5. Group members possess and demonstrate belief and respect for their profession and discipline; they believe in, even love their area and communicate this to others.
6. Members of the group pay attention to social maintenance, trying to make their school, department, or faculty a 'good place' (MacBeath, 2006); members care for each other and their students as people and social and professional relationships are important.

**Collective Rationality and Collective Reasoning**

Christopher McMahon,2001-08-06 This book examines the issue of rational cooperation especially cooperation between people with conflicting moral commitments The first part considers how the two main aspects of cooperation the choice by a group of a particular cooperative scheme and the decision by each member to contribute to that scheme can be understood as guided by reason The second part explores how the activity of reasoning itself can take a cooperative form The book is distinctive in offering an account of what people can accomplish by reasoning together of the role of deliberation in democratic decision making and of the negotiation of the proper use of concepts Presenting for the first time a detailed analysis of the general problem of cooperation and collective reasoning between people with different moral commitments this book will be of particular interest to philosophers of the social sciences and to students in political science sociology and economics Cambridge Press

**Philosophy of Science** Erik J Olsson, Sebastian Enqvist, 2010-10-27 Belief revision theory and philosophy of science both aspire to shed light on the dynamics of knowledge on how our view of the world changes typically in the light of new evidence Yet these two areas of research have long seemed strangely detached from each other as witnessed by the small number of cross references and researchers working in both domains One may speculate as to what has brought about this surprising and perhaps unfortunate state of affairs One factor may be that while belief revision theory has traditionally been pursued in a bottom up manner focusing on the endeavors of single inquirers philosophers of science inspired by logical empiricism have tended to be more interested in science as a multi agent or agent independent phenomenon

**Rationality, Humility, and Spirituality in Christian Life** Dennis Hiebert, 2020-02-27 As Euro American culture turns resolutely away from religiosity toward spirituality and becomes increasingly post Christian the ordinary everyday practice of Christian life is ever more questioned and in need of scrutiny In this interdisciplinary analysis Christians are first called to comprehend the excessive rationality that modernity has built into both the cognitive and organizational structure of contemporary Christian life They are then summoned to personify an authentic attitude of humility and in particular the virtue of intellectual humility that is most challenged and tested by religious convictions Going forward Christians are subsequently invited to live their faith more as an internally differentiated and open spirituality rather than an externally determined and regulated religiosity When we exhaust our rationality and are confronted with its limitations we are humbled by our finitude and animated by our spirituality **Rationality and Commitment** Fabienne Peter, Hans Bernhard

*The Epistemology of Group Disagreement* Fernando Broncano-Berrocal, J. Adam Carter, 2020-11-23 This book brings together philosophers to investigate the nature and normativity of group disagreement Debates in the epistemology of disagreement have mainly been concerned with idealized cases of peer disagreement between individuals However most real life disagreements are complex and often take place within and between groups Ascribing views beliefs and judgments to groups is a common phenomenon that is well researched in the literature on the ontology and epistemology of groups The chapters in this volume seek to connect these literatures and to explore both intra and inter group disagreements They apply their discussions to a range of political religious social and scientific issues The Epistemology of Group Disagreement is an important resource for students and scholars working on social and applied epistemology disagreement and topics at the intersection of epistemology ethics and politics

*La philosophie contemporaine / Contemporary philosophy* Guttorm Fløistad, 2012-12-06 The present publication is a continuation of two earlier series of chronicles Philosophy in the Mid Century Firenze 1958 59 and Contemporary Philosophy Firenze 1968 edited by Raymond Klibansky As with the earlier series the present chronicles purport to give a survey of significant trends in contemporary philosophical discussion The time space covered by the present series is approximately 1966 1978 The need for such surveys has I believe increased rather than decreased over the last years The philosophical scene appears for various reasons more complex than ever before The continuing process of specialization in most branches the emergence of new schools of thought particularly in philosophical logic and the philosophy of language the convergence of interest though not necessarily of opinion of different traditions upon certain problems and the increasing attention being paid to the history of philosophy in discussions of contemporary problems are the most important contributory factors Surveys of the present kind are a valuable source of knowledge of this complexity and may as such be of assistance in renewing the understanding of one's own philosophical problems The surveys it is to be hoped may also help to strengthen the Socratic element of modern philosophy the dialogue or

Inquirer offers an original account of the rational response to peer disagreement in terms of a duty to double check one's initial conclusions and a permission to retain an inquiry directing attitude of hypothesis toward those conclusions. This allows for a vindication of the competing rational pressures to revise and retain one's original views that give rise to the distinctive puzzle of peer disagreement. Michele Palmira conceives of peer disagreement as higher order evidence that generates a genuine epistemic duty to double check one's initial conclusions. His inquiry theoretic approach contrasts with existing approaches that characterise the rational response to higher order evidence in terms of doxastic duties to revise or retain one's beliefs. He develops a pluralist view of the aims of inquiry, offers a definition of double checking and defends the genuine epistemic nature of the duty to double check. Palmira shows that while the duty to double check is incompatible with rational belief retention, it is compatible with the retention of an attitude of hypothesis whereby two peers retain their cognitive leanings toward conflicting answers to the question at hand. He also contends that hypothesis is a *sui generis* doxastic attitude that does not reduce to suspended judgement or credences. He develops a non-evidentialist and consequentialist view of the central epistemic norm governing rational hypothesis and argues that the account on offer compares favourably with recent views that also appeal to doxastic attitudes other than belief and suspended judgement.

**Bursting Our Epistemic Bubbles** Heather Rabenberg, 2025-05-30 Due in large part to the increased personalization of various aspects of the Internet, many people have become insulated from the epistemic influence of people with views different from their own. This book develops a social epistemic framework that expands our understanding of epistemic normativity such that we can get a clearer view of phenomena like epistemic bubbles and echo chambers. The book begins by arguing that as members of epistemic communities, we are subject to epistemic norms and values that cannot be realized by a single individual. Attention to these social epistemic values is crucial to getting to the core of the problems that plague our current social and political epistemic world. After laying out a thoroughly social epistemic framework, the author uses it to argue that there are epistemic norms specifically governing inquiry and trust. These two concepts have often been relegated to the practical realm rather than the epistemic. This is a mistake because understanding how we ought to trust and inquire is central to thinking about how to fix many of our social epistemic problems. The author argues that assuming we must choose between trust and inquiry is often the source of our social epistemic problems. Inquiring while trusting is a crucial epistemic balancing act which anchors us in epistemic communities and assists us in the pursuit of knowing with others. *Bursting Our Epistemic Bubbles* will be of interest to scholars and advanced students working in social and political epistemology.

*Knowledge, Beliefs and Economics* R. Arena, 2006-01-01 The contributors to this book also suggest the need for a more integrated perspective on the meaning as well as the role of knowledge and beliefs in economics in the future. Possible lines of future research such as the extension of the concept of rationality in economics or the focus on cognitive processes in economic action are discussed.
