Maple and Mathematica Inna K. Shingareva, Carlos Lizárraga-Celaya, 2010-04-29 In the history of mathematics there are many situations in which calculations were performed incorrectly for important practical applications Let us look at some examples the history of computing the number began in Egypt and Babylon about 2000 years BC since then many mathematicians have calculated e.g. Archimedes Ptolemy Viète etc The first formula for computing decimal digits of π was discovered by J. Machin in 1706 who was the first to correctly compute 100 digits of π Then many people used his method e.g. W. Shanks calculated with 707 digits within 15 years although due to mistakes only the first 527 were correct For the next examples we can mention the history of computing the fine structure constant that was first discovered by A. Sommerfeld and the mathematical tables exact values and formulas published in many mathematical textbooks were not verified rigorously 25 These errors could have a large effect on results obtained by engineers But sometimes the solution of such problems required such technology that was not available at that time In modern mathematics there exist computers that can perform various mathematical operations for which humans are incapable Therefore the computers can be used to verify the results obtained by humans to discover new results to prove the results that a human can obtain without any technology With respect to our example of computing we can mention that recently in 2002 Y. Kanada, Y. Ushiro, H. Kuroda and M. A. *A Maple Approach to Calculus* John T. Gresser, 1999 Ideally suited for use with either Strauss, Bradley Smith or Varberg, Purcell, Rigdon this manual may also be used in conjunction with other calculus texts Many of the exercise sets have additional problems labeled projects which are somewhat more involved These projects are designed to enhance problem solving skills by making use of not only topics currently under discussion but occasionally a wide variety of previously discussed topics as well
