Prison Architecture Leslie Fairweather, Sean McConville, 2013-05-13 Current and future prison designs are examined in this book within the government's prison building programme and the confines of current penal philosophies and legislation America has led the way in prison design with two main types of architecture predominating radial layouts outside cells with windows and linear blocks inside cells with grilles Now new generation prisons central association surrounded by small groups of cells look set to become the fashion But are they a better answer and should they be copied worldwide before we know Architects and administrators show in this book the designs of these new generation prisons and assess their impact Most countries in central Europe also have a rising crime rate and a demand for new prisons Contributions from significant architects from the UK Europe and America comment on these issues Other topics within the book are setting current prison architecture and design against an historical setting looking at penal ideas and prison architecture and design in the post-war period the psychological effects of the prison environment the influence of technology and design on security management and how prison architecture and design can be more flexible and innovative

The Procurement of Goods and Services by H. M. Prison Service Great Britain. National Audit Office, 2008 Since a critical 2003 National Audit Office report HC 562 session 2002 03 ISBN 9780102921250 the Prison Service has implemented a new procurement strategy led by a new centralised professional procurement team backed up by regional purchasing units which negotiate central contracts for a range of goods and services At the same time the Prison Service has introduced a shared service centre to provide administrative functions including purchasing for prisons The implementation of these two reforms has enabled the Prison Service to make significant savings in both purchasing and administrative costs As a result of the changes prisons now receive more consistent supplies of goods and services often at much lower prices than before The progress made by the Prison Service has been recognised by the Chartered Institute of Purchasing and Supply with two awards for excellence in 2006 and 2007 The Prison Service is still capable of making further savings In the near term it should concentrate its efforts on bringing more expenditure under the remit of its nationally negotiated contracts and help to improve compliance by prisons with the new arrangements by further communicating the benefits of its national procurement approach

Prison Media Anne Kaun, Fredrik Stiernstedt, 2023-05-09 How prisoners serve as media laborers while the prison serves as a testing ground for new media technologies Prisons are not typically known for cutting edge media technologies Yet from photography in the nineteenth century to AI enhanced tracking cameras today there is a long history of prisons being used as a testing ground for technologies that are later adopted by the general public If we recognize the prison as a central site for the development of media technologies how might that change our understanding of both media systems and carceral systems Prison Media foregrounds the ways in which the prison is a model space for the control and transmission of information a place where media is produced and a medium in its own right Examining the relationship between media and prison architecture as surveillance and communication technologies are literally built into the facilities this study also considers the ways in which prisoners themselves often do hard labor as media workers labor that contributes in direct and indirect ways to the latest technologies developed and sold by multinational corporations like Amazon There is a fine line between ankle monitors and Fitbits and Prison Media helps us make sense of today's carceral society

of people behind bars Schoenfeld argues that we must transform the political incentives for imprisonment and develop a new ideological basis for punishment **The Partnership Model in Human Services** Rosalyn Benjamin Darling, 2005-12-11

Great Britain. National Audit Office, 2009 Government faces increasing pressure to do more with fewer financial resources and with challenges such as climate change and an ageing population will require innovation in public services Departments have started to implement some of the recommendations of the National Audit Office s 2006 report on innovation HC 1447 I session 2005 06 ISBN 9780102942330 but are still not maximising the opportunities to innovate The majority of cases of innovation originate with senior management within departments There is potential to encourage more innovation from front line staff and service users At the front line public servants can be reluctant to put forward ideas where they do not appreciate how innovation relates to the goals of the organisation and can resist change they feel is forced upon them Other barriers include risk averse attitudes within departments and a concentration on targets budgets and high profile national initiatives Departments should develop strategies for encouraging and developing innovation It is not possible to identify exactly how much central government spends on developing innovation but estimates by the NAO suggest that departments have allocated at least 3 billion in the form of innovation budgets and the Department for Innovation Universities and Skills announced a further 2.5 billion to be spent encouraging and supporting innovation from 2008 9 to 2010 11 There are no measures in place to assess the impact of this expenditure Government should make use of the survey work done by the NAO for this report and develop it further to determine how effective this expenditure is *Solution-Focused Therapy* Alasdair J.
