Public Policy for Venture Capital Arnd Plagge, 2007-09-24 In view of Germany's lackluster economic performance during the 1990s i.e. at a time when the American economy was booming a relative lack of venture capital vis-à-vis the United States was lamented in Germany German government programs meant to help raise venture capital in order to finance predominantly young technologically innovative unlisted small and medium sized enterprises which despite low current profitability are considered to have a sufficiently large growth potential Deutsche Bundesbank were to a large extent unsuccessful since their inception in the 1960s It is well known that Germans tend to be more risk averse than Americans and it is therefore no wonder that the author of this book Arnd Plagge finds that Germany's venture capital market is relatively underdeveloped when compared to its counterpart in the United States There can be no doubt that due to its investment focus on innovative start-up companies venture capital can play an important role in fostering economic growth and the creation of modern high skill jobs especially by spurring the development of entirely new industries and products from such diverse and dynamic realms as pharmaceuticals biotechnology as well as information and communication technology

Public Policy and the Economics of Entrepreneurship Douglas Holtz-Eakin, Harvey S. Rosen, 2003-12-23 This groundbreaking collection of essays by leading economists examines different aspects of entrepreneurship and its

relation to public policy Entrepreneurship has been a subject of much recent discussion among academics and policymakers because of the belief that it invigorates the economy producing greater productivity more jobs and higher economic growth President George W Bush promoted his economic plan by pointing to its encouragement of entrepreneurship Yet despite its importance the topic of entrepreneurship is underrepresented in the economics literature The contributors to Public Policy and the Economics of Entrepreneurship examine different aspects of entrepreneurship and its relation to public policy to help us reach a better understanding of the economic role of entrepreneurs The contributors all prominent economists first consider what policies effectively encourage entrepreneurship discussing a possible role for government in venture capital markets the effect of the tax code s subsidy of health insurance for the self employed and the impact of banking deregulation on entrepreneurial activity Two contributors then examine entrepreneurship in unexpected places not small businesses but large pharmaceutical firms and nonprofit organizations The final essays explore the effect of entrepreneurship on inequality looking at statistical evidence of upward mobility for self employed blacks and Hispanics and discussing the effect on entrepreneurial activity of policies to reduce wealth inequality The contributors hope by offering a rigorous economic examination of entrepreneurship to foster better public policies that encourage and support entrepreneurial activity

New Vistas in Transatlantic Science and Technology Cooperation National Research Council, Board on Science, Technology, and Economic Policy, 1999-05-25 The successful conclusion of the US EU Agreement on Science and Technology Cooperation offers the prospect of a new chapter in transatlantic cooperation As with any international agreement in science and technology the accord s full potential will be realized only if it can encourage mutually beneficial cooperation With this in mind responsible officials of the European Union EU and the U S government contacted the National Research Council s Board on Science Technology and Economic Policy STEP to discuss how this negotiating success might be publicized and productively exploited It was agreed that the STEP Board should organize a conference to celebrate the accord inform the U S and European research communities of the agreement and explore specific opportunities for enhanced cooperation At the same time the conference would provide the occasion to review existing and evolving areas of transatlantic cooperation in science and technology from the perception of the United States the European Commission and the member states of the European Union

The Triple Helix Henry Etzkowitz, 2008-02-05 A Triple Helix of university industry government interactions is the key to innovation in increasingly knowledge based societies As the creation dissemination and utilization of knowledge moves from the periphery to the center of industrial production and governance the concept of innovation in product and process is

itself being transformed In its place is a new sense of innovation in innovation the restructuring and enhancement of the organizational arrangements and incentives that foster innovation This triple helix intersection of relatively independent institutional spheres generates hybrid organizations such as technology transfer offices in universities firms and government research labs and business and financial support institutions such as angel networks and venture capital for new technology based firms that are increasingly developing around the world The Triple Helix describes this new innovation model and assists students researchers and policymakers in addressing such questions as How do we enhance the role of universities in regional economic and social development How can governments at all levels encourage citizens to take an active role in promoting innovation in innovation and conversely how can citizens so encourage their governments How can firms collaborate with each other and with universities and government to become more innovative What are the key elements and challenges to reaching these goals

Public Policy in an Entrepreneurial Economy Zoltan J. Acs,Roger R. Stough,2008-07-03 In recent years there has been increased focus on understanding the dynamic relationships among entrepreneurship policymaking and economic growth At the heart of research debate and practical application is the question Under what conditions can entrepreneurship flourish And the corollary To what degree does encouraging entrepreneurship result in economic growth A popular response is to argue for entrepreneurship policy that is targeted policies that are designed to promote innovation entrepreneurship and small business creation To the editors and contributors of this volume that approach is fundamentally flawed They argue that there is no such thing as a discrete entrepreneurship policy instead there is only policymaking in the context of an entrepreneurial economy The book addresses policies operating at the individual national regional and international levels and offers a unique perspective on several institutional structures that enhance entrepreneurship and economic growth

