

# Basic geologic principles

## original horizontality

sediments are deposited horizontally filling in between higher areas first

## superposition

younger sediments or rocks overlie older sediments or rocks

## cross-cutting relationships

older rocks are bisected by younger rocks; intrusion (A) is younger than the older sandstone formations (B)

rocks are older than the forces that deform them: the rock (A) is older than the fold or fault (B)

Yourgrau, 2012-12-06 It is difficult to doubt that we suffer at present from the manifold aspects of an economic crisis which affects all walks of life Well men in almost every epoch in history have maintained that they were going through a crisis which was supposed to be always more grave than any preceding critical phase Very often those crises were not of an economic nature but concerned either health the political structure the opportunity of acquiring knowledge and so on I think that we would consider today that some of those claims that were made in various historical epochs were often exaggerated if viewed from a historical point of view However it seems undeniable that we at present are in the middle of a universal economic crisis which has affected almost every facet of our daily life And yet the fact that despite these adverse conditions it is still possible to gather scholars from all corners of the world to deal with often sheer theoretical and sometimes abstract pursuits is a refutation of any facile pessimism it is reassuring to all who wonder where political and social events are taking us Our salvation may well come from those acts of the mind so characteristic of the pure scientist and scholar      **National Engineering Handbook**, 1983      **Year Book ... with Announcements**, 1898      **Host Bibliographic Record for Boundwith Item Barcode 3011211333022 and Others**, 1881      **Catalogue.
