Game Theory and Law Lawsuits usually involve litigation between two parties not the myriad participants in markets so the assumption of self interest constrained by markets does not carry over to legal disputes involving one on one bargaining in which the law gives one party superior bargaining power Game theory models predict the effect of different legal institutions rights and rules on the outcome of such bargaining Game theory also has a natural four model framework which is used in this book to analyze the law and economics of civil obligation which consists of torts negligence contracts and unjust enrichment
