Second Supplemental Appropriations for Fiscal Year 1974 United States. Congress. Senate. Committee on Appropriations, 1974

God Bless America Kathleen E.R. Smith, 2021-10-21 After Pearl Harbor Tin Pan Alley songwriters rushed to write the Great American War Song an Over There for World War II The most popular songs however continued to be romantic ballads escapist tunes or novelty songs To remedy the situation the federal government created the National Wartime Music Committee an advisory group of the Office of War Information OWI which outlined proper war songs along with tips on how and what to write The music business also formed its own Music War Committee to promote war songs Neither group succeeded The OWI hoped that Tin Pan Alley could be converted from manufacturing love songs to manufacturing war songs just as automobile plants had retooled to assemble planes and tanks But the OWI failed to comprehend the large extent by which the war effort would be defined by advertisers and merchandisers Selling merchandise was the first priority of Tin Pan Alley and the OWI never swayed them from this course Kathleen E R Smith concludes the government's fears of faltering morale did not materialize Americans did not need such war songs as Goodbye Mama I'm Off To Yokohama There Are No Wings On a Foxhole or even The Sun Will Soon Be Setting On The Land Of The Rising Sun to convince them to support the war The crusade for a proper war song was misguided from the beginning and the music business then and now continues to make huge profits selling love not war songs

**High-Level Synthesis for Real-Time Digital Signal Processing** Jan Vanhoof, Karl Van Rompaey, Ivo Bolsens, Gert Goossens, Hugo De Man, 2012-12-06 High Level Synthesis for Real Time Digital Signal Processing is a comprehensive reference work for researchers and practicing ASIC design engineers It focuses on methods for compiling complex low to medium throughput DSP system and on the implementation of these methods in the CATHEDRAL II compiler The emergence of independent silicon foundries the reduced price of silicon real estate and the shortened processing turn around time bring silicon technology within reach of system houses Even for low volumes digital systems on application specific integrated circuits ASICs are becoming an economically meaningful alternative for traditional boards with analogue and digital commodity chips ASICs cover the application region where inefficiencies inherent to general purpose components cannot be tolerated However full custom handcrafted ASIC design is often not affordable in this competitive market Long design times a high development cost for low production volume the lack of silicon designers and the lack of suited design facilities are inherent difficulties to manual full custom chip design To overcome these drawbacks complex systems have to be integrated in ASICs much faster and without losing too much efficiency in silicon area and operation speed compared to handcrafted chips The gap between system design and silicon design can only be bridged by new design CAD The idea of a silicon compiler translating a behavioural system specification directly into silicon was born from the awareness that the ability to fabricate chips is indeed outrunning the ability to design them At this moment CAD is one order of magnitude behind schedule Conceptual CAD is the keyword to mastering the design complexity in ASIC design and the topic of this book

Bernstein Meets Broadway Carol J. Oja, 2014-07-25 Winner of the 2015 Music in American Culture Award from the American Musicological Society When Leonard Bernstein first arrived in New York City he was an unknown artist working with other brilliant twentysomethings notably Jerome Robbins Betty Comden and Adolph Green By the end of the 1940s these artists were world famous Their collaborations defied artistic boundaries and subtly pushed a progressive political agenda altering the landscape of musical theater ballet and nightclub comedy In Bernstein Meets Broadway Collaborative Art in a Time of War award winning author and scholar Carol J Oja examines the early days of Bernstein's career during World War II centering around the debut in 1944 of the Broadway musical On the Town and the ballet Fancy Free As a composer and conductor Bernstein experienced a meteoric rise to fame thanks in no small part to his visionary colleagues Together they focused on urban contemporary life and popular culture featuring as heroes the itinerant sailors who bore the brunt of military service They were provocative both artistically and politically In a time of race riots and Japanese internment camps Bernstein and his collaborators featured African American performers and a Japanese American ballerina staging a model of racial integration Rather than accepting traditional distinctions between high and low art Bernstein's music was wide open inspired by everything from opera and jazz to cartoons Oja shapes a wide ranging cultural history that captures a tumultuous moment in time Bernstein Meets Broadway is an indispensable work for fans of Broadway musicals dance and American performance history *Dynamics of Molecular Collisions* W. Miller, 2013-11-11 Activity in any theoretical area is usually stimulated by new experimental techniques and the resulting opportunity of measuring phenomena that were previously

inaccessible Such has been the case in the area under consideration here beginning about fifteen years ago when the possibility of studying chemical reactions in crossed molecular beams captured the imagination of physical chemists for one could imagine investigating chemical kinetics at the same level of molecular detail that had previously been possible only in spectroscopic investigations of molecular structure This created an interest among chemists in scattering theory the molecular level description of a bimolecular collision process Many other new and also powerful experimental techniques have evolved to supplement the molecular beam method and the resulting wealth of new information about chemical dynamics has generated the present intense activity in molecular collision theory During the early years when chemists were first becoming acquainted with scattering theory it was mainly a matter of reading the physics literature because scattering experiments have long been the staple of that field It was natural to apply the approximations and models that had been developed for nuclear and elementary particle physics and although some of them were useful in describing molecular collision phenomena many were not
