One Culture George Lewis Levine, Alan Rauch, 1987 This is the first in a planned series of volumes on science and literature which grow from three basic assumptions explicit in this first volume first that science and literature are two alternative but related expressions of a culture's values and beliefs and second that understanding science in its relation to culture and literature requires some understanding not only of its own internal processes but of pressures exercised by social political and psychological forces third that the idea of influence of one upon the other must work both ways It is not only science that influences literature but literature that influences science the authors say ISBN 0 299 11300 0 45 00 ISBN 0 299 11304 3 pbk 12 95

**The Oxford Handbook of Victorian Literary Culture** Juliet John, 2016-07-14 The Oxford Handbook of Victorian Literary Culture is a major contribution to the dynamic field of Victorian studies This collection of 37 original chapters by leading international Victorian scholars offers new approaches to familiar themes including science religion and gender and gives space to newer and emerging topics including old age fair play and economics Structured around three broad sections Ways of Being Identity and Ideology Ways of Understanding Knowledge and Belief and Ways of Communicating Print and Other Cultures the volume is sub divided into nine sub sections each with its own lead essay on subjectivity politics gender and sexuality place and race religion science material and mass culture aesthetics and visual culture and theatrical culture The collection like today's Victorian studies is thoroughly interdisciplinary and yet its substantial Introduction explores a concern which is evident both implicitly and explicitly in the volume's essays that is the nature and status of literary culture and the literary from the Victorian period to the present The diverse and wide ranging essays present original scholarship framed accessibly for a mixed readership of advanced undergraduates graduate students and established scholars

**C. P. Snow and the Struggle of Modernity** John de la Mothe, 2013-09-06 The condition of modernity springs from that tension between science and the humanities that had its roots in the Enlightenment but reached its full flowering with the rise of twentieth century technology It manifests itself most notably in the crisis of individuality that is generated by the nexus of science literature and politics one that challenges each of us to find a way of balancing our personal identities between our public and private selves in an otherwise estranging world This challenge which can only be expressed as the struggle of modernity perhaps finds no better expression than in C P Snow In his career as novelist scientist and civil servant C P Snow 1905 1980 attempted to bridge the disparate worlds of modern science and the humanities While Snow is often regarded as a late Victorian liberal who has little to say about the modernist period in which he lived and wrote de la Mothe challenges this judgment reassessing Snow's place in twentieth century thought He argues that Snow's life and writings most notably his Strangers and Brothers sequence of novels and his provocative thesis in The Two Cultures and the Scientific Revolution reflect a persistent struggle with the nature of

modernity They manifest Snow's belief that science and technology were at the center of modern life      **Wordsworth, Coleridge, and 'the Language of the Heavens'** Thomas Owens, 2019 Thomas Owens explores exultant visions inspired by Wordsworth's and Coleridge's scrutiny of the night sky the natural world and the domains of science He examines a set of scientific patterns which the poets used to express ideas about poetry religion criticism and philosophy and sets out the importance of analogy in their creative thinking      **Romantic Science** Noah Heringman, 2012-02-01 Although romantic science may sound like a paradox much of the romance surrounding modern science the mad scientist the intuitive genius the utopian transformation of nature originated in the Romantic period Romantic Science traces the literary and cultural politics surrounding the formation of the modern scientific disciplines emerging from eighteenth century natural history Revealing how scientific concerns were literary concerns in the Romantic period the contributors uncover the vital role that new discoveries in earth plant and animal sciences played in the period's literary culture As Thomas Pennant put it in 1772 Natural History is at present the favourite science over all Europe and the progress which has been made in it will distinguish and characterise the eighteenth century in the annals of literature As they examine the social and literary ramifications of a particular branch or object of natural history the contributors to this volume historicize our present intellectual landscape by reimagining and redrawing the disciplinary boundaries between literature and science Contributors include Alan Bewell Rachel Crawford Noah Heringman Theresa M Kelley Amy Mae King Lydia H Liu Anne K Mellor Stuart Peterfreund and Catherine E Ross      *Victorian Culture and the Origin of Disciplines* Bernard Lightman, Bennett Zon, 2019-06-20 Current studies in disciplinarity range widely across philosophical and literary contexts producing heated debate and entrenched divergences Yet despite their manifest significance for us today seldom have those studies engaged with the Victorian origins of modern disciplinarity *Victorian Culture and the Origin of Disciplines* adds a crucial missing link in that history by asking and answering a series of deceptively simple questions how did Victorians define a discipline what factors impinged upon that definition and how did they respond to disciplinary understanding Structured around sections on professionalization university curriculums society journals literary genres and interdisciplinarity *Victorian Culture and the Origin of Disciplines* addresses the tangled bank of disciplinarity in the arts humanities social sciences and natural sciences including musicology dance literature and art history classics history archaeology and theology anthropology psychology and biology mathematics and physics Chapters examine the generative forces driving disciplinary formation and gauge its success or failure against social cultural political and economic environmental pressures No other volume has focused specifically on the origin of Victorian disciplines in order to track the birth death and growth of the units into which knowledge was divided in this period and no other volume has placed such a wide array of Victorian disciplines in their cultural context      *The Cambridge Companion to the Victorian Novel* Deirdre David, 2012-10-18 A new edition of this standard work fully updated with four brand new chapters      **Physics and Literature** Aura Heydenreich, Klaus

