theory management theory disquisitions on ethical principles social analyses literally thousands of publications In a globalised and electronically networked world this literature has already generated its own particular language a policy jargon replete with terms that look deceptively familiar terms that will be much in evidence in what now follows terms whose meanings require our closest attention Marshall Marinker *Plato's Rivalry with Medicine* Susan B. Levin, 2014 While scholars typically view Plato's engagement with medicine as uniform and largely positive Susan B Levin argues that from the Gorgias through the Laws his handling of medicine unfolds in several key phases Further she shows that Plato views medicine as an important rival for authority on physis nature and eudaimonia flourishing Levin's arguments rest on careful attention both to Plato and to the Hippocratic Corpus Levin shows that an evident but unexpressed tension involving medicine's status emerges in the Gorgias and is explored in Plato's critiques of medicine in the Symposium and Republic In the Laws however this rivalry and tension dissolve Levin addresses the question of why Plato's rivalry with medicine is put to rest while those with rhetoric and poetry continue On her account developments in his views of human nature with their resulting impact on his political thought drive Plato's striking adjustments involving medicine in the Laws Levin's investigation of Plato is timely for the first time in the history of bioethics the value of ancient philosophy is receiving notable attention Most discussions focus on Aristotle's concept of phronesis practical wisdom here Levin argues that Plato has much to offer bioethics as it works to address pressing concerns about the doctor patient tie medical professionalism and medicine's relationship to society

*Earth-honoring Faith* Larry L. Rasmussen, 2015-04-01 Grand Winner of the 2014 Nautilus Book Awards Thoughtful observers agree that the planetary crisis we now face climate change species extinction the destruction of entire ecosystems the urgent need for a more just economic political order is pushing human civilization to a radical turning point change or perish But precisely how to change remains an open question In *Earth honoring Faith* Larry Rasmussen answers that question with a dramatically new way of thinking about human society ethics and the ongoing health of our planet Rejecting the modern assumption that morality applies to human society alone Rasmussen insists that we must derive a spiritual and ecological ethic that accounts for the well being of all creation as well as the primal elements upon which it depends earth air fire water and sunlight He argues that good science necessary as it is will not be enough to inspire fundamental change We must draw on religious resources as well to make the difficult transition from an industrial technological age obsessed with consumption to an ecological age that restores wise stewardship of all life *Earth honoring Faith* advocates an alliance of spirituality and ecology in which the material requirements for planetary life are reconciled with deep traditions of spirituality across religions traditions that include mysticism sacramentalism prophetic practices asceticism and the cultivation of wisdom It is these shared spiritual practices that can produce a chorus of world faiths to counter the consumerism utilitarianism alienation oppression and folly that have pushed us to the brink Written with passionate commitment and deep insight *Earth honoring Faith* reminds us that we must live in the present with the knowledge that the eyes of future generations will look back at us
