Jung, 2014-12-18 Jung's discovery of the collective unconscious a psychic inheritance common to all humankind transformed the understanding of the self and the way we interpret the world In *On the Nature of the Psyche* Jung describes this remarkable theory in his own words and presents a masterly overview of his theories of the unconscious and its relation to the conscious mind Also contained in this collection is *On Psychic Energy* where Jung defends his interpretation of the libido a key factor in the breakdown of his relations with Freud For anyone seeking to understand Jung's insights into the human mind this volume is essential reading **On the Nature of the Psyche** C. G.

Jung, 2020-06-30 Extracted from Volume 8 Includes the title essay and *On Psychic Energy* [On the Nature of the Psyche](#)

images or archetypes in the development of concepts and scientific theories and stress the need for complementary principles in nature It is a translation of *Synchronizität als ein Prinzip kausaler Zusammenhänge* In 1952 Carl Jung and Wolfgang Pauli both at the height of their reputations co-wrote *The Interpretation of Nature and the Psyche* It contained one essay by each author Jung's presents a challenge to mainstream science and advances the principle of synchronicity and Pauli's argues for a more holistic conception of modern science Roderick Main presents the original essays here with a brand new introduction and commentary which reviews how the original text was viewed and which traces the subsequent influences of both the essays and the two authors *The Interpretation of Nature and the Psyche* Wolfgang Pauli, 1955

Universe of Nature of the Psyche Adão Jose Gonçalves Da Cruz,2022-03-15 Psychological time is different from time in the chemical region of the physical world Psychological time is the period of continuous psychic manifestation in which the archetype of anima and animus assume different activities in the nature of the psyche when the Ego lives its subjective and objective experiences through the collective unconscious and the personal unconscious It is the quantum time generated by germinal ideas and then when revitalized by experiences in the physical world because they are assimilated as archetypal forces It is time in the nature of the psyche that widens and contracts according to the state of mind or consciousness of the person For example there are different psychic quantum activities in the nature of the psyche because the theory of relativity says that time can contract and expand to two observers moving at different speeds The psyche there are two observers who move at different speeds and spaces anima and animus Therefore anima being feminine is the figure that compensates for male consciousness In women the compensating figure is of a masculine character and can be designated by the name of animus As stated by C G Jung if it is not simple to expose what one should understand by anima it is almost insurmountable the difficulty of trying to describe the psychology of animus In this essay it is possible to observe the psychology of anima and animus as well as the lack of time in the Collective Unconscious and the space times in the personal unconscious based on the theories of Immanuel Kant in Critique of Pure Reason and Albert Einstein in Theory of Restricted Relativity

The Wounded Researcher Robert D. Romanyshyn,2020-08-14 The Wounded Researcher addresses the crises of epistemological violence when we fail to consider that a researcher is addressed by and drawn into a work through his or her complexes Using a Jungian Archetypal perspective this book argues that the bodies of knowledge we create degenerate into ideologies which are the death of critical thinking if the complexity of the research process is ignored Writing with soul in mind invites us to consider how we might write down the soul in writing up our research

Stoic Theology P. A. Meijer,2007 The ancient Stoics constructed an elaborate set of proofs for the existence of the Greek gods which proved highly influential for later theological and philosophical proofs P A Meijer's Stoic Theology the first book on the subject in almost thirty years analyzes these proofs from a fresh perspective This valuable resource features a thorough examination of pre Christian theological argumentation as well as new insights on the relationship between God and the deities in ancient Greek thought in a book sure to interest scholars of philosophy and religion

The interpretation of nature and the psyche ,1955 Nature in Mind Roger Duncan,2018-07-03 Nature in Mind explores a kind of madness at the core of the developed world that has separated the

growth of human cultural systems from the destruction of the environment on which these systems depend It is now becoming increasingly clear that the contemporary Western lifestyle not only has a negative impact on the ecosystems of the earth but also has a detrimental effect on human health and psychological wellbeing The book compares the work of Gregory Bateson and Henry Corbin and shows how an understanding of the imaginal world within the practice of systemic psychotherapy and ecopsychology could provide a language shared by both nature and mind This book argues the case for bringing nature based work into mainstream education and therapy practice It is an invitation to radically reimagine the relationship between humans and nature and provides a practical and epistemological guide to reconnecting human thinking with the ecosystems of the earth

Nature and Nothingness Robert S. Corrington, 2017-01-23 Is nothingness found in nature or is it in some realm disconnected from nature Nature and Nothingness An Essay in Ordinal Phenomenology argues for the former and explores four types of nothingness as found in nature holes in nature totalizing nothingness in horror naturing nothingness and encompassing nothingness Using ordinal phenomenology Robert S Corrington reveals the great perennial fissuring within the one nature that there is The book includes a detailed analysis of religious violence as it correlates to the holes in nature such as anxiety bereavement loss fear of fragmentation and loss of identity It also examines the various ways in which horror is encountered in a literary context using the work of Edgar Allen Poe and H P Lovecraft The analysis is comparative and makes use of feminist philosophy as well as Buddhist Taoist theosophical and American philosophy Using resources from ecstatic naturalism and deep pantheism Corrington argues that though nothingness takes many forms they are all guises of the same vast Nothingness

The Structure of Being International Society for Neoplatonic Studies, 1982-01-01 Neoplatonism has sometimes been seen as a species of mysticism This volume shows that Neoplatonism has on the contrary a characteristic and definable structure It presents the logic of Neoplatonism and carefully distinguishes it from the logic of other forms of philosophy
