- Plant and animal hybridization procedures often result in introduction of undesirable genes along with desirable ones.
- Genetic engineering overcomes this limitation.
- Genetic engineering includes:
 - Creation of recombinant DNA
 - Gene cloning
 - Gene transfer into host organism
- The introduced piece of DNA does not replicate in the host unless it is integrated with the chromosome of host.
- For getting replicated, the foreign DNA must integrate into the host DNA sequence having 'origin of replication'. When this integration occurs, foreign DNA is replicated and many copies are formed. This
