An Introduction to

Environmental Chemistry Julian E. Andrews, Peter Brimblecombe, Tim D. Jickells, Peter S. Liss, Brian Reid, 2013-04-25 This introductory text explains the fundamentals of the chemistry of the natural environment and the effects of mankind's activities on the earth's chemical systems. Retains an emphasis on describing how natural geochemical processes operate over a variety of scales in time and space and how the effects of human perturbation can be measured. Topics range from familiar global issues such as atmospheric pollution and its effect on global warming and ozone destruction to microbiological processes that cause pollution of drinking water deltas. Contains sections and information boxes that explain the basic chemistry underpinning the subject covered. Each chapter contains a list of further reading on the subject area. Updated case studies. No prior chemistry knowledge required. Suitable for introductory level courses. Advances in Archaeological Method and Theory Michael B. Schiffer, 2014-06-30 *Advances in Archaeological Method and Theory* Volume 4 presents the progressive explorations in methods and theory in archaeology. This book discusses the increasing application of surface collection in cultural resource management. Organized into eight chapters, this volume begins with an overview of the fundamental aspects of archaeoastronomy and explains what kinds of testable hypotheses that archaeoastronomy generates. This text then examines the general implications for the study of cultural complexity. Other chapters consider the use of surface artifacts by archaeologists to locate sites, establish regional culture histories, and to know where to excavate within sites. This book discusses as well the interpretative interfaces between archaeology on the one hand and ethnohistory and ethnology on the other, that is based on a theoretical stance advocating a fundamental holistic approach to anthropology. The final chapter deals with understanding the ecology of ancient organisms. This book is a valuable resource for archaeologists and anthropologists.
