Medicina, ideología e historia en España (siglos XVI-XXI) Ricardo Campos Marín, 2007 En el terreno que nos ocupa el de la medicina parece evidente que los aspectos ideológicos se han ido disolviendo en una creciente tecnificación de la práctica de la misma donde la relación entre el médico y el paciente está mediatizada por un entramado científico técnico abrumador A su vez las campañas sanitarias centradas en los conceptos de riesgo y en los estilos de vida saludables se han vaciado aparentemente pero solo aparentemente de cualquier atisbo ideológico utilizando la estadística como instrumento objetivo que avala científicamente las actuaciones propuestas A esto hay que añadir la internalización por parte de los ciudadanos de la salud como un valor que estructura nuestras vidas Precisamente esa asunción de la salud como un valor aceptado por la población contribuye de manera importante a sustraer a la medicina de sus implicaciones ideológicas El conjunto de trabajos que forman este volumen indaga en las relaciones entre

medicina ideológica e historia mostrando cómo se han ido configurando en el tiempo los conceptos de salud y enfermedad y cómo ambos no han sido nunca elementos neutrales También se explora el papel de la medicina en la construcción de identidades y en la catalogación de los individuos cuestiones íntimamente ligadas a la ideológica Por último los diferentes proyectos y concepciones de la medicina y salud están presentes en varios ensayos de este volumen El origen del mismo está en el XIII Congreso de la Sociedad Española de Historia de la Medicina celebrado en Madrid entre los días 15 y 17 de septiembre de 2005 en la Facultad de Medicina de la Universidad Complutense de Madrid y en el Consejo Superior de Investigaciones Científicas bajo el lema La condición histórica de la medicina El libro pues es representativo del amplio panorama por el que se mueve la historiografía de la medicina en nuestro país en este comienzo de siglo
