The Office of Fair Trading Great Britain. National Audit Office, 2009 The Office of Fair Trading OFT has improved its operations following recommendations on maintaining competition in markets made by the National Audit Office and Committee of Public Accounts in 2005 and 2006 It now needs to concentrate its efforts on strengthening the skills and experience of its staff at key management grades and be clearer on how long it expects its investigations will take The OFT is now directing its work to areas that have the most impact though this refocus on higher priority cases has led to a perception that the OFT is less interested in smaller markets with a risk that its deterrent effect will be reduced in these markets The OFT has taken steps to address this perception launching investigations into more local markets such as in construction and bus transport The time taken to process high profile cases has been reduced by introducing better project management and more flexible ways of working including using bigger teams and temporary legal staff The OFT has also brought criminal charges in two cartel cases for the first time under the Enterprise Act one of which to date has resulted in criminal convictions The OFT recognises that some of its cases are still taking too long The OFT operates in a competitive labour market and still continues to face challenges in attracting and retaining talented staff The OFT has provided project management and leadership training to its staff but it needs to sustain and increase this work in order to continue to recruit and retain staff at key management grades **NCJRS Catalog** , *The Craft of Bureaucratic Neutrality* Gregory A. Huber, 2007-05-07 Are political understandings of bureaucracy incompatible with Weberian features of administrative

neutrality In examining the question of whether interest groups and elected officials are able to influence how government agencies implement the law this book identifies the political origins of bureaucratic neutrality In bridging the traditional gap between questions of internal management public administration and external politics political science Huber argues that strategic neutrality allows bureaucratic leaders to both manage their subordinates and sustain political support By analyzing the OSH Act of 1970 Huber demonstrates the political origins and benefits of administrative neutrality and contrasts it with apolitical and unconstrained administrative implementation Historical analysis interviews with field level bureaucrats and their supervisors and quantitative analysis provide a rich understanding of the twin difficulties agency leaders face as political actors and personnel managers *Fish and Wildlife Miscellaneous* United States. Congress. House. Committee on Merchant Marine and Fisheries. Subcommittee on Fisheries and Wildlife Conservation and the Environment, 1978

Criminalising Cartels Caron Beaton-Wells, Ariel Ezrachi, 2011-02-10 This book is inspired by the international movement towards the criminalisation of cartel conduct over the last decade Led by US enforcers criminalisation has been supported by a growing number of regulators and governments It derives its support from the simple yet forceful proposition that criminal sanctions particularly jail time are the most effective deterrent to such activity However criminalisation is much more complex than that basic proposition suggests There is complexity both in terms of the various forces that are driving and shaping the movement economic political and social and in the effects on the various actors involved in it government enforcement agencies the business community judiciary legal profession and general public Featuring contributions from authors who have been at the forefront of the debate around the world this substantial 19 chapter volume captures the richness of the criminalisation phenomenon and considers its implications for building an effective criminal cartel regime particularly outside of the US It adopts a range of approaches including general theoretical perspectives from criminal theory economics political science regulation and criminology and case studies of the experience with the design and enforcement of existing or contemplated criminal cartel regimes in various jurisdictions including in Australia Canada EU Germany Ireland and the UK The book also explores the international dimensions of criminalisation its specific practical consequences such as increased potential for extradition as well as its more general implications for trends of harmonisation or convergence in competition law and enforcement *National Environmental Enforcement Journal* , 1997 *Antitrust Law Journal*

, 1986 *Soil Survey* , 1984 **Prevention and Compensation of Marine Pollution Damage** Michael Faure, Michael G. Faure, 2006-01-01 Marine oil pollution is one of the most damaging environmental liabilities of our time and is taken very seriously by governments Although international conventions take the lead in the legal regime underpinning prevention and compensation of marine oil pollution damage national legal systems differ considerably in how they interpret and apply their monitoring and enforcement responsibilities This is the first book to present a comparative analysis of the law with respect to marine oil pollution with expert contributions emphasising particular solutions in Europe the US and China The authors draw

on the full range of legal sources from theory and legislation to procedure and actual case studies Written by both academics and practitioners senior academics with a wide experience in the field and practitioners who have extensively dealt with marine pollution issues the work is not confined to a mere legal analysis but offers a more inclusive law and economics perspective solidly built on a substantial analysis in English of the law in the European US Chinese and international contexts Individual contributors focus on countries with which they have particular expertise or experience This book will be of interest to corporate counsel international lawyers academics and policy makers as well as to students of international environmental and maritime law In addition the book is especially valuable to non Chinese lawyers for its clear insight into the complex Chinese environmental legal system
