Reactions To Critical Life Events:

Reactions to Critical Life Events Marita Rohr Inglehart, 1991-07-30 People's reactions to critical life events is a topic that has stimulated basic as well as applied research by psychologists from a number of different subdisciplines. In this unique work Marita Inglehart synthesizes previous research in the field and proposes a unique way of thinking about reactions to critical life events that has important implications for much of contemporary social psychological research. The new generalized principle of cognitive consistency which integrates elements of cognitive consistency theory and attribution theory offers several significant advantages over existing theories of reactions to critical life events particularly in terms of the contribution to our understanding of the importance of specific variables such as social support and individual differences. The study is divided into three sections and begins by reviewing and evaluating the current status of theoretical research on reactions to critical life events. The various theoretical contributions are judged against their ability to answer questions regarding the energizing and structuring components of these reactions. Part II introduces the generalized principle of cognitive consistency and explores its applications to research on reactions to critical life events. The third set of chapters demonstrates the way in which the new theory can be used to reinterpret research findings centered around the importance of moderator variables in predicting reactions to critical life events. Inglehart concludes by discussing the role of life philosophies in general and examining the practical implications for counseling of the generalized principle of cognitive consistency. An important contribution to the social psychological literature this volume will help both to bridge the gap between basic and applied research and enhance communication between the various subdisciplines involved in investigating reactions to critical life events. **Handbook of Psychology: Health psychology** Irving B. Weiner, Donald K.

Freedheim, 2003 Includes established theories and cutting edge developments. Presents the work of an international group of experts. Presents the nature, origin, implications, and future course of major unresolved issues in the area. **Contemporary Pioneers in Human Learning and Development** Héfer Bembenuity, 2022-03-01 This volume traces the socialization process, professional development, career paths, and theory and research of contemporary pioneers in education and psychology. This volume contains interviews with leading scholars who are at the vanguard of teaching and learning. They shared how their childhood development influenced their theoretical paths and research endeavors and revealed their thoughts, beliefs, and experiences that made them who they are today. These scholars responded to questions pertaining to their childhood, initial interest in education and psychology, role models, research interests, and major findings, future directions of their research, educational implications derived from their research, and perception of their legacy. They are real people who have had experiences like anybody else but found homes and teachers who supported them. While in college they found educators who mentored them. Readers will find that this volume offers them an opportunity to learn the background of contemporary pioneers in education and psychology, provides valuable sources where they can learn about how major

theories developed and where they are moving and reveals the personal anecdotes that influenced the conceptualization of contemporary theories and research Educators and students will find that this book provides hope and a rejuvenated enthusiasm about the status of education and psychology and that they too can be leaders in their own ways **The Self and Society in Aging Processes** Carol D. Ryff, PhD, Victor W. Marshall, PhD, 1999-06-23 This volume focuses on the experience of growing old as it is linked to societal factors Ryff and Marshall construct this macro view of aging in society by bridging disciplines and bringing together contributors from all the social sciences The book is organized into three sections theoretical perspectives socioeconomic structures and contexts of self and society Leading psychologists anthropologists gerontologists and sociologists present theoretical and empirical advances that forge links between the individual and the social aspects of aging It is must reading for researchers in all gerontologic specialties and a valuable text for graduate courses in human development psychology of aging and other social aspects of aging Trauma Sequelae Andreas Maercker, 2022-04-26 Experiences of violence sexual abuse accidents disasters or deaths of close relatives or friends and other extreme situations can lead to trauma related disorders Since 2018 the World Health Organization has distinguished four such disorders in its classification list classic and complex post traumatic stress disorder as well as prolonged grief disorder and adjustment disorder These long term effects are described in detail in the book In recent years a variety of interventions have been developed to effectively treat these disorders This 5th edition has been largely reorganized due to the groundbreaking innovations in which the editor played a decisive role on an international level Among the innovations are the chapters on Complex post traumatic stress disorder Childhood violence and its consequences Low threshold and innovative interventions Methods of cognitivebehavioral therapy Psychodynamic approaches The handbook on psychological trauma related disorders Life Crises and Experiences of Loss in Adulthood Leo Montada, Sigrun-Heide Filipp, Melvin J. Spiritual practices or awakenings have an impact on brain mind and personality These changes are being scientifically predicted and proven For example studies show Buddhist priests and Franciscan nuns at the peak of religious feelings show a functional change in the lobes of their brain Similar processes have been found in people with epilepsy which Hippocrates called the sacred disease New research is showing that not only does a person s brain activity change in particular areas while that person is experiencing religious epiphany but such events can be created for some people even self professed atheists by stimulating various parts of the brain In this far reaching and novel set experts from across the nation and around the world present evolutionary neuroscientific and psychological approaches to explaining and exploring religion including the newest findings and evidence that have spurred the fledgling field of neurotheology It is not the goal of neurotheology to prove or disprove the existence of God but to understand the biology of spiritual experiences Such experiences seem to exist outside time and space caused by the brain for some reason losing its perception of a boundary between physical body and outside world and could help explain other intangible events such as altered states of consciousness possessions alien visitations near death experiences and out of body events Understanding them as well as how and why these abilities evolved in the brain could also help us understand how religion contributes to survival of the human race Eminent contributors to this set help us answer questions including How does religion better our brain function What is the difference between a religious person and a terrorist who kills in the name of religion Is there one site or function in the brain necessary for religious experience Human Development from Early Childhood to Early Adulthood Wolfgang Schneider,Merry Bullock,2010-10-18 Data generated from longitudinal studies allow researchers to better understand how context and

