pharmacology neurology biological psychology and psychiatry      **The Comparative Structure and Function of Muscle**

Henry Huddart,2013-10-22 The Comparative Structure and Function of Muscle is based upon a series of lectures given at the University of Lancaster over the last seven years and it follows a natural division into structure electrophysiology and excitation and mechanical activity Within each section an attempt is made to cover all muscle types in as wide a range of animals as the literature will allow This book comprises 10 chapters with the first one focusing on the fine structure of skeletal muscle The following chapters then discuss the fine structure of cardiac and visceral muscle the innervation of muscle the ionic basis of the resting potential the action potential and the activation of muscle electrical activity and electrochemistry of invertebrate skeletal muscle electrical activity of invertebrate and vertebrate cardiac muscle the electrical activity and electrochemistry of visceral muscle the mechanics of muscle and excitation contraction coupling and relaxation This book will be of interest to practitioners in the fields of anatomy and the health sciences      *Control of Growth and Metamorphosis*

Penelope M. Jenkin,2017-05-03 International Series of Monographs in Pure and Applied Biology Zoology Division Volume 47 Control of Growth and Metamorphosis details the differences in animal hormones The title focuses on covering morphogenetic hormones The selection first defines and classifies morphogenetic hormones and then proceeds to detailing the sources of hormones related to morphogenesis Next the selection tackles growth and mitosis along with molting and metamorphosis The last chapter deals with the control of morphogenetic hormones The book will be of great use to students researchers and practitioners of zoology      *The Pilchard*

Michael Culley,2017-04-26 The Pilchard Biology and Exploitation discusses various concerns in the global pilchard industry The book is comprised of 23 chapters that are organized into five parts The text first introduces the biology of pilchard its geographical distribution and its zoological classification Parts II to IV tackle the various issues in pilchard industries in different regions namely England California South Africa and West Africa The coverage of the book includes catching processing demand and profitability The book will be of great use to individuals involved in the pilchard industries Researchers of fisheries science will also benefit from the book      *The Detection of Fish*

Patricia V. Johnston,Betty I. Roots,2013-10-22 Nerve Membranes A Study of the Biological and

Chemical Aspects of Neuron Glia Relationships presents the various aspects of neuronal and glial structure and function This book provides an interdisciplinary approach to the analysis of neuron glia relationships and of membranes in the nervous system Comprised of seven chapters this book begins with an overview of the function of the biological membranes to improve retard and regulate the rate of cellular reactions This text then determines the differences in the organization of the cells in the nervous system in the vertebrates and the invertebrates Other chapters examine the role of certain intermolecular forces and of water in the organization of lipid protein and lipid lipid associations This book reviews as well the theories of biological membrane structure and considers how these contribute towards understanding the methods by which membranes perform their role This book is a valuable resource for neuroscientists neurochemists and researchers

**The Ultrastructure of the Animal Cell** L. T. Threadgold, 2017-05-03 The Ultrastructure of the Animal Cell examines the ultrastructure of the animal cell with emphasis on the chemical biochemical and physiological aspects of the cell Discussions are organized around the interphase cell and cell division and cover topics ranging from the general structure and molecular models of cell membranes to the ultrastructure of the nucleus and the cytosome Changes in cell ultrastructure during embryogenesis differentiation and secretion are also considered This monograph is divided into nine chapters and opens with an introduction to the principles and techniques of electron microscopy The next section is about the interphase cell and first presents an overview of the animal cell before proceeding with an analysis of the ultrastructure of the nucleus and the cytosome paying particular attention to the plasma membrane and associated structures the hyaloplasm endoplasmic reticulum the Golgi complex and mitochondria The changes that occur in the ultrastructure of the cell during embryogenesis differentiation and secretion are also described The last section focuses on cell division and the ultrastructure of the dividing cell This text will be a useful resource for cell biologists biochemists and physiologists as well as students and teachers of biology biochemistry and physiology

**Embryology and Phylogeny in Annelids and Arthropods** D. T. Anderson, 2013-10-22 Embryology and Phylogeny in Annelids and Arthropods describes the embryology of segmented invertebrates utilizing morphological facts of embryonic development in the furtherance of speculations on phylogenetic relationships This book begins with an introduction to embryology and phylogeny followed by a discussion on the experimental embryology of animals groups such as polychaetes oligochaetes and leeches onychophorans myriapods apterygote and pterygote insects crustaceans and chelicerates The cleavage gastrulation and basic pattern of development of these invertebrates are also provided This text concludes with a presentation of the onychophoran myriapod hexapod assemblage or Uniramia This publication is recommended for experimental embryologists researching on the embryonic development in annelids and arthropods

*The Brain as a Computer* F. H. George, 2013-10-22 The Brain as a Computer Second Edition is a 14 chapter book that outlines the principles of cybernetics in relation to behavior from the perspective of experimental psychology and neurophysiology This book begins by describing the main ideas of cybernetics Subsequent

chapters explore cybernetic models with emphasis on finite automata and particularly finite automata in logical net form which seem especially useful to the modeling of behavior Other chapters summarize learning theory neurological matters thinking perception and artificial intelligence      *Essentials of Animal Physiology* S. C. Rastogi,1977      **Principles of Zoophysiology** Boris Rybak,1968      *Principles of General Physiology* Sir William Maddock Bayliss,1915 For many years Bayliss s book remained the most important book of its kind It is still valued for its historical information and its accurate bibliography      Planarian Regeneration H. V. Brøndsted,2013-10-22 Planarian Regeneration deals with regeneration problems including embryogenesis and morphogenesis The book compares the principles involved in the regeneration processes with those in ontogenesis from the egg The author also reviews the works of Thomas H Morgan and Charles M Child which became the basis for systematic scientific investigation of regeneration The head regenerates vigorously with a faster rate behind the eyes then at various levels along the longitudinal axis of the planarian body A time graded regeneration includes inhibitory forces and some genetic codes that determine such rate The time graded field has been proven by transplantation experiments the author addresses the morphological structure to which biochemical factors or processes determine the different rate of regeneration He notes that the nervous system conforms to these processes as shown by studies of Lender and Klein 1961 The author suggests that the study of regeneration in planarians should involve time considerations quantitatively to explain some substance if any from the nervous system that activates the cytoplasm of neoblasts and then the genome This book will prove valuable for zoologists and researchers in genetics biochemistry or molecular biology
