

SAN design principles – configure storage array

This slide represents the second principle of Storage Area Network design: configuring the storage array. The purpose of this slide is to show you the guidelines for configuring the storage array, peak period activity, and caching techniques for servers, such as write and read cache.

Guidelines

- RAID groups are used to provide a specific level of input/output performance, capacity, and redundancy, and LUNs are assigned to RAID groups based on these needs
- If a particular RAID group cannot meet the required input/output performance, capacity, and response times, a different RAID group must be defined for the next set of LUNs
- Distribute the RAID groups across all internal channels and access paths in the storage arrays to achieve the required performance levels of input/output operations per second and response times

Peak Period Activity

- While designing SAN, base it on the peak-period activity and consider the nature of the input/output within each peak period
- Instantaneous peaks in input/output requirements may require additional storage array resources to be able to handle the workload
- Without additional resources, the IO requirements during peak periods may not be met, leading to performance degradation or even failure of the SAN

Caching

- Server systems can benefit from write cache, but the cache can become saturated if the input/output workload is intense enough
- Saturation of the cache reduces its effectiveness
- Cache is often allocated from a global pool, so it is essential to distribute it only if it is effective
- Read cache uses:
 - Read-ahead cache is helpful for certain activities that involve sequential IO, such as backups or accessing template repositories
 - Read cache may not be necessary when the application and operating system cache data are already stored within the virtual machine's memory

The Pueblo Potter Ruth Leah Bunzel,1929 The Pataphysician's Library Ben Fisher,2000-01-01 The Pataphysician's Library is a study of aspects of 1890s French literature with specific reference to the traditions of Symbolism and Decadence Its main focus is Alfred Jarry who has proved perhaps surprisingly to be one of the more durable fin de siècle authors The originality of this study lies in its use of the enigmatic list of books termed the livres pairs which appears in Jarry's 1898 novel *Gestes et Opinions du docteur Faustroll pataphysicien* his best known prose work The greatest interest of the livres pairs lies in a group of works by Jarry's friends and contemporaries primarily Leon Bloy Georges Darien Gustave Kahn Catulle Mendès Josephin Madan Rachilde and Henri de Regnier Several of these authors feature as the lords of islands visited by the pataphysician Dr Faustroll in his curious voyage around Paris In conjunction with Jarry's own works the contemporary livres pairs serve to illustrate the vibrant and experimental atmosphere in which these authors worked

Designing Planned Communities Daniel R. Mandelker,2010 *Designing Planned Communities* is a clear statement of the design issues that are critical to creating livable and well designed planned communities Professor Mandelker draws on his long experience with planned community and land use regulation to explain the meaning of good design for planned communities He shows how design concepts for planned communities can be translated into effective design guidance by local governments Examples of design standards are provided from comprehensive plans design guidelines design manuals and planned community regulations Throughout *Designing Planned Communities* the reader is taken through the complex problems of design regulation to an effective design program that can create planned communities in which we want to live Planners and lawyers will be interested in what Mandelker has to say about the design issues facing a growing number of planned communities throughout the country Planning and local government attorneys will find the information about the legality of innovative design plans most interesting and helpful Mandelker provides examples of localities that have experimented with a variety of design approaches and explores case law that will have an impact on these innovations Michael Allan Wolf Professor Richard E Nelson Chair in Local Government Law University of Florida Fredric G Levin College of Law

Design Review Brenda C. Scheer, Wolfgang F.E. Preiser, 2012-12-06 That the topic of design review is somehow troubling My biases are clear from the start I am among those who believe that the physical structure of our environment is probably one thing all readers can agree on Beyond this however I suspect prospects of consensus are dim Differing opinions can be managed and that controlling it is on the subject likely range from those desiring the key to the amelioration of numerous problems control to those desiring freedom Say one camp confronting society today I believe that design our physical and natural environments are going can solve a host of problems and that the design to hell in a hand basket Says the other design of the physical environment does influence be review boards are only as good as their members have more often than not their interventions produce Clearly this is a perspective that encompasses mediocre architecture more than one building at a time and demands As a town planner and architect I am sympathetic that each building understand its place in a larger context to the full range of sentiment Perhaps a context the city Indeed anyone proposing discussion of these two concepts control and physical solutions to urban problems is designing freedom and their differences would now be or as may seem more often the case destroying useful But let me instead suggest that both position the city

Designing Information Literacy Instruction Joan R. Kaplowitz, 2014-05-01 Designing Information Literacy Instruction The Teaching Tripod Approach provides a working knowledge of how instructional design ID applies to information literacy instruction ILI Its how to do it approach is directed at instruction librarians in all library settings and deals with both face to face and online ID issues No matter where an instruction librarian works whom they are teaching or what delivery mode they will be using the ID process remains the same Start with the user and the user's needs Identify the instructional problem's Develop outcomes that address these problem's Use outcomes to drive both the learning activities included and the assessments used to measure the attainment of the success of the instructional endeavor This book will help instruction librarians create instruction for all types of environments and in all modes of delivery It includes exercises and worksheets to help the reader work through the instructional design process Based on Kaplowitz's innovative Teaching Tripod model it will help instructional librarians clearly define the crucial links between outcomes activities and assessment

in particular Multiprotocol SAN routers today usually provide three services Fibre Channel to Fibre Channel routing iSCSI to Fibre Channel bridging and FCIP tunneling for distance extension The subjects covered for each service include theory usage cases and advice on designing implementing and managing routed SANs Multiprotocol Routing for SANs offers the first comprehensive look at this cutting edge technology

Collaborative Business Ecosystems and Virtual Enterprises

Luis M. Camarinha-Matos, 2013-06-29 Towards collaborative business ecosystems Last decade was fertile in the emerging of new collaboration mechanisms and forms of dynamic virtual organizations leading to the concept of dynamic business ecosystem which is supported or induced by the progress of the ubiquitous I pervasive computing and networking The new technologies collaborative business models and organizational forms supported by networking tools invade all traditional businesses and organizations what requires thinking in terms of whole systems i e seeing each business as part of a wider economic ecosystem and environment It is also becoming evident that the agile formation of very dynamic virtual organizations depends on the existence of a proper longer term embedding or nesting environment e g regional industry cluster in order to guarantee certain basic requirements such as trust building Trusting your partner is a gradual and long process common interoperability ontology and distributed collaboration infrastructures agreed business practices requiring substantial engineering Ire engineering efforts a sense of community we vs the others and some sense of stability when is a dynamic state or a stationary state useful The more frequent situation is the case in which this nesting environment is formed by organizations located in a common region although geography is not a major facet when cooperation is supported by computer networks
