Our Biometric Future Kelly A. Gates, 2011-01-23 Since the 1960s a significant effort has been underway to program computers to see the human face to develop automated systems for identifying faces and distinguishing them from one another commonly known as Facial Recognition Technology While computer scientists are developing FRT in order to design more intelligent and interactive machines businesses and states agencies view the technology as uniquely suited for smart surveillance systems that automate the labor of monitoring in order to increase their efficacy and spread their reach Tracking this technological pursuit Our Biometric Future identifies FRT as a prime example of the failed technocratic approach to governance where new technologies are pursued as shortsighted solutions to complex social problems Culling news stories press releases policy statements PR kits and other materials Kelly Gates provides evidence that instead of providing more security for more people the pursuit of FRT is being driven by the priorities of corporations law enforcement and state security agencies all convinced of the technology s necessity and unhindered by its complicated and potentially destructive social consequences By focusing on the politics of developing and deploying these technologies Our Biometric Future argues not for the inevitability of a particular technological future but for its profound contingency and contestability **Science and Technology Annual Reference Review** ,1991 **Audio** ,1997 **PC World** ,1995 The Camcorder User's Video Handbook Peter Davison, 1993 This handbook on video photography provides information on choosing equipment camcorders lighting tripods and associated photographic equipment microphones editing sound tracking and computer graphics It also offers detailed illustrated descriptions of how to use video cameras The Video Manual David Frederick Cheshire, 1982 The Video Manual David F.
