**Property Ownership and Private Higher Education in China** Spring Su,2011-05-13 Recent decades have witnessed the proliferation in China of huge numbers of private universities and colleges in response to a wide ranging spectrum of socio economic and political demands under the country s flourishing market economy and its wholesale pursuit of decentralization This book explores the issue of property ownership an area which is regarded as an essential element in the attraction into the sector of local private institutions and foreign partnerships as well as in facilitating the future development of the country s existing institutions The focus throughout this book is primarily on the legal economic managerial and financial aspects of the relevant issues as well as other related topics such as consumer protections and fund raising activities A feasibility analysis and discussion is also provided on for profit universities and their potential market

niches in China in recognition of the fact that the current regulations which allow private universities to maintain a non profit status whilst actually enjoying profit returns clearly provides some legitimacy to the phenomenon of for profit in disguise It is argued in this book that such quasi profit regulations may further exacerbate profiteering behavior whilst it is also noted that in the short term there is a clear need to provide adequate protections within the apparent hybrid version of an ownership system a system characterized by a mix of capitalism and socialism through the adoption of a definitive legal framework within which economic actors can coordinate their efforts through a mutually understood framework of action Finally it is clear that in the transition from the rule of the people to the rule of law legislation practices and compliance do not always go hand in hand in China thus the healthy development of the educational sector will undoubtedly require some time as well as the introduction of complementary mechanisms for such legislation to be fully enforced in practice This book concludes

**Hui Muslims in the Shaping of Modern China** Bin CHEN, 2025-11-04 Chen examines the Chinese Nationalist government's distinctive support for private Muslim teachers schools between the 1920s and 1940s and explores the complex relationship between these institutions and the Chinese state during the Republican period In 1933 the government issued the Teachers Schools Regulations mandating that all teachers schools be state run However the Nationalists viewed private Muslim teachers schools as valuable allies in their efforts to assert influence in China's Muslim dominated northwestern frontier region and deliberately refrained from enforcing the 1933 Teachers Schools Regulations on them Instead the government applied the 1933 Amended Private Schools Regulations which did not specifically address teachers schools to govern Muslim teachers schools By charting the evolving dynamics between the Nationalist state and Chinese Hui Muslims this book reevaluates the Hui Muslims role in shaping modern China Offering crucial context on the role of Islam in modern China this book is a valuable resource for scholars and students of Chinese history as well as for policymakers and journalists interested in religion in China

**Policy Metamorphosis in China** Xiaojiong Ding, 2011-12-01 China has been experiencing great economic and social changes since the late 1970s when the Reform and Opening Up policies were accepted While some Sinologists argue that such changes have made the Chinese structure of authority fragmented and discrepant and have weakened the directive power of the Central Government a few others emphasize that despite a certain degree of economic decentralization and segmentation of public power the Central Government has been seeking ways to hold the nation together Consequently while the former argue that due to the centrifugal nature of the political system policy implementation is bound to deviate from the route specified by the Central Government the latter hold that national policies are carried out faithfully with minor deviations only in certain circumstances This book studies the processes of policy implementation in contemporary mainland China by taking minban private education at the level of basic education in Shanghai as an example Based on 65 interviews conducted during 2001 and 2004 three moduses of policy implementation are proposed and the Model of Structural

Fracturation is advanced as the prevailing modus of policy implementation in contemporary China. The model argues that policy metamorphosis during implementation is not something random; in contrast, it is determined by structural factors that no single policy actor can manipulate. The pyramid of Chinese politics is a loose construction with vertical and horizontal fracturations between different layers. The model highlights the fact that governments at the county district level are remote from and beyond the control of the Central Government and the provinces. They deserve more attention than they have received. Contrary to Western perspectives which regard the structural fracturation in the Chinese polity as dangerous for national stability and unity, this book takes the fracturation as an important and delicate element of the Chinese mode of governance and suggests that the very strength of the state lies in its capacity to tolerate local deviation and to embrace it into national institutions.

**Children's Literature and Transnational Knowledge in Modern China** Shih-Wen Sue Chen, 2019-04-29. This book examines the development of Chinese children's literature from the late Qing to early Republican era. It highlights the transnational flows of knowledge, texts, and cultures during a time when children's literature in China and the West was developing rapidly. Drawing from a rich archive of periodicals, novels, tracts, primers, and textbooks, the author analyzes how Chinese children's literature published by Protestant missionaries and Chinese educators in the late nineteenth and early twentieth centuries presented varying notions of childhood. In this period of dramatic transition from the dynastic Qing empire to the new Republican China, young readers were offered different models of childhood, some of which challenged dominant Confucian ideas of what it meant to be a child. This volume sheds new light on a little explored aspect of Chinese literary history. Through its contributions to the fields of children's literature, book history, missionary history, and translation studies, it enhances our understanding of the negotiations between Chinese and Western cultures that shaped the publication and reception of Chinese texts for children.

survival protection and development which played important roles on promoting child development      A Century of Student Movements in China Xiaobing Li,Qiang Fang,2019-12-02 In this book the authors offer their unique perspectives on the important roles Chinese students and intellectuals played in the shaping of the twentieth century China Their answers to these pivotal questions explore new nationalistic spirit modern world views and willingness of self sacrifice which had attributed to the spontaneous actions of the students as a New Culture emerged during the May Fourth Movement These articles show how China nurtured these spontaneous student movements even though the Nationalist Party in the Republic of China and the Communist Party in the People s Republic had exerted tight control over schools Both governments established organizations as well as operations among students that effectively turned some of the student movements into a political instrument by the parties for their own agenda      **U.S.- China Educational Exchange** Hongshan Li,2007-12-01 U S China relations became increasingly important and complex in the twentieth century While economic political and military interactions all grew over time the most dramatic expansion took place in educational exchange turning it into the strongest tie between the two nations By the end of the 1940s tens of thousands of Chinese and American students and scholars had crisscrossed the Pacific leaving indelible marks on both societies Although all exchange programs were terminated during the cold war the two nations reemerged as top partners within a decade after the reestablishment of diplomatic relations Approaching U S China relations from a unique and usually overlooked perspective Hongshan Li reveals that both the drastic expansion and complete termination of educational ties between the two nations in the first half of the twentieth century were largely the results of direct and deep intervention from the American and Chinese governments Benefiting from government support and collaboration educational exchange succeeded in diffusing knowledge and improving mutual understanding between the two peoples across the divide of civilizations However the visible hand of government also proved to be most destructive to the development of healthy intercultural relations when educational interactions were treated merely as an instrument for crisis management      **Education, Culture, and Identity in Twentieth-century China** Glen Peterson,Ruth Hayhoe,Yongling Lu,2001 A comprehensive collection on twentieth century educational practices in China
