Bradley, 2016-11-11 In a series of landmark decisions in the early 1960s the United States Supreme Court revolutionized police procedures by imposing stricter requirements such as search warrants Miranda warnings and the exclusion of improperly obtained evidence from trial Today these innovations remain largely intact and form the basis of current American criminal procedure law even in the face of considerable criticism and an increasing conservative domination of the Court But despite the survival of the Warren Court doctrine everyone involved in the system police prosecutors crime victims academic commentators and judges including the Supreme Court Justices themselves regard the current body of Supreme Court law in this area as a failure In *The Failure of the Criminal Procedure Revolution* Craig M Bradley persuasively argues that no shift in ideology no commitment of resources and no refinement of Supreme Court jurisprudence would resolve the inadequacies of the current system These problems arose from a constitutional system that has allowed the United States to develop its rules of criminal procedure on a piecemeal case by case basis rather than through a unified code of criminal procedure as other countries have done Only the United States expects its police to follow a set of rules so cumbersome and so complex that one area of criminal procedure alone search and seizure requires a four volume treatise to explicate Bradley proposes that the United States should in keeping with the international trend regulate police procedures through a comprehensive and nationally applicable code He examines why the present system is a failure and how other countries have developed their criminal procedure law He further argues that a national code would be constitutional and outlines what its features should be how it would function and what alternative approaches are possible and practicable *The Failure of the Criminal Procedure Revolution* is a groundbreaking effort to advocate systematic and essential reform in America's court system It will be of compelling interest to students and scholars in law political science and criminology **Serious Crime and the Requirement of Respect for Human Rights in European Democracies** Council of Europe. Secretariat, International

Centre of Sociological, Penal, and Penitentiary Research and Studies, 1997-01-01 The Arab World Paris      **International Developments in Investigative Interviewing** Tom Williamson, Becky Milne, 2013-01-11 This book examines international developments in investigative interviewing It analyses the cases and other factors leading to the paradigm shift in a number of countries it considers issues that are of current interest to practitioners and academics including the continuing calls for the use of torture whether it is possible to detect deception and the contribution of investigative interviewing methods to concepts of therapeutic and restorative justice The book responds to the recognition that there are currently no international human rights instruments that relate specifically to custodial questioning whilst also offering a critical analysis of the attempts to influence investigator and prosecutor behaviour by recourse to human rights This book will be essential reading for practitioners designing and delivering investigative interviewing training programmes as well as academics and students studying international criminal justice      **Interrogations, Confessions, and Entrapment** G. Daniel Lassiter, 2013-11-11 Coerced confessions have long been a staple of TV crime dramas and have also been the subject of recent news stories The complexity of such situations however is rarely explored even in the scientific literature Now in softcover Interrogations Confessions and Entrapment remains one of the best syntheses of the scientific legal and ethical findings in this area uncovering subtle yet powerful forces that often compromise the integrity of the criminal justice system Editor G Daniel Lassiter identifies the exposure of psychological coercion as an emerging frontier in legal psychology citing its roots in the third degree approach of former times and noting that its techniques carry little scientific validity A team of psychologists criminologists and legal scholars asks and goes a long way toward answering important questions such as What forms of psychological coercion are involved in interrogation Are some people more susceptible to falsely confessing than others What are the effects of psychological manipulation on innocent suspects Are coercive tactics ever justified with minors Can jurors recognize psychological coercion and unreliable confessions Can entrapment techniques encourage people to commit crimes What steps can law enforcement take to minimize coercion Throughout this progressive volume readers will find important research based ideas for educating the courts changing policy and implementing reform from improving police interrogation skills to better methods of evaluating confession evidence For the expert witness legal consultant or student of forensic psychology this is material whose relevance will only increase with time      **Criminal Law Principles and the Enforcement of EU and National Competition Law** Marc Veenbrink, 2019-11-20 Although Article 23 5 of EU Regulation 1 2003 provides that competition law fines shall not be of a criminal law nature this has not prevented certain criminal law principles from finding their way into European Union EU competition law procedures Even more significantly the deterrent effect of competition law fines has led courts in the Netherlands and the United Kingdom UK as well as the European Court of Human Rights to conclude that competition law proceedings can lead to a criminal charge This book offers the first book length study of whether courts do indeed apply criminal law principles in competition law proceedings and if so how these

principles are adapted to the needs and characteristics of competition law Focusing on competition law developments both legislative and judicial over a period of twenty years in three jurisdictions the Netherlands the UK and the EU the author compares how each of the following criminal law principles has emerged and been interpreted in each jurisdiction s proceedings freedom from self incrimination non bis in idem burden and standard of proof legality and legal certainty and proportionality of sanctions The author offers proposals involving both legislative and judicial actions with examples of judges invoking criminal law principles to develop an appropriate level of safeguards in competition law proceedings The book shows that criminal law can provide a rich source of inspiration for the judiciary on the appropriate level of legal safeguards in competition law proceedings As such it provides an important source of information and guidance for lawyers and judges dealing with competition law matters
