Private Tutoring Across the Mediterranean Mark Bray, André E. Mazawi, Ronald G. Sultana, 2013-09-03 Private tutoring supplementary out of school instruction offered at a fee to individuals or groups represents a substantial household expenditure even in systems that claim to have free public education It plays out across alongside and even within some school systems Emerging as a shadow education private tutoring now operates as a system and industry crossing national regional and social class boundaries Private tutoring is provided through different modes of delivery including the internet Policy makers parents teachers trade unions corporations community associations and students are implicated in the private tutoring industry The debates over private tutoring are therefore part of the larger struggles over the ends of education in just and equitable societies The authors in this volume address diverse national settings of private tutoring across the Mediterranean and examine its political economic social and cultural underpinnings They draw on a range of conceptual frameworks and deploy a variety of research methods to problematize the multifaceted relationships between tutoring learning and equity The volume captures a multiplicity of voices and focuses on some of the central challenges facing education in pluralistic societies
