## Principles Of Japanese Discourse:

**Principles of Japanese Discourse** Senko K. Maynard, 2009      *Principles of Japanese Discourse* Senko K.

Maynard, 1998-03-05 This is the first book on Japanese rhetorical style and strategy ever made available for English readers. Professor Maynard presents in thirty entries clear explication of Japanese discourse organization and detailed analysis of the rhetorical strategies used. Also included are practice readings selected from contemporary Japanese discourse including essays, newspaper columns, a short story, a comic, and an advertisement with translations and wordlists. A helpful self-study guide, it is also an excellent reference source for students and instructors of Japanese.      *Linguistic Creativity in Japanese Discourse* Senko K. Maynard, 2007-07-13 Using theoretical concepts of self perspective and voice as an interpretive guide and based on the Place of Negotiation theory, this volume explores the phenomenon of linguistic creativity in Japanese discourse, i.e. the use of language in specific ways for foregrounding personalized expressive meanings. Personalized expressive meanings include psychological, emotive, interpersonal, and rhetorical aspects of communication encompassing broad meanings such as feelings of intimacy or distance, emotion, empathy, humor, playfulness, persona, sense of self identity, rhetorical effects, and so on. Nine analysis chapters explore the meanings, functions, and effects observable in the indices of linguistic creativity, focusing on discourse creativity, style mixture, borrowing others' styles, genre mixture, rhetorical creativity, puns, metaphors, metaphors in multimodal discourse, and grammatical creativity. Negatives, demonstratives, first person references. Based on the analysis of verbal and visual data drawn from multiple genres of contemporary cultural discourse, this work reveals that by creatively expressing in language we share our worlds from multiple perspectives; we speak in self's and others' many voices, and we endlessly create personalized expressive meanings as testimony to our own sense of being.

□□□ Senko K. Maynard, 1998-03-05 *Principles of Japanese Discourse* offers the first detailed description in English of the structure and rhetorical effects observed in various genres of Japanese discourse. Drawing on Japanese bunshooron and incorporating results of Western discourse studies, the book covers principles of overall rhetorical organisation, including *ki shoo ten ketsu* (topic structure), *danraku* (sentence chaining), and presents a variety of rhetorical strategies frequently used in contemporary Japanese texts. After presenting these principles in thirty compact entries, Professor Maynard invites the reader to apply the knowledge gained to the comprehension of contemporary authentic Japanese text. Seven selected readings are presented with vocabulary lists, discourse notes, and other tasks. Translations are provided in the appendix. In this book, Professor Maynard has created a new category in the area of Japanese language learning and provided an excellent reference source not only for students but for instructors of the Japanese language worldwide.      *Multilingual Discourse Production* Svenja Kranich, Viktor Becher, Steffen Höder, Juliane House, 2011-11-09 This volume presents discourse production in multilingual contexts as a specific type of language contact situation. Translation may be seen as the prototypical type of multilingual discourse production; other types would include parallel text production in different languages, e.g. for websites.

or the production of versions more loosely connected with the source text When divergent communicative norms and conventions come into contact in any of these types of text production one may find that such conventions transcend established language boundaries potentially leading to the emergence of new genres This volume represents the first collection of papers that focus on the specific properties of language contact through multilingual discourse production It brings together approaches by historical linguists language contact researchers and translation scholars thus presenting the topic in its full variety and providing valuable suggestions for further research in this emerging field of study *Situated Politeness* Bethan L. Davies, Michael Haugh, Andrew John Morrison, 2011-05-19 Pragmatic and sociolinguistic analyses of impoliteness have usually been dependent on context and cultural frames of reference This new study approaches the concept from an original perspective namely situatedness Although politeness research often concentrates on examining how speeches or discourses themselves are situated with regards to different places and contexts the focus on just one situation and various text types within it can also be of value *Situated Politeness* is concerned with disentangling the factors which govern our behaviour within a given social context as well as across them A range of expanding disciplines including corpus linguistics critical discourse analysis and conversation analysis are brought to bear on the topic and this work will be of interest to a diverse global audience *Japanese-English Translation* Judy Wakabayashi, 2020-10-06 This volume is a textbook for aspiring translators of Japanese into English as well as a reference work for professional Japanese English translators and for translator educators Underpinned by sound theoretical principles it provides a solid foundation in the practice of Japanese English translation then extends this to more advanced levels Features include 13 thematic chapters with subsections that explore common pitfalls and challenges facing Japanese English translators and the pros and cons of different procedures exercises after many of these subsections abundant examples drawn from a variety of text types and genres and translated by many different translators This is an essential resource for postgraduate students of Japanese English translation and Japanese language professional Japanese English translators and translator educators It will also be of use and interest to advanced undergraduates studying Japanese *Japanese Communication* Senko K. Maynard, 1997-06-01 In an accessible and original study of the Japanese language in relation to Japanese society and culture Senko Maynard characterizes the ways of communicating in Japanese and explores Japanese language associated modes of thinking and feeling *Japanese Communication Language and Thought in Context* opens with a comparison of basic American and Japanese values via cultural icons the cowboy and the samurai before leading the reader to the key concept in her study rationality Writing for those who have a basic knowledge of Japanese language and culture Maynard examines topics such as masculine and feminine speech swearing expressions of ridicule and conflict adverbs of emotional attitude and the eloquence of silence Maynard provides a refreshing and entertaining perspective for interpreting contemporary Japan sometimes in contrast to the United States *Encyclopedia of Linguistics* Philipp Strazny, 2013-02-01 Utilizing a historical and

international approach this valuable two volume resource makes even the more complex linguistic issues understandable for the non specialized reader Containing over 500 alphabetically arranged entries and an expansive glossary by a team of international scholars the Encyclopedia of Linguistics explores the varied perspectives figures and methodologies that make up the field

**Japanese Sentence Processing** Reiko Mazuka, Noriko Nagai, 2013-05-13

This volume is a direct result of the International Symposium on Japanese Sentence Processing held at Duke University. The symposium provided the first opportunity for researchers in three disciplinary areas from both Japan and the United States to participate in a conference where they could discuss issues concerning Japanese syntactic processing. The goals of the symposium were three fold: to illuminate the mechanisms of Japanese sentence processing from the viewpoints of linguistics, psycholinguistics and computer science; to synthesize findings about the mechanisms of Japanese sentence processing by researchers in these three fields in Japan and the United States; to lay foundations for future interdisciplinary research in Japanese sentence processing as well as international collaborations between researchers in Japan and the United States. The chapters in this volume have been written from the points of view of three different disciplines with various immediate objectives: from building usable speech understanding systems to investigating the nature of competence grammars for natural languages. All of the papers share the long term goal of understanding the nature of human language processing mechanisms. The book is concerned with two central issues: the universality of language processing mechanisms and the nature of the relation between the components of linguistic knowledge and language processing. This volume demonstrates that interdisciplinary research can be fruitful and provides groundwork for further research in Japanese sentence processing.