experience interact with stable characteristics of the developing person over time This book summarizes a landmark longitudinal study of 200 children from the ages of 3 to 23 The Munich Longitudinal Study on the Ontogenesis of Individual Competencies LOGIC examined the development of individual differences over time and whether it is possible to predict later competencies from earlier ones Offering a snapshot of theory and data on personality social motor moral and cognitive development the contributors help us understand which individual differences can and cannot be altered through schooling and other experiences and how differences seen in the earliest stages are later reflected in adulthood The results provide valuable insight into the strengths and limitations of early prediction of individual differences This is the second volume to review the wealth of data generated by the study The first volume Weinert and Schneider 1999 traced development from ages 3 to 12 This volume continues the story integrating these early findings with the results from adolescence and young adulthood Each of the chapters provides an overview of current research and addresses how the data help us understand the presence and developmental effects of individual differences Among the findings are results on The relative stability of cognitive competencies The long term effects of shyness and aggression The relation between moral understanding and action and The role of education in the development or maintenance of performance differences Intended for researchers and advanced students in developmental educational personality social and cognitive psychology this book will also appeal to educators especially the chapters that focus on literacy development educational context scientific reasoning and mathematical reasoning

Self-related Cognitions in Anxiety and Motivation R. Schwarzer, 2013-08-21 Research on anxiety and motivation has witnessed substantial progress in recent years in developing innovative perspectives and applying advanced psychometric tools The most important contributions were made by cognitively oriented psychologists who have related the information processing view to anxiety and motivation The organized knowledge about oneself and the storage processing and retrieval of information concerned with one's attitude and behavior strongly influences the way people think feel and act Therefore self-referent thoughts play a major role as a cognitive component in anxiety and motivation It is the idea of this book to integrate different lines of thinking in the field of anxiety and motivation by relating both topics to self-focused attention self-concept and self-evaluation in achievement contexts as well as in social contexts

Dictionary of Psychology Mike Cardwell, 2014-01-27 Psychology as a subject is notorious for its often confusing use of language particularly as many words that have one meaning in common everyday language have quite a different meaning when used as specialist terms in psychology Dictionary of Psychology is an A Z guide to key terms in the subject Each entry begins with a clear one sentence definition and is followed by explanation and examples Entries are developed in line with the relative importance of the topic covered For many of the more central topic areas further commentary is included to assist the reader in acquiring a critical understanding of the topic in question Entries are carefully cross referenced and the format makes the Dictionary of Psychology very easy to use

Research with the Locus of Control Construct Herbert M. Lefcourt, 2013-09-03 Research with the Locus of Control Construct Volume 1 Assessment Methods was created to serve two purposes The first is to fill the researcher s need for information about the application of appropriate locus of control scales to their particular purposes or samples It presents a variety of locus of control scales and describes the relevant research and applications The second purpose for this book involves the general field of personality psychology Often personality constructs emerge occupy center

stage for the better part of a decade and then almost silently disappear from view By contrast the locus of control construct has occupied a central position in personality research for a decade The contributions to this volume represent some of the innovations that extend the utility of the locus of control construct to different areas of concern It illustrates a simple principle that a construct continues to be viable only as long as it continues to inspire innovations if it remains static the construct will eventually disappear This book is intended to provide information regarding new developments and to encourage new questions and applications that may allow the locus of control construct to outlive the brief life span that is common among personality constructs It is assumed that the reader is already familiar with the basic literature on locus of control research

Development of Person-context Relations Thomas A. Kindermann, Jaan Valsiner, 2013-06-17

Traditionally developmental psychology has its focus on individuals Developmentalists aim to describe regularities in individuals change and development across time to explain the processes and mechanisms that are involved in producing change and regularity and eventually to design strategies for optimization and modification of developmental pathways Although the role of contexts has always been of central concern for these purposes it is nevertheless quite surprising to note that compared to the effort devoted to individuals relatively little attention has been paid to the study of the nature and organization of their contexts This volume is an exploration of the idea that how we describe and explain human development will be closely tied to our understanding of what contexts are how individuals and contexts become influential for one another what contexts do to and with individuals and how contexts and their influences change themselves across time A major theme is whether the traditional dichotomy between individuals and their contexts may be artificial perhaps culturally biased and after psychologists have adhered to it for about a century may have become an impediment to increasing our understanding of developmental processes With this volume the editors contribute a serious consideration of development and systematic change to emerging models of person context relations and provide suggestions about how it may be possible to incorporate these notions in developmental research and theorizing
