Manufacturing Humans The Challenge Of The New Reproductive Technologies:

Manufacturing Humans David Gareth Jones, 1987 **New Dictionary of Christian Ethics & Pastoral Theology** David J. Atkinson, David F. Field, Arthur F. Holmes, Oliver O'Donovan, 2013-11-21 Encompassing a wide range of topics from the timely health care and business ethics to the traditional atonement suffering and the kingdom of God this work features an easy to use reference system and eighteen articles that introduce readers to key themes in moral pastoral and practical theology Edited by David J Atkinson and David F Field with consulting editors Arthur Holmes and Oliver O Donovan *At the Margins* D. Gareth Jones, 2022-09-21 As a Christian who has functioned at the interface of biomedical science and faith for the whole of his professional life Gareth Jones is aware of the tensions and misunderstandings that frequently arise both inside and outside the church In this book he argues that Christians should not underestimate the importance of scientific contributions to an understanding of God's world He works this out by reference to his own experiences in approaching a number of contentious topics These include the use of embryos in reproductive technology research the place of vaccines in combatting viral pandemics like COVID 19 and understanding the gender debate Other examples he uses are the treatment of a genetic condition like cystic fibrosis and the importance of using only donated bodies for teaching and research in anatomy In working at these borderlands he recognizes that the best of biomedical science brings glory to God and enhances human existence All these areas are transformed by applying Christian values such as the dignity and equality of human beings Over the years he has learned how to be comfortable working in these borderlands even as they raise questions that trouble many within both society and the churches **Dictionary of Scripture and Ethics** Joel B. On Behalf of God

Bruce R. Reichenbach, Victor Elving Anderson, 1995 A comprehensive and useful discussion of Christian ethics applied to a variety of difficult and timely issues is no simple task but Reichenbach and Anderson have risen to it They have provided a book that is a great starting place for further consideration of topics such as the environment assisted reproduction abortion surrogacy the human genome the pursuit of knowledge the brain mind issue and human sexuality Their treatment of these issues is integrated by the adoption of a biblically based paradigm from Genesis filling ruling over and caring for This is a book packed with information suggestions and challenges Richard Bube Stanford University An important book for the Christian community The authors have rescued creation from the polemical battlefield it has become for too many Christians and have applied God s creation ordinances to some of the pressing practical issues of our time Their approach is wide ranging and novel getting us away from the tired debates about conservatives and liberals *On Behalf of God* may provide the fresh look at ethics that is badly missing in entrenched Christian circles I believe we may look back ten years from now and see this book as a watershed for Christian witness in the real world R J Berry University College London
