Nationalism and Self-Government Scott L. Greer, 2012-02-01 Scotland and Catalonia both ancient nations with strong nationalisms within larger states are exemplars of the management of ethnic conflict in multinational democracies and of global trends toward regional government Focusing on these two countries Scott L Greer explores why nationalist mobilization arose when it did and why it stopped at autonomy rather than statehood He challenges the notion that national identity or institutional design explains their relative success as stable multinational democracies and argues that the key is their strong regional societies and their regional organizations preferences for autonomy and environmental stability

The Case for Multinational Federalism Alain-G. Gagnon, 2009-09-10 Throughout the world liberal democracies are grappling with increasing claims made in the name of minority national socio cultural and ethno cultural identities that seek greater recognition in the institutions of the nation state This work inserts itself into debates centred on diversity through a normative and empirical analytical assessment of the political sociology of multinational democracies The main thread of the arguments put forward is that federalism in both its institutional manifestations and its sociological properties constitutes a promising avenue for the management of cohabitating political communities and for the affirmation of collective identities within states that are constituted by two or more nations Author Alain G Gagnon develops his argument by contending that the federal principle allows for the exercise of advanced democratic practices within nation states permitting internal nations to openly affirm the bases of adherence to a common political project At the same time he argues that federalism nourishes the development of distinct collective traditions that serve to benefit all parties to the association It is concluded that only in such a scenario will the elusive pursuit of an authentic and shared loyalty underpin multinational states and ensure their stability in contrast to the instrumental sentiments of belonging engendered by procedural territorial federal models Focusing primarily on the Canadian case this book also draws inspiration from other federal states Belgium the United States as well as federalizing states Spain the United Kingdom It will be of keen interest to students and scholars of Politics European Studies along with Nationalism and Federalism Studies

Comparative Federalism and Intergovernmental Agreements Jeffrey Parker, 2014-08-27 Intergovernmental agreements are an important instrument in federal systems establishing new social programs regulating agricultural practices and even changing constitutions Despite their importance there have only been limited attempts to understand agreements in a comparative context or to provide a theoretical framework for their study This book addresses both of these deficiencies by comparing the use of agreements in six federations Australia Canada Germany South Africa Switzerland and the United States and considering why certain federations form more agreements than others Parker analyzes the data using an institutional framework that considers the effects of seven variables including the constitutional division of powers the system of intergovernmental transfers the size of the welfare state and the nature of governing institutions In addition the study provides the first ever comparative database of national intergovernmental agreements a new resource for future research This book will be of interest to students and scholars of Political Science Federalism Government Political
