Racheter,Richard E. Wagner,2012-12-06 Federalism has generally been characterized as a system of government that is
friendly to liberty It is not obvious though why this should be so Federalism is a form of government where citizens
simultaneously reside in at least two governments each of which has independent authority to tax and to regulate By contrast
in a unitary form of government citizens face only one government with independent authority to tax and regulate At first
glance it would seem a bit strange to claim that liberty is more secure when citizens are members of two governments with
independent authority than when they are members of only one such government The relationship between federalism and
liberty turns out to be a complex one and one that is capable of working in either direction Whether federalism supports or
erodes liberty depends on importantly on the institutional framework within which federalist governance takes place The
essays in *Federalist Government in Principle and Practice* examine this institutionalist theme from both theoretical and
practical perspectives Cumulative Book Index ,1925 A world list of books in the English language **Managing**
