Hederer, 2022-12-30 Despite the dynamic development of the discipline of economics the ways in which economics is taught and how it defines its basic principles have hardly changed resulting in economics being criticised for its inability to provide relevant insights on global challenges In response this book defines new principles of economics and seeks to establish economics as the science of markets A New Principles of Economics provides an alternative conceptual framework for the study of economics integrating recent developments and research in both economics and neighbouring social sciences Adopting the structure of a standard principles text it separates the study of markets as mechanisms and markets in their wider contexts In doing so a number of new perspectives are introduced including approaching the economy as part and parcel of the Earth system directly connecting the analysis of production with an analysis of technology and thermodynamic principles explicitly treating markets as forms of social networks mediated by the institution of money and reinstating the central role of distribution in political economy analysis Drawing on the latest theories and research on the economy and including both the natural and social sciences this text provides a holistic introduction suitable for postgraduates and other

Microfoundations of Economic Growth Gunnar Eliasson, Christopher Green, Charles R. McCann, Jr., 2025-10-01

The contributors to this volume seek further understanding of the microfoundations of economic growth It focuses on three subjects that interested the great Austrian and Harvard economist Joseph A Schumpeter innovation technological change and economic growth The first part of the volume treats institutions markets and entrepreneurs without which analysis of the firm makes little or no sense The second part focuses on the firm as innovator placing heavy emphasis on the role of knowledge formation The subjects of innovation and knowledge formation are approached from three perspectives theoretical industry case studies and empirical cross section and panel data analysis In the third part of the book the action moves from the firm to the macro or economy wide level The volume s unique feature is combining institutions the innovative behavior of firms and an intuitively dynamic macroeconomic analysis all from a Schumpeterian perspective It is argued that the study of micro institutions such as firms and the evolving nature of markets are necessary ingredients to understanding macro oriented phenomena such as economic growth It is in this sense then that the book is concerned with microfoundations Contributors are Daniele Archibugi Spyros Arvanitis David B Audretsch John R Baldwin Gerard Ballot Pontus Braunerhjelm Dagobert L Brito Uwe Cantner Bo Carlsson Robert W Clower Richard Day Rinaldo Evangelista Jan Glete Horst Hanusch Heinz Hollenstein Michael D Intriligator George Johnson Joanne Johnson Aija Leiponen Staffan Laestadius Richard N Langlois Frank M Machovec Maureen McKelvey Valentina Meiciani Douglass C North Giulio Perani Andreas Pyka Fabio Rapiti Roberto Simonetti Frank Stafford Paula E Stephan Erol Taymaz Clas Wihlborg Erica R Worth and S Y Wu Gunnar K Eliasson is Professor of Industrial Economics Royal Technical Institute KTH Stockholm Christopher Green is Professor of Economics McGill University Charles R McCann Jr is Research Associate Department of Economics University of Pittsburgh

and Sustainability Ahmed Hussen, 2018-07-17 Principles of Environmental Economics and Sustainability was the first textbook to make a serious attempt to systematically integrate ecological and economic principles. It successfully introduced ecological perspectives to the study of environmental economics while maintaining the integrity of the standard economic approach. In this new edition, this notion continues to be embraced while also offering readers several further features including greater in-depth coverage of the economics of climate change, expanded reference sections, and an updated and expanded review and discussion questions section. The unique integration of both mainstream and ecological approaches which this textbook provides proves particularly illuminating in relation to the following topics: economics of climate change, environmental valuation, cost-benefit analysis, and the environment, sustainability in theory and practice, limits to growth, the role of technology, the business case for environmental sustainability. Written in a clear and accessible way, this key textbook is an excellent resource for all students of environmental economics. With study tools including learning objectives, case studies, and charts and graphs, this volume uses real-world examples to engage both students and academics within the field. This text is also accompanied by a Companion Website including resources for both students and instructors. Here you will find student study questions, interactive quizzes, and an instructor manual composed of lecture PowerPoint templates. The Principles of Economics, with Applications to Practical Problems Frank Albert Fetter, 1910 Scientific and practical principles of development of territorial communities in the conditions of decentralization of power Baldynyuk V., Dmytrenko R., Furman I., Kolesnyk T., Feniak L., Pronko L., Bereziuk S., Shevchuk H., Tokarchuk D., Yaremchuk N., Zelenchuk N., 2022-06-09 Today, in the conditions of transformation of public consciousness which is the source and driving force of changes in our society, it is the person with his needs and interests who is at the center of these changes and determines the vector of society as a whole. In the context of decentralization of power which implies more rights and consequently responsibilities to local communities, their effective management requires well-considered and sound decisions. The study of the state of rural development confirms the fact that only the integrated development of regions including communities ensure their stability and the most efficient use of resource potential. Well-considered decisions of community leaders will promote the development of entrepreneurship in the regions and the state as a whole. Balanced tax and credit policies will provide favorable conditions for the development of small and medium-sized businesses which involve a significant part of the state's citizens. In the future, the success of administrative reform will be determined by the extent to which local governments can effectively use the community's resource potential through a favorable local business environment, attract investment in regional development, create new jobs, and develop infrastructure. Therefore, the decisions made by local governments today must be adaptive and timely and must be based on the basic provisions of the strategy of community development and the region as a whole be comprehensive and systematic. However, subjectivity and incompetence in decision making by representatives of different levels of government are an active demotivator for entrepreneurship as it inhibits its

development and the development of communities respectively Such domestic scientists as Andriychuk V Zabolotny G Zakharchenko V Kaletnik G Kubay O Mazur A Mesel Veselyak V Shinkovych A Sabluk P and others determined the prerequisites for creating highly effective territorial communities 4 Theoretical developments and practical recommendations of these scientists were reflected in scientific works and directly in the implementation of administrative reform in our country Scientists have created basic approaches to creating highly effective communities and their further development However the novelty of the issue the lack of practical experience of local government leadership in the effective management of newly created communities and the new challenges of today require further research on this issue In order to increase the effectiveness of decisions at the level of territorial communities need further development and scientific substantiation of scientific and practical principles of development of territorial communities in the context of decentralization of power According to the authors under these conditions special attention should be paid to the key factors that influence effective management decisions features of building a rational organizational structure of local government prerequisites for rational use of community resource potential energy and food security issues etc This determines the relevance of this research The results of the presented research in the monograph are made within the initiative of the Department of Administrative Management and Alternative Energy Sources of Vinnytsia National Agrarian University Ensuring the development of territorial communities in terms of local government reform state registration number 0122U002096 for 2022 2024
