**Moral Principles in Education** John Dewey, 1909

**From Principles of Learning to Strategies for Instruction** Robert J. Seidel, Kathleen C. Perencevich, Allyson L. Kett, 2005 The purpose of this volume is to help educators and training developers to improve the quality of their instruction Unlike other books which have appeared so far this volume is not limited to a particular theoretical position Nor is it like many of the instructional design texts which ignore the learning literature Rather it draws upon any and all of those research based principles regardless of learning theory which suggest heuristics to guide instructional strategies The approach of the authors is unique in that they develop a framework or model taxonomy for tasks through which the principles of learning can be related to particular learning processes suggesting distinctive strategies for specific instructional tasks The authors present a four stage model that includes Acquisition Automaticity Near Term Transfer and Far Term Transfer The book is a practical guide for developing instructional strategies across the four principal domains cognitive affective psychomotor and interpersonal and is backed by empirically supported learning principles It is

useful both to the experienced as well as the novice developer e g the student The current volume strikes a nice balance between theory and practice and provides a straightforward model of instruction that is easily connected with relevant research but equally easy to apply to instructional development projects The detailed treatment of the interpersonal domain and the emphasis on technology integration clearly distinguish the book as a modern treatment of instructional development that goes well beyond traditional instructional system development models Therefore this volume should provide a well grounded and useful tool for instructional developers From the Preface by Michael Spector Florida State University This book represents a major milestone in the literature on learning because it brings together research from the fields of psychology education and the training in a format which is highly useful to practitioners It will be very valuable to teachers trainers students and researchers alike Greg Kearsley University of Wisconsin Madison and UMUC University of Maryland

Never Work Harder Than Your Students and Other Principles of Great Teaching Robyn R. Jackson,2010-08-13 Is great teaching a gift that only a few of us are born with or is it a skill that can be learned In *Never Work Harder Than Your Students* Robyn Jackson makes a radical assertion Any teacher can become a master teacher by developing a master teacher mindset The master teacher mindset can be achieved by rigorously applying seven principles to your teaching until they become your automatic response to students in the classroom The more you practice these seven principles the more you begin to think like a master teacher 1 Start where your students are 2 Know where your students are going 3 Expect to get your students to their goal 4 Support your students along the way 5 Use feedback to help you and your students get better 6 Focus on quality rather than quantity 7 Never work harder than your students Using these principles Jackson shows you how to become a master teacher no matter where you are in your practice Each chapter provides a detailed explanation of one of the mastery principles the steps you need to take to apply them to your own practice and suggestions for how you can begin practicing the principle in your classroom right away Jackson offers stories from her own teaching practice as well as from other teachers she has helped to show you how each principle works Teaching is a hard job but using Jackson s principles will help you and your students reap the rich rewards of that hard work      **Principles and Technique of Teaching** Frank
