Advances In Pharmaceutical Cell Therapy: Principles Of Cell-based Biopharmaceuticals Christine Guenther, Andrea Josefine Hauser, Ralf Huss, 2015-09-23 This textbook is a comprehensive overview of the development of cell based biopharmaceuticals. Beginning with the underlying biology of stem cell and cell based products, it traces the long and complex journey from preclinical concept to initiation of a pivotal clinical trial and the potential business model behind it. The book also takes into consideration the different regulatory landscapes and their continuous evolution in Europe, North America and other parts of the world. The authors describe a path to manufacture a clinical grade therapeutic that passes all necessary quality measures as a robust and marketable product, including an outlook on next generation products and innovative strategies. This reference book is a must have guide for any professional already active in biopharmaceuticals and anyone interested in getting involved in a scientific medical or business capacity.

Hayes' Principles and Methods of Toxicology, Sixth Edition A. Wallace Hayes, Claire L. Kruger, 2014-10-10 Hayes' Principles and Methods of Toxicology has long been established as a reliable reference to the concepts, methodologies and assessments integral to toxicology. The new sixth edition has been revised and updated while maintaining the same high standards that have made this volume a benchmark resource in the field. With new authors and new chapters that address the advances and developments since the fifth edition, the book presents everything toxicologists and students need to know to understand hazards and mechanisms of toxicity, enabling them to better assess risk. The book begins with the four basic principles of toxicology: dose matters, people differ, everything transforms, and timing is crucial. The contributors discuss various agents of toxicity, including foodborne solvents, crop protection chemicals, radiation, and plant and animal toxins. They examine various methods for defining and measuring toxicity in a host of areas, including genetics, carcinogenicity, toxicity in major body systems, and the environment. This new edition contains an expanded glossary reflecting significant changes in the field. New topics in this edition include: The importance of dose response, Systems toxicology, Food safety, The humane use
