswith advanced so calledintelligent capabilities inparticularwithcontext awareness and decision support The advanced capabilities striven for in most Semantic Web application s narios primarily call for reasoning Reasoning capabilities are o ered by exi ing Semantic Web languages such as BPEL4WS BPML ConsVISor DAML S JTP TRIPLE and others These languages however were developed mostly from functionality centered e g ontology reasoning or access validation or application centered e g Web service retrieval and composition perspectives A perspective centered on the reasoning techniques e g forward or backward chaining tableau like methods constraint reasoning etc complementing the above mentioned activities appears desirable for Semantic Web systems and plications The workshop on Principles and Practice of Semantic Web Reas ing which took place on December 8