The Oxford Handbook of State Capitalism and the Firm Mike Wright,Geoffrey T. Wood,Alvaro Cuervo-Cazurra,Pei Sun,Ilya Okhmatovskiy,Anna Grosman,2022-08-01 There has been a major revival of interest in State Capitalism what it is where it is found and why it is seemingly becoming more ubiquitous As a concept it has evolved from radical critiques of the Soviet Union to being deployed by neo liberals to describe market reforms deemed imperfect to settle into a middle ground as a pragmatic way to describe the state assuming a role as an active economic agent in addition to its regulatory social and security functions The latter is the central focus of this book although due attention is accorded to the origins of state capitalism and how it has changed over the years as well as contemporary ways in which state capitalism may be theorized This economic agency may assume direct forms for example via state owned enterprises However it may also be indirect for example actively serving private interests through promoting insider firms who may occupy monopolistic market positions and perform outsourced state functions In turn this leads to raising salient governance questions The latter may

encompass agency tensions between public ownership and political or even private interest control it may also include issues of transparency and monitoring Although state capitalism has often been depicted as the preserve of states in the global south be they developmental or predatory many forms of state capitalism are visible in mature economies be they liberal or coordinated and this is not always associated with superior governance arrangements indeed this is an area where clear and easy divisions between the developing or emerging world and the developed or mature world may increasingly be breaking down This volume brings together the accounts of leading experts from around the world it is explicitly multi disciplinary and both consolidates the existing knowledge base and provides new novel and counter intuitive insights The Oxford Handbook of Venture Capital Douglas Cumming,2012-04-20 This handbook provides a comprehensive picture of the issues dealing with the structure governance and performance of venture capital The book comprises contributions from 55 authors currently based in 12 different countries *Sources of Metropolitan Growth* John F. McDonald,2017-07-31 The factors that determine growth at the industry level are different for innovative versus mature industries Growth industries rely on high quality workers access to capital technical change and numerous forms of collected economies Mature industries concentrate on low input costs and minimizing costs for wages transportation taxes material etc This approach is adopted here to consider the growth and development of metropolitan economies In twelve chapters eminent scholars provide a complete review of what works and what doesn't in generating economic development What are the potential and the reality of producer services suburban business centers enterprise zones technology based ventures and industrial incubators How can economic development policy improve the incubator effect Is there a nationwide venture capital network What are the locational requirements of firms in high growth industries Finally what are the consequences of failed growth This comprehensive collection includes chapters by Edwin S Mills Patricia E Beeson Mark A Satterthwaite Breandan Huallachain John F McDonald William B Beyers Truman A Hartshorn Peter O Muller Rodney A Erickson Richard Florida Donald F Smith Jr Claudia Bird Schoonhoven Kathleen M Eisenhardt Stephen Nord Robert G Sheets and Thomas R Hammer This work is a must read for policymakers planners analysts and students Global Business Expansion: Concepts, Methodologies, Tools, and Applications Management Association, Information Resources,2018-04-06 As businesses seek to compete on a global stage they must be constantly aware of pressures from all levels regional local and worldwide The organizations that can best build advantages in diverse environments achieve the greatest success Global Business Expansion Concepts Methodologies Tools and Applications is a comprehensive reference source for the latest scholarly material on the emergence of new ideas and opportunities in various markets and provides organizational leaders with the tools they need to be successful Highlighting a range of pertinent topics such as market entry strategies transnational organizations and competitive advantage this multi volume book is ideally designed for researchers scholars business executives and professionals and graduate level business students *Incentives for Innovation in China* Xuedong Ding,Jun Li,2015-02-11 In the past three

decades China has successfully transformed itself from an extremely poor economy to the world's second largest economy. The country's phenomenal economic growth has been sustained primarily by its rapid and continuous industrialization. Currently industry accounts for nearly two fifths of China's gross domestic product and since 2009 China has been the world's largest exporter of manufactured products. This book explores the question of how far this industrial growth has been the product of government policies. It discusses how government policies and their priorities have developed and evolved, examines how industrial policies are linked to policies in other areas such as trade, technology and regional development, and assesses how new policy initiatives are encouraging China's increasing success in new technology intensive industries. It also demonstrates how China's industrial policies are linked to development of industrial clusters and regions.

Innovation Policies in Europe and the US Susana Borrás, 2018-01-18 This title was first published in 2003. During the 1990s research and technological development policies moved from a problem solving approach towards a wider one focusing on the systemic nature of the innovation process. This change can be featured as the transition from a technology policy towards an innovation policy. *Innovation Policies in Europe and the US: The New Agenda* provides a comparative analysis of eleven highly industrialized countries' innovation policies in the 1990s and addresses the nature, dynamics, causes and effects of this transition. By combining the analytical skills of sociologists, economists and political scientists, the book sets up a novel framework for studying the evolution of this particular policy area by examining institutional change from a broader perspective.

Regional Innovation, Knowledge and Global Change Zoltan Acs, 2013-12-19 First Published in 1999 The process of globalization is shaped and reinforced by a rapidly changing knowledge environment. As economies become less constrained, national frontiers become more geographically specialized. Thus important elements of the innovation process tend to become regional rather than national. In this new environment large corporations are weakening their links with their home country, spreading their innovation activities to source different regional systems of innovation. Regional networks of firms are creating new forms of learning and production. The aim of this book is to broaden both conceptually and empirically the national systems of innovation approach developed by Lundvall, Freeman, Nelson and others. While recognizing the creative nature of economic adjustment in a turbulent world and the highly uneven distribution of economic growth, the national systems approach lacks a mechanism by which to understand innovation when the realistic unit of analysis is no longer the nation state. Written by leading scholars in the field, this book provides a ground breaking examination of sub regional systems of innovation in an interconnected global economy.

Building High-Tech Clusters Timothy Bresnahan, Alfonso Gambardella, 2004-04-05 This book was first published in 2004. National economic growth is fueled by the development of high technology clusters such as Silicon Valley. The contributors examine the founding of ten clusters that have been successful at an early stage of growth in information technology. Their key finding is that the economics of starting a cluster is very different from the positive feedback loop that sustains an established cluster. While nothing succeeds like

success in an established cluster far more difficult risky and unlikely are the initial conditions that give rise to successful clusters The contributors find regularities in the start of the successful clusters studied including Silicon Valley around 1964 These cases contain old economy factors such as competencies firm building capabilities managerial skills and connection to markets more than the flamboyant new economy factors that have been highlighted in prevailing years
