Mapping The Political Landscape An Introduction To Political Science:

Mapping the Political Landscape Reeta Chowdhari Tremblay, 2012 **Teaching Political Science to Undergraduates** Laure Paquette, 2016-01-15 By 2020 half of the world's population and most university students will have a supercomputer in their pockets. This revolution will affect the way students respond to higher education. The university classroom must henceforth engage students and the classic lecture format alone might not be enough to do so. This book answers the question how university students can learn in the classroom what they cannot learn in any other way. The answer is inspired by options that are not available to political scientists in the way that they are in the laboratories for the sciences in the performances for the live arts and in the studios for visual arts as well as ideas that are already present but not widespread in the discipline: problem solving and case studies as in the professional schools and simulation exercises in many other disciplines. This book proposes therefore an active pedagogy for political science at a time when active pedagogy is more important than ever. Prof Laure Paquette PhD has been a visiting researcher or professor in 23 countries. She has advised several foreign governments as well as her own Canada and has published extensively in four languages. This is her sixteenth book. **Canadian Books in Print. Author and Title Index**, 1975 The Political Economy of Natural Resource Funds Eyene Okpanachi, Reeta Chowdhari Tremblay, 2021-08-13 This book aims to foster a better understanding of the particular challenges faced by resource dependent countries or jurisdictions in managing their resource revenues through natural resource funds (NRFs). It explores the varieties of natural resource management strategies as dictated primarily by domestic politics and how the potential negative distributional consequences of resource wealth management, the resource curse, may add political dimensions and potential conflicts to decisions about NRFs in ways that other sovereign wealth funds (SWFs) do not experience. By bridging the existing academic and practical knowledge gap arising from the limited attention given to the domestic politics of NRFs and state-society relations, this edited book is a valuable resource for academics, policymakers, and civil society actors in resource-driven economies and especially those interested in learning from comparative experiences of natural resource wealth management through NRFs. **How to Map Arguments in Political Science** Craig Parsons, 2007-04-19 As essential and accessible introduction and critique of the main types of explanation in political science. Essential reading for students and scholars alike. *Transitional Justice and the Arab Spring* Kirsten Fisher, Robert Stewart, 2015-03-24 This book presents a varied and critical picture of how the Arab Spring demands a re-examination and re-conceptualization of issues of transitional justice. It demonstrates how unique features of this wave of revolutions and popular protests that have swept the Arab world since December 2010 give rise to distinctive concerns and problems relative to transitional justice. The contributors explore how these issues in turn add fresh perspective and nuance to the field more generally. In so doing, it explores fundamental questions of social justice reconstruction and healing in the context of the Arab Spring. Including the perspectives of academics and practitioners, *Transitional Justice and the Arab Spring* will be of

considerable interest to those working on the politics of the Middle East normative political theory transitional justice international law international relations and human rights

Diversity in Decline? Arjun Tremblay, 2018-12-28 In this book Arjun Tremblay considers the future of multiculturalism contextualised within an ideological and political shift to the right Is there any hope that multiculturalism will survive alongside the rise of the political right across democracies How can policy makers continue to recognize and to accommodate minorities in an increasingly inhospitable ideological environment Based on evidence from three case studies Tremblay develops a hypothesis of multicultural outcomes arguing that while the threat to multiculturalism is real there still is hope and that not only is the fate of minority rights in liberal democracies far from sealed but it may still be possible to further protect the rights of immigrant and other minority groups in years to come In order to do this proponents of diversity politics may need to reconceptualise multiculturalism and other minority rights along instrumental lines as a means to fulfil policy objectives above and beyond the recognition and accommodation of immigrant minorities This will be an important read for scholars interested in minority rights multiculturalism diversity politics comparative politics institutionalism right wing and far right studies and public policy
