Myers,Deirdre H. McMahon,2017-05-15 Focusing on everyday life in nineteenth century Britain and its imperial possessions from preparing tea to cleaning the kitchen from packing for imperial adventures to arranging home decor the essays in this collection share a common focus on materiality the nitty gritty elements that helped give shape and meaning to British self definition during the period Each essay demonstrates how preoccupations with common household goods and habits fueled contemporary debates about cultural institutions ranging from personal matters of marriage and family to more overtly political issues of empire building While existing scholarship on material culture in the nineteenth century has centered on artifacts in museums and galleries this collection brings together disparate fields history of design landscape history childhood studies and feminist and postcolonial literary studies to focus on ordinary objects and practices with specific attention to how Britons of all classes established the tenets of domesticity as central to individual happiness national security and imperial hegemony Code of Federal Regulations ,2003 *The Code of Federal Regulations of the United States of America* ,2003 The Code of Federal Regulations is the codification of the general and permanent rules published in the Federal Register by the executive departments and agencies of the Federal Government **Annual Report of the Commissioner of Patents** United States. series fills a void in practitioner development and well being The books take a reflective step back from the tick box target driven and increasingly regulated world of 21st century health practice and invite us to revisit what health and health practice actually are Building carefully on the science and philosophy of health each book addresses the messy complex and often chaotic world of real life health practice and offers an ancient but now almost revolutionary understanding for students and experienced practitioners alike that health practice is a fundamentally creative and compassionate activity The series as a whole helps practitioners to redefine and recreate their daily practice in ways that are healthier for both patients and practitioners The books provide a welcome antidote to demoralisation and burn out amongst practitioners reversing cynicism and reviving our feeling of pride in and our understanding of health practice By observing practice life through different lenses they encourage the development of efficiency effectiveness and above all satisfaction The fifth book in this series The Integrated Practitioner Food for Thought written for readers who prefer a more academic and reflective understanding of the themes of books 1 4
