Shumskii, David Kraus, 1958 Principles of Structural Glaciology; The Petrography of Fresh-Water Ice As a Method of Glaciological Investigation. Translated From the Russian by David Kraus P. A. Shumskii, 1964 **Cryospheric Systems** Geological Society of London, 2005 The introduction of the term periglacial by Lozinski in 1909 to describe the cold climate conditions in the zone adjacent to but beyond the Pleistocene glaciers encouraged the separate development of geocryological and glaciological research Geological and geomorphological processes at the interface between glaciers and permafrost have as a result been given less attention than they warrant and the influence of one on the other has in many respects been neglected This book includes a collection of papers that emphasize glacier permafrost interactions Papers consider permafrost and its influence on glaciogenic processes glacial meltwater systems and ground ice development in proglacial and ice marginal environments In addition recent research findings are reported on paraglacial processes permafrost evolution rock glaciers the formation of ice wedge casts and periglacial slope evolution It is hoped that this book will stimulate interest in the interface between glacial and periglacial systems and encourage further collaborative research involving glaciologists and glacial geologists on the one hand and geocryologists and permafrost scientists on the other *Physics of Glaciers* W. S. B. Paterson, 1994 Explains the physical principles underlying the behaviour of glaciers and ice sheets and concludes with a chapter on the information about past climate and atmospheric composition obtainable from ice cores The past 40 years have seen major advances in most aspects of the subject the book concentrates on these It is an updated and expanded version of the second edition and is now available in the long awaited paperback format Much of the book deals with developments since the second edition was published Dr Paterson's introduction to glacier studies was with the British North Greenland Expedition in 1953 4 He emigrated to Canada in 1957 and between 1959 and 1980 studied glaciers in the Canadian Arctic and the Rocky Mountains mainly under the auspices of the Canadian Government's Polar Continental Shelf Project Since 1980 he has done consulting work and has also been a visiting scientist with the Geophysics Department at the University of Copenhagen three times and with the Australian Antarctic Division He has also given a comprehensive lecture course at the Institute of Glaciology and Geocryology in Lanzhou China He is now retired more or less and lives in British Columbia New paperback edition of a classic text Well known and respected author Updated and expanded since the second edition reflecting the advances in most aspects of the subject over the last 40 years PRINCIPLES OF STRUCTURAL GLACIOLOGY 1964.(REV.ED.OF TRANSLATIONS 1957- , Principles of Structural Glaciology P.
