Rational Expectations and the New Macroeconomics Patrick Minford, David Peel, 1986 *Rational Expectations and the New Macroeconomics* Patrick Minford, D. Peel, 1983 Rational Expectations Macroeconomics Patrick Minford, 1992

Rational Expectations Macroeconomics is the second edition of Rational Expectations and the New Macroeconomics by Patrick Minford and David Peel. Under the sole authorship of Professor Minford, this new edition represents a practical introduction to the principles and applications of rational expectations RE methods in macroeconomics for third year undergraduates and postgraduates. The author sets out to provide a basic working knowledge of the Rational Expectations Hypothesis REH by demonstrating in full various methods for solving RE models. The book then deals with policies and issues frequently encountered when applying these models, including stabilization policy, fiscal policy, the political economy of democracy, and the Phillips curve. Finally, the author turns to methods of testing the REH. By the end of the book, students should be in a position to apply RE models to whatever economy they are concerned with. Professor Minford has updated the text extensively and included new chapters on representative agent models increasingly used in applied forecasting and policy analysis, and modelling the open economy. In the decade since the first edition of this classic text was written, the economics profession's respect for the REH has only increased. The author's introductory and concluding chapters place the REH research programme in its historical context, assess the current state of the debate, and look ahead to future research in this important subject.

Macroeconomics and New Macroeconomics Bernhard Felderer, Stefan Homburg, 1992-08-21. This book gives a comprehensive account of traditional and more recent developments in macroeconomic theory. It is written primarily for students at the intermediate level. The book differs from the customary expositions in that the authors do not discuss topic by topic but orthodoxy by orthodoxy. Thus the main approaches like Classical theory, Keynesian theory, theory of portfolio selection, Monetarism, Rational Expectations theory, and Neokeynesian disequilibrium theory are presented in historical order. Each of these approaches is substantiated and criticized in a self-contained chapter, and the authors have taken great pains to bring out the relations and differences between them. A mathematical appendix reviews those mathematical facts which are especially important for macroeconomic models and serves to make the text easy to read.

Rational Expectations in

Macroeconomic Models P. Fisher, 2013-04-17. It is commonly believed that macroeconomic models are not useful for policy analysis because they do not take proper account of agents' expectations. Over the last decade, mainstream macroeconomic models in the UK and elsewhere have taken on board the Rational Expectations Revolution by explicitly incorporating expectations of the future. In principle, one can perform the same technical exercises on a forward expectations model as on a conventional model, and more. Rational Expectations in Macroeconomic Models deals with the numerical methods necessary to carry out policy analysis and forecasting with these models. These methods are often passed on by word of mouth or

confined to obscure journals Rational Expectations in Macroeconomic Models brings them together with applications which are interesting in their own right There is no comparable textbook in the literature The specific subjects include i solving for model consistent expectations ii the choice of terminal condition and time horizon iii experimental design i e the effect of temporary vs permanent anticipated vs unanticipated shocks deterministic vs stochastic dynamic vs static simulation iv the role of exchange rate v optimal control and inflation output tradeoffs The models used are those of the Liverpool Research Group in Macroeconomics the London Business School and the National Institute of Economic and Social Research