Mecke,2021-12-20 Physics and Literature is a unique collaboration between physicists literary scholars and philosophers the first collection of essays to examine together how science and literature beneath their practical differences share core dimensions forms of questioning thinking discovering and communicating insights This book advances an in depth exploration of relations between physics and literature from both perspectives It turns around the tendency to discuss relations between literature and science in one sided and polarizing ways The collection is the result of the inaugural conference of ELINAS the Erlangen Center for Literature and Natural Science an initiative dedicated to building bridges between literary and scientific research ELINAS revitalizes discussion of science literature interconnections with new topics ideas and angles by organizing genuine dialogue among participants across disciplinary lines The essays explore how scientific thought and practices are conditioned by narrative and genre fiction models and metaphors and how science in turn feeds into the meaning making of literary and philosophical texts These interdisciplinary encounters enrich reflections on epistemology cognition and aesthetics

**Thoreau's Late Career and The Dispersion of Seeds** Michael Benjamin Berger,2000 It demonstrates that in his late career Thoreau was working as scientist and poet simultaneously This study further explores how Thoreau managed the philosophical and rhetorical tensions involved in bridging the supposed gap between science and poetry and how in his later career he embraced the empirical method of scientific discovery while challenging the reductive assumptions of scientific materialism BOOK JACKET *Approaching Hysteria* Mark S. Micale,2019-01-15

What does this burgeoning corpus of writing tell us Why in recent years has the history of hysterical disorders carried such resonance for commentators in the sciences and humanities What can we learn from the textual traditions of hysteria about writing the history of disease in general What is the broader cultural meaning of the new hysteria studies In the second half of the book Micale discusses the many historical cultures of hysteria He reconstructs in detail the past usages of the hysteria concept as a powerful descriptive trope in various nonmedical domains including poetry fiction theater social thought political criticism and the arts His book is a pioneering attempt to write the historical phenomenology of disease in an age preoccupied with health and a prescriptive remedy for writing histories of disease in the future

Subversive Seduction Travis Landry,2013-01-10 Male male rivalry and female passive choice the two principal tenets of Darwinian sexual selection raise important ethical questions in *The Descent of Man* and in the decades since about the subjugation of women If female choice is a key component of evolutionary success what impact does the constraint of women's choices have on society The elaborate courtship plots of 19th century Spanish novels with their fixation on suitors and selectors rivalry and seduction were attempts to grapple with the question of female agency in a patriarchal society By reading Darwin through the lens of the Spanish realist novel and vice versa Travis Landry brings new insights to our understanding of both while Darwin's theories have often been seen as biologically deterministic Landry asserts that Darwin's theory of sexual selection was characterized by an open ended dynamic whose oxymoronic emphasis on passive female

choice carries the potential for revolutionary change in the status of women      **Einstein's Wake** Michael H.

Whitworth,2001-12-13 The revolution in literary form and aesthetic consciousness called modernism arose as the physical sciences were revising their most fundamental concepts space time matter and the concept of science itself The coincidence has often been remarked upon in general terms but rarely considered in detail Einstein s Wake argues that the interaction of modernism and the new physics is best understood by reference to the metaphors which structured these developments These metaphors widely disseminated in the popular science writing of the period provided a language with which modernist writers could articulate their responses to the experience of modernity Beginning with influential aspects of nineteenth century physics Einstein s Wake qualifies the notion that Einstein alone was responsible for literary relativity it goes on to examine the fine detail of his legacy in literary appropriations of scientific metaphors with particular attention to Virginia Woolf D H Lawrence Wyndham Lewis and T S Eliot      *Evolution and Imagination in Victorian Children's Literature* Jessica

Straley,2016-06-06 Evolutionary theory sparked numerous speculations about human development and one of the most ardently embraced was the idea that children are animals recapitulating the ascent of the species After Darwin s Origin of Species scientific pedagogical and literary works featuring beastly babes and wild children interrogated how our ancestors evolved and what children must do in order to repeat this course to humanity Exploring fictions by Rudyard Kipling Lewis Carroll Frances Hodgson Burnett Charles Kingsley and Margaret Gatty Jessica Straley argues that Victorian children s literature not only adopted this new taxonomy of the animal child but also suggested ways to complete the child s evolution In the midst of debates about elementary education and the rising dominance of the sciences children s authors plotted miniaturized evolutions for their protagonists and readers and more pointedly proposed that the decisive evolutionary leap for both our ancestors and ourselves is the advent of the literary imagination      **The Routledge Companion to**

