A Many-Sorted Calculus Based on Resolution and Paramodulation Christoph Walther, 2014-07-10 A Many Sorted Calculus Based on Resolution and Paramodulation emphasizes the utilization of advantages and concepts of many sorted logic for resolution and paramodulation based automated theorem proving This book considers some first order calculus that defines how theorems from given hypotheses by pure syntactic reasoning are obtained shifting all the semantic and implicit argumentation to the syntactic and explicit level of formal first order reasoning This text discusses the efficiency of many sorted reasoning formal preliminaries for the RP and RP calculus and many sorted term rewriting and unification The completeness and soundness of the RP calculus sort theorem and automated theorem prover for the RP calculus are also elaborated This publication is a good source for students and researchers interested in many sorted calculus **A**

Lloyd, 2012-12-06 This volume has a dual significance to the ESPRIT Basic Research efforts towards forging strong links between European academic and industrial teams carrying out research often interdisciplinary at the forefront of Information Technology Firstly it consists of the proceedings of the Symposium on Computational Logic held on the occasion of the 7th ESPRIT Conference Week in November 1990 whose organisation was inspired by the work of Basic Research Action 3012 COMPULOG This is a consortium which has attracted world wide interest with requests for collaboration throughout Europe the US and Japan The work of COMPULOG acts as a focal point in this symposium which is broadened to cover the work of other eminent researchers in the field thus providing a review of the state of the art in computational logic new and important contributions in the field but also a vision of the future Secondly this volume is the first of an ESPRIT Basic Research Series of publications of research results It is expected that the quality of content and broad distribution of this series will have a major impact in making the advances achieved accessible to the world of academic and industrial research alike At this time all ESPRIT Basic Research Actions have completed their first year and it is most encouraging and stimulating to see the flow of results such as the fine examples presented in this symposium **Rewriting Techniques**

Hassan Ait-Kaci, Maurice Nivat, 2014-05-10 Resolution of Equations in Algebraic Structures Volume 2 Rewriting Techniques is a collection of papers dealing with the construction of canonical rewrite systems constraint handling in logic programming and completion algorithms for conditional rewriting systems Papers discuss the Knuth Bendix completion method which constructs a complete system for a given set of equations including extensions of the method dealing with termination unifying completion and associative communicative completion One paper examines the various practical techniques that can be used to extend Prolog as a constraint solver particularly on techniques that solve boolean equations imposing

inequality disequality and finitary domain constraints on variables Another paper presents a sufficient condition for confluence of conditional rewriting and a practical unification algorithm modulo conditional rewriting through the notion of conditional narrowing One paper analyzes the possibility of using completion for inductive proofs in the initial algebra of an equational variety without explicit induction Another papers discusses solving systems of word equations in the free monoid and the free group where a solution is defined as a word homomorphism Programmers mathematicians students and instructors involved in computer science and computer logic will find this collection valuable **Proceedings of the Ninth International Joint Conference on Artificial Intelligence** International Joint Conferences on Artificial Intelligence,1985

Sorts and Types in Artificial Intelligence Ulrich Hedtstück,1990-07-12 The aim of this book is to reflect the substantial research done in Artificial Intelligence on sorts and types The main contributions come from knowledge representation and theorem proving and important impulses come from the application areas i e natural language understanding systems computational linguistics and logic programming The workshop brought together researchers from logic theoretical computer science theorem proving knowledge representation linguistics logic programming and qualitative reasoning *Algebraic and Logic Programming* Helene Kirchner,Wolfgang Wechler,1990-09-20 This volume consists of papers presented at the Second International Conference on Algebraic and Logic Programming in Nancy France October 1 3 1990 **Commonsense Reasoning** Erik T. Mueller,2010-07-26 To endow computers with common sense is one of the major long term goals of Artificial Intelligence research One approach to this problem is to formalize commonsense reasoning using mathematical logic Commonsense Reasoning is a detailed high level reference on logic based commonsense reasoning It uses the event calculus a highly powerful and usable tool for commonsense reasoning which Erik T Mueller demonstrates as the most effective tool for the broadest range of applications He provides an up to date work promoting the use of the event calculus for commonsense reasoning and bringing into one place information scattered across many books and papers Mueller shares the knowledge gained in using the event calculus and extends the literature with detailed event calculus solutions to problems that span many areas of the commonsense world Covers key areas of commonsense reasoning including action change defaults space and mental states The first full book on commonsense reasoning to use the event calculus Contextualizes the event calculus within the framework of commonsense reasoning introducing the event calculus as the best method overall Focuses on how to use the event calculus formalism to perform commonsense reasoning while existing papers and books examine the formalisms themselves Includes fully worked out proofs and circumscriptions for every example **Mechanizing Mathematical Reasoning** Dieter Hutter,2005-02-23 By presenting state of the art results in logical reasoning and formal methods in the context of artificial intelligence and AI applications this book commemorates the 60th birthday of Jörg H Siekmann The 30 revised reviewed papers are written by former and current students and colleagues of Jörg Siekmann also included is an appraisal of the scientific career of Jörg Siekmann entitled A Portrait of a
