Hawkesworth, 1988-01-01 What is the relation between policy analysis and political decision making Is the policy analyst a handmaiden of democracy or an agent of technocracy Do recent debates in the policy literature illuminate or obfuscate these issues What analytic techniques are available to resolve such questions This study considers the nature of policy inquiry in detail and explores norms and theoretical assumptions seldom subjected to scrutiny The author demonstrates how conceptual presuppositions and methodological commitments have constricted our understanding of political problems and so hindered prescriptions for viable policy options Proposed here is an alternative framework for policy inquiry that is both pragmatic and sophisticated Hawkesworth considers the implications of this alternative model in a series of case studies that addresses important foreign and domestic policy issues The epistemic and practical criticisms presented in this study provide new direction for the field of policy studies

Measuring the Performance of Public Services Michael

Pidd, 2012-02-02 Measuring the performance of public agencies and programmes is essential to ensure that citizens enjoy quality services and that governments can be sure that taxpayers receive value for money. As such, good performance measurement is a crucial component of improvement and planning, monitoring and control, comparison and benchmarking, and also ensures democratic accountability. This book shows how the principles, uses, and practice of performance measurement for public services differ from those in for-profit organisations, being based on the need to add public value rather than profit. It describes methods and approaches for measuring performance through time for constructing and using scorecards, composite indicators, the use of league tables and rankings, and argues that data envelopment analysis is a useful tool when thinking about performance. This demonstrates the importance of allowing for the multidimensional nature of performance, as well as the need to base measurement on a sound technical footing. *Ethics and Economics* Mark D. White, Irene van Staveren, 2013-09-13 Since the days of Adam Smith, ethics and economics have been closely intertwined and were nominally separated only with the advent of neoclassical economics in the beginning of the last century. This book features eleven essays by leading scholars in economics and philosophy who argue for a renewal of the bond between the two disciplines. Several of the contributors argue that the ethical content of economics and moral status of the market have been misunderstood, for better and for worse. Some recommend changes in the way that individual economic choice is modelled in order to incorporate ethical as well as self-interested motivations. Finally, others question the way that societies assess economic policies that affect the welfare and dignity of their constituents. A wide range of philosophical perspectives is offered, drawing from the classic writings of Adam Smith, Immanuel Kant, and the ancient Stoics to that of current scholars such as Amartya Sen, Elizabeth Anderson, and Christine Korsgaard. This book provides a comprehensive introduction to the cutting edge of interdisciplinary research between ethics and economics and is sure to be an important resource for scholars in both fields. This book was published as a combination of the special issues *Review of Political Economy* and *Review of Social Economy*. **The Social Construction of Public Administration** Jong S. Jun, 2012-02-01 In this conceptual guided tour of contemporary public administration, Jong S. Jun challenges the limitations of the discipline, which he argues make it inadequate for understanding today's complex human phenomena. Drawing on examples and case studies from both Eastern and Western countries, he emphasizes critical and interpretive perspectives as a counterforce to the instrumental technical rationality that reduces the field to structural and functionalist views of management. He also emphasizes the idea of democratic social construction to transcend the field's reliance on conventional pluralist politics. Jun stresses that public administrators and institutions must create opportunities for sharing and learning among organizational members and must facilitate interactive processes between public administrators and citizens so that the latter can voice their problems and opinions. The future role of public administrators will be to transcend the limitations of the management and governing of modern public administration and to explore ways of constructing socially meaningful alternatives through communicative

action and the participation of citizens **Decisions, Technology and Organization** Audley Genus,2017-11-22 This title was first published in 2000 This text analyzes the problems of managing large scale technology projects It addresses the contrast between projects hoped for benefits and the optimism with which they are promoted and the high human economic or environmental costs of their operation The book is multi disciplinary in its approach and an integration of different levels of analysis It contains case studies that are analyzed in terms of the literatures on decision theory public administration and strategic and project management What Works? This book provides a down to earth account of the virtues and failures of environmental risk assessment. The assessment process involves politics, technology and issues of social choice. An unstructured grouping that often presents contradictory and confusing standpoints. The virtues of science and the scientific method are extolled on the one hand and condemned on the other. No viable solutions are offered and there is no real understanding of the issues being discussed. This chaotic situation is analyzed using cultural theory to offer a powerful and groundbreaking account of such topics as technological decision making, politics, energy, engineering and technology as a whole.
