Housing is a fundamental need and universal part of human living that shapes our lives in profound ways that go far beyond basic sheltering. Where we live can determine our self image, social status, health and safety, quality of public services, access to jobs and transportation options. But the reality for many in America is that housing choices are constrained, costs are unaffordable, discriminatory practices remain, and physical features do not align with needs. We have made a national commitment to decent housing for all, yet this promise remains unrealized. *Housing in America* provides a broad overview of the field of housing. The evolution of housing norms and policy is explored in a historical context while underscoring the human and cultural dimensions of housing. Program choices, specific topics covered include why housing matters, housing and culture, housing frameworks and political ideologies, housing and opportunities, housing and the economy, housing discrimination, housing affordability, rental housing, and housing and climate change. Readers will gain an understanding of the basic debates within the field of housing, consider the motivations and performance of various interventions, and critically examine persistent patterns of racial and class inequality. With short case studies, primary source materials, reflective exercises, strong visuals, and interviews with practitioners, this introductory text explores improving housing choices in America.

*Nonprofit Neighborhoods* Claire Dunning, 2022-06-23. An exploration of how and why American city governments delegated the responsibility for solving urban inequality to the nonprofit sector. Nonprofits serving a range of municipal and cultural needs are now so ubiquitous in US cities it can be difficult to envision a time when they were more limited in number, size, and influence. Turning back the clock, however, uncovers both an illuminating story of how the nonprofit sector became such a dominant force in American society as well as a troubling one of why this growth occurred alongside persistent poverty and widening inequality. Claire Dunning's book connects these two stories in histories of race, democracy, and capitalism, revealing how the federal government funded and deputized nonprofits to help individuals in need and in so doing avoided addressing the structural inequities that necessitated such action in the first place. *Nonprofit Neighborhoods* begins after World War II when suburbanization, segregation, and deindustrialization inaugurated an era of urban policymaking that applied private solutions to public problems. Dunning introduces readers to the activists, corporate executives, and politicians who advocated addressing poverty and racial exclusion through local organizations while also raising provocative questions about the politics and possibilities of social change. The lessons of *Nonprofit Neighborhoods* exceed the bounds of Boston, where the story unfolds, providing a timely history of the shift from urban crisis to urban renaissance for anyone concerned about American inequality, past, present, or future.
