**Representing, Modeling, and Visualizing the Natural Environment** Nick Mount, Gemma Harvey, Paul Aplin, Gary Priestnall, 2008-12-22 The explosion of public interest in the natural environment can to a large extent be attributed to greater public awareness of the impacts of global warming and climate change This has led to increased research interest and funding directed at studies of issues affecting sensitive natural environments Not surprisingly much of this work has re

*Representing Space in Cognition* Thora Tenbrink, Jan M. Wiener, Christophe Claramunt, 2013-10-31 This book considers how people talk about their environment find their way in new surroundings and plan routes Part I explores the empirical insights gained from research in the cognitive underpinnings of spatial representation in language Part II proposes

solutions for capturing such insights formally and in Part III authors discuss how theory is put into practice through spatial assistance systems These three perspectives stem from research disciplines which deal with the spatial domain in different ways and which often remain separate In this book they are combined so as to highlight both the state of the art in the field and the benefit of building bridges between methodologies and disciplines Finding our way and planning routes is relevant to us all this book ultimately helps improve our everyday lives Representing Landscapes: Hybrid Nadia Amoroso,2016-05-05 Hybrid and mixed media create a huge variety of diagramming and drawing options for landscape representation From Photoshop mixed with digital maps to hand drawings overlaid with photos and modelling combined with sketches the possibilities are endless In this book Amoroso curates over 20 leading voices from around the world to showcase the best in contemporary hybrid design With over 200 colour images from talented landscape architecture students this book will explore the options methods and choices to show the innovative approaches that are offered to students and practitioners of landscape architecture With worked examples in the chapters and downloadable images suitable for class use this is an essential book for visual communication and design studios Representing Landscapes Nadia Amoroso,Martin Holland,2022-03-23 This volume provides an in depth historical overview of graphic and visual communication styles techniques and outputs from key landscape architects over the past century Representing Landscapes One Hundred Years of Visual Communication offers a detailed account of how past and present landscape architects and practitioners have harnessed the power of visualization to frame and situate their designs within the larger cultural social ecological and political milieux The fifth book in the Representing Landscapes series the presentations contained within each of the 25 chapters of this work are not merely drawings and illustrations but are rather graphic touchstones whose past and current influence shapes how landscape architects think and operate within the profession This collected volume of essays gathers notable landscape historians scholars and designers to offer their insights on how the landscape has been presented and charts the development and use of new technologies and contemporary theory to reveal the conceptual power of the living medium of the larger landscape Richly detailed with over 220 colour and black and white illustrations from some of the discipline s best known landscape architects and designers this work is a must have for those studying contemporary landscape design or those fascinated by the profession s history Representing Landscapes: Digital Nadia Amoroso,2015-02-27 Most landscape architectural designs now include some form of digital representation but there is much more scope for creativity beyond the standard Photoshop montages In this new book on representing landscapes Nadia Amoroso brings together contributions from some of the leading landscape departments in the world to explore the variety in digital illustration methods In each chapter leading lecturers professors and practitioners in the field of landscape architecture explain a specific digital approach with the use of images from their department to show how each technique can be used in inspirational examples Throughout the book over 200 colour images cover the spectrum of digital

Sengupta, 2011-12-09 This graduate textbook presents the basics of representation theory for finite groups from the point of view of semisimple algebras and modules over them The presentation interweaves insights from specific examples with development of general and powerful tools based on the notion of semisimplicity The elegant ideas of commutant duality are introduced along with an introduction to representations of unitary groups The text progresses systematically and the presentation is friendly and inviting Central concepts are revisited and explored from multiple viewpoints Exercises at the end of the chapter help reinforce the material Representing Finite Groups A Semisimple Introduction would serve as a textbook for graduate and some advanced undergraduate courses in mathematics Prerequisites include acquaintance with elementary group theory and some familiarity with rings and modules A final chapter presents a self contained account of notions and results in algebra that are used Researchers in mathematics and mathematical physics will also find this book useful A separate solutions manual is available for instructors Mapping Israel, Mapping Palestine Jess Bier, 2017-06-30 Digital practices in social and political landscapes Why two researchers can look at the same feature and see different things Maps are widely believed to be objective and data rich computer made maps are iconic examples of digital knowledge It is often claimed that digital maps and rational boundaries can solve political conflict But in Mapping Israel Mapping Palestine Jess Bier challenges the view that digital maps are universal and value free She examines the ways that maps are made in Palestine and Israel to show how social and political landscapes shape the practice of science and technology How can two scientific cartographers look at the same geographic feature and see fundamentally different things In part Bier argues because knowledge about the Israeli military occupation is shaped by the occupation itself Ongoing injustices including checkpoints roadblocks and summary arrests mean that Palestinian and Israeli cartographers have different experiences of the landscape Palestinian forms of empirical knowledge including maps continue to be discounted Bier examines three representative cases of population governance and urban maps She analyzes Israeli population maps from 1967 to 1995 when Palestinian areas were left blank Palestinian state maps of the late 1990s and early 2000s which were influenced by Israeli raids on Palestinian offices and the legacy of British colonial maps and urban maps after the Second Intifada which show how segregated observers produce dramatically different maps of the same area The geographic production of knowledge including what and who are considered scientifically legitimate can change across space and time Bier argues that greater attention to these changes and to related issues of power will open up more heterogeneous ways of engaging