**Animal-Human History** Hilda Kean,Philip Howell,2018-09-03 The Routledge Companion to Animal Human History provides an up to date guide for the historian working within the growing field of animal human history Giving a sense of the diversity and interdisciplinary nature of the field cutting edge contributions explore the practices of and challenges posed by historical studies of animals and animal human relationships Divided into three parts the Companion takes both a theoretical and practical approach to a field that is emerging as a prominent area of study Animals and the Practice of History considers established practices of history such as political history public history and cultural memory and how animal human history can contribute to them Problems and Paradigms identifies key historiographical issues to the field with contributors considering the challenges posed by topics such as agency literature art and emotional attachment The final section Themes and Provocations looks at larger themes within the history of animal human relationships in more depth with contributions covering topics that include breeding war hunting and eating As it is increasingly recognised that nonhuman actors have contributed to the making of history The Routledge Companion to Animal Human History provides a timely and important

contribution to the scholarship on animal human history and surrounding debates      **Ornithologies of Desire** Travis V. Mason, 2013-09-03 *Ornithologies of Desire* develops ecocritical reading strategies that engage scientific texts field guides and observation Focusing on poetry about birds and birdwatching this book argues that attending to specific details about the physical world when reading environmentally conscious poetry invites a critical humility in the face of environmental crises and evolutionary history The poetry and poetics of Don McKay provide *Ornithologies of Desire* with its primary subject matter which is predicated on attention to ornithological knowledge and avian metaphors This focus on birds enables a consideration of more broadly ecological relations and concerns since an awareness of birds in their habitats insists on awareness of plants insects mammals rocks and all else that constitutes place The book's chapters are organized according to apparatus that is science as ecocritical tool flight and song Reading McKay's work alongside ecology and ornithology through flight and birdsong both challenges assumptions regarding humans place in the earth system and celebrates the sheer virtuosity of lyric poetry rich with associative as well as scientific details The resulting chapters interchapter and concordance of birds that appear in McKay's poetry encourage amateurs and specialists birdwatchers and poetry readers to reconsider birds in English literature on the page and in the field      **English Prose of the Nineteenth Century** Hilary Fraser, Daniel Brown, 2017-07-12 Hilary Fraser provides a comprehensive and thorough survey of English prose in the nineteenth century which draws from a wide variety of fields including art literary theory and criticism biography letters journals sermons and travel reportage Through these works the cultural social literary and political life of the twentieth century a period of great intellectual activity can be charted discussed and assessed For the first time an inclusive critical survey of nineteenth century non fiction is presented that traces the century's ideological and cultural upheavals as they are registered in the literary textures of some of its most widely read and influential writings The book explores the relations between writers who are generally perceived as occupying different discursive spheres for example between John Stuart Mill Florence Nightingale and Mrs Beeton between Cardinal Newman Elizabeth Gaskell and Hannah Cullwick and between Charles Darwin David Livingstone and Henry Mayhew The establishment and development of different genres and their interactions over the century are clearly mapped The genre of the periodical essay a distinctively modern and flexible form catering to the mass readership is the subject of the introduction and then more specialist fields are discussed covering scientific writing travel and exploration literature social reportage biography autobiography journals letters religious and philosophical prose political writing and history      *The Continuum Encyclopedia of American Literature* Steven R. Serafin, Alfred Bendixen, 2005-09-01 More than ten years in the making this comprehensive single volume literary survey is for the student scholar and general reader *The Continuum Encyclopedia of American Literature* represents a collaborative effort involving 300 contributors from across the US and Canada Composed of more than 1 100 signed biographical critical entries this Encyclopedia serves as both guide and companion to the study and appreciation of American literature A special

feature is the topical article of which there are 70      Transactions and Encounters Roger Luckhurst, Josephine McDonagh, 2002 This book examines Irish Poor Law reform during the years of the Irish revolution and Irish Free State This work is a significant addition to the growing historiography of the twentieth century which moves beyond political history and demonstrates that concepts of respectability social class and gender are central dynamics in Irish society This book provides the first major study of local welfare practices and exploration of policies attitudes and the poor This monograph examines local public assistance regimes institutional and child welfare and hospital care It charts the transformation of workhouses into a network of local authority welfare and healthcare institutions including county homes county hospitals and mother and baby homes The book s exploration of welfare and healthcare during revolutionary and independent Ireland provides fresh and original insights into this critical juncture in Irish history The book will appeal to Irish historians and those with interests in welfare the Poor Law and the social history of medicine and institutions      **Literature and Medicine in Nineteenth-Century Britain** Janis McLarren Caldwell, 2004-11-18 Although we have come to regard clinical and romantic as oppositional terms romantic literature and clinical medicine were fed by the same cultural configurations In the pre Darwinian nineteenth century writers and doctors developed an interpretive method that negotiated between literary and scientific knowledge of the natural world Literary writers produced potent myths that juxtaposed the natural and the supernatural often disturbing the conventional dualist hierarchy of spirit over flesh Clinicians developed the two part history and physical examination weighing the patient s narrative against the evidence of the body Examining fiction by Mary Shelley Carlyle the Bront s and George Eliot alongside biomedical lectures textbooks and articles Janis McLarren Caldwell demonstrates the similar ways of reading employed by nineteenth century doctors and imaginative writers and reveals the complexities and creative exchanges of the relationship between literature and medicine
