*Southern Vietnamese Modernist Architecture*  
Mel Schenck, 2020-04-21 *Southern Vietnamese Modernist Architecture* features beautiful architectural photography that illustrates the outstanding accomplishment of the people of southern Vietnam in developing a mid century modernist architecture that is extraordinary in the world Especially for Americans Vietnam has been a war instead of a country The world didn't notice that the Vietnamese were simultaneously constructing modern apartment buildings houses large public buildings and public housing as they developed a new nation And the world didn't anticipate that this architecture would be so overtly modernist rather than an adaption of traditional Vietnamese designs to the continuation of colonial architecture In the mid twentieth century southern Vietnamese architects developed a version of modernist architecture that accommodated the tropical climate and reflected the identity of a newly independent culture It demonstrates the innate sense of design of Vietnamese and it represented the outlook of the people of southern Vietnam as they looked towards the future even in the face of war The vast quantity and quality of Vietnamese modernist buildings constructed throughout southern Vietnam made Vietnam an unrecognized center of modernism in the world Most importantly the southern Vietnamese as a culture embraced modernism and it became the vernacular architecture of the culture for dwellings This architecture features an interplay between masses and voids that provides a much more vibrant version of modernist architecture This style fills the gaps between the functionalism of the International Style and the quest for identity and spirit that has been lacking in modernism worldwide American architect Mel Schenck is a long term immigrant to Vietnam and has been studying this architecture since he was surprised by the extent and quality of modernist architecture in Saigon when he first lived there in 1971-72 He and photographer Alexandre Garel accumulated a database of 400 buildings and 4 000 photographs in southern Vietnam to serve a comprehensive analysis of the history and characteristics of this distinctive architecture Architectural historians aficionados of modernist architecture and anyone interested in Vietnamese culture will find that this book is a positive story

**The Logic of Modern Architecture** Randolph Williams Sexton, 1929 [Towards a Dialogical History of Modern Architecture](#) Jorge Francisco Liernur, 2024-07-15 The book challenges three perspectives on the modern architectural canon explanations that disregard impacts and effects beyond the North Atlantic monologic superficial modifications that simply add Other figures to the canon and views that reject the canon itself Instead it recognizes the canon s significance in comprehending architecture while seeking to uncover its presumed Western centric integrity through a shift from a monological to a dialogical approach This approach integrates concepts of identity and Otherness as dialectically articulated and mutually interrelated In essence the book s main thesis contends that the canon s historiographic construction overlooked the existence of Otherness specifically neglecting the world beyond the North Atlantic nucleus of the West By examining a global context to comprehend the canon formation the book proposes a more accurate understanding of the

history of modern architecture Recognizing that this task cannot emanate from a single hegemonic center it presents the prospect of a coral type architectural history This narrative should and could encompass voices from diverse cultures to explore the particular circumstances of the world intertwined with each piece or figure transiently integrated into that canon As a result the ideal readers of this book position themselves within multiple settings keen on engaging in a critical global conversation about modern architectural discourse It will be of interest to researchers and students of architecture architectural history and cultural studies
