Coordination and the Syntax - Discourse Interface Daniel Altshuler,Robert Truswell,2022-05-26 This survey explores interactions between

syntax and discourse through a case study of patterns of extraction from coordinate structures The theoretical breadth of the volume makes it the most complete account of extraction from coordinate structures to date at first glance it appears to be a syntactic matter but the survey raises theoretical and empirical questions not just for syntax but also across semantics pragmatics and discourse structure Rather than promoting a single analysis Daniel Altshuler and Robert Truswell outline reasonable hypotheses that allow theoretical conclusions to be deduced from empirical facts The theoretical conclusions show that coordinate structures have the potential to discriminate between current syntactic theories and to inform work on the interfaces between syntax semantics pragmatics and discourse In many cases however the necessary empirical work has not yet been carried out and too much of the literature revolves around the same handful of primarily English examples The volume offers a starting point for further research on extraction from coordinate structures particularly in understudied languages and provides a guide to how to tease out the theoretical implications of empirical findings The End of the Tether Joseph Conrad, 2022 This selection of four relatively neglected stories by Conrad *The End of the Tether* *The Duel* *The Return* and *Amy Foster* remind readers that he is not just the teller of sea stories and tales of imperialist action but a writer for an age of global terror and individual trauma **P C Wren's Grammar 2** P C Wren, New English Grammar Series
