

I. Children with Disabilities

Learning disability has difficulty in learning that involves understanding or using spoken or written language, and the difficulty can appear in listening, thinking, reading, writing, and spelling. A learning disability also may involve difficulty in doing mathematics. To be classified as a learning disability, the learning problem cannot be primarily the result of visual, hearing, or motor disabilities; mental retardation; emotional disorders; or due to environmental, cultural, or economic disadvantage.

A. READING, WRITING, AND MATH DIFFICULTIES

- **Dyslexia** The most common learning disability is dyslexia, a severe impairment in the ability to read and spell
- **Dysgraphia** A learning disability that involves difficulty in handwriting is dysgraphia (Rosenblum, Aloni, & Josman, 2010). Children with dysgraphia may write very slowly, their writing products may be virtually illegible, and they may make numerous spelling errors because of their inability to match up sounds and letters
- **Dyscalculia** Also known as developmental arithmetic disorder, dyscalculia is a learning disability that involves difficulty in math computation

B. Attention deficit hyperactivity disorder is a disability in which children consistently show one or more of these characteristics over a period: (1) inattention, (2) hyperactivity, and (3) impulsivity. For an ADHD diagnosis, onset of these characteristics early in childhood is required, and the characteristics must be debilitating for the child.

C. Mental retardation is a condition with an onset before age 18 that involves low intelligence

D. PHYSICAL DISORDERS

- **Orthopedic impairments** Restricted movements or lack of control of movements, due to muscle, bone, or joint problems.
- **Cerebral palsy** A disorder that involves a lack of muscle coordination, shaking, or unclear speech.
- **Epilepsy** A neurological disorder characterized by recurring sensorimotor attacks or movement convulsions

E. SENSORY DISORDERS

- **Visual Impairments.** This category includes students who have low vision and students who are blind. Children with low vision have a visual acuity of between 20/70 and 20/200
- **Hearing Impairments.** A hearing impairment can make learning very difficult for children. Children who are born deaf or experience a significant hearing loss in the first several years of life usually do not develop normal speech and language.
